Details That Matter

What are Sightlines?

A sightline is the distance between the outside of the frame and the edge of the glass.

Look closely at the frame on these two single hung windows. On the Style Line® Series to the left, you'll notice that the top piece of glass is larger than the bottom piece of glass. For the Trinsic™ Series window on the right, you can see that the top and bottom pieces of glass are the same size.

No matter which design you prefer, Milgard has just the right window to complement any home.
