# Introduction to the Cambridge English: Business Preliminary Wordlist

The Cambridge English: Business Preliminary Wordlist gives teachers a guide to the vocabulary needed when preparing students for the Cambridge English: Business Preliminary examination.

## Background to the list

The Cambridge English: Business Preliminary Vocabulary list was originally developed by Cambridge English in consultation with external consultants to guide item writers who produce materials for the Cambridge English: Business Preliminary examination. It includes vocabulary from the Council of Europe's Threshold (1990) specification and business-related vocabulary which corpus evidence shows is high frequency.

The list covers vocabulary appropriate to this level of English and includes receptive vocabulary (words that the candidate is expected to understand but which is not the focus of a question), and productive vocabulary (words that the candidate needs to know to answer a question).

The list does not provide an exhaustive list of all words which appear on Cambridge English: Business Preliminary question papers and candidates should not confine their study of vocabulary to the list alone.

## How the list is updated

Usage of business language can change rapidly, as shown by the growth of email correspondence and associated vocabulary in the last ten years. In order to maintain its currency, the wordlist is updated on an annual basis by the addition and removal of words, using a corpus-based approach. Suggested additions to the wordlist are collated and the frequency of these words is obtained by reference to established corpora (electronic databases). The corpora in question represent receptive and productive language in business and general contexts. The main corpora used for the validation of the Cambridge English: Business Preliminary wordlist are:

- the Cambridge Learner Corpus (CLC) which includes over 20 million words of written learner English at six levels;
- the British National Corpus (BNC) which includes 100 million words of written and spoken native speaker data, including four million business-oriented words;
- a web-derived corpus of business-related articles which includes 120,000 words from US and UK business articles.

## How the list is organised

- **Word sets**

Some categories of words which a learner at this level might be expected to know are not included in the alphabetical list but appear separately in Appendix 1. These include word sets such as numbers; days of the week; months of the year; countries and languages.

- **Exemplification**

Example phrases and sentences are given only where words which can be used with different meanings have been restricted in the extent of their usage at Cambridge English: Business Preliminary level. For example, *trust* is exemplified as it will only be used on a Cambridge English: Business Preliminary paper with the meaning of having confidence in someone or something, and not with the meaning of a financial arrangement (such as *trust fund* or *trust unit*).

- **Prefixes and suffixes**

A list of possible prefixes and suffixes is provided in Appendix 2 and these may be combined with the vocabulary items in the list as appropriate. *Unemployment*, for example, is not included on the alphabetical list, as it is formed from a word on the list – *employ* – in combination with two of the allowable affixes – *un* and *ment*.

Words with an affix which is not included in the appendix appear within the alphabetical list. *Reliability*, for example, is listed, as the suffix – *ity* is not included in Appendix 2, as it is considered to be difficult for this level.

- **Compound words**

Compound words are not included in the list where both individual words are present and where the meaning of the compound is literal and transparent, eg *businessman*. A similar approach has been adopted for two-word and hyphenated compounds, for example, *leisure centre* and *hand-made*.

- **Multi-word verbs**

Multi-word verbs are not included in the list if they have a literal meaning and are composed of verbs and particles already in the list. Examples of literal multi-word verbs are *come into* and *sit down*. If the meaning of the verb is not transparent, eg *put through*, *get along*, the verb is listed and an example of usage given.

- **Topic Lists**

As Business English is considered to be a domain in itself, there are no separate topic lists for Cambridge English: Business Preliminary.

## **Personal Vocabulary**

The content of the Cambridge English: Business Preliminary wordlist is unlikely to cover completely the productive vocabulary that may be required by all candidates. Candidates should know the specific lexis they will need to describe themselves, their lives and their work.

## **Abbreviations**

Abbreviations used in the Vocabulary List are:

<b>abbrev</b>	abbreviation or acronym
<b>adj</b>	adjective
<b>adv</b>	adverb
<b>Am Eng</b>	American English
<b>Br Eng</b>	British English
<b>conj</b>	conjunction
<b>det</b>	determiner
<b>exclam</b>	exclamation
<b>int</b>	interjection
<b>n</b>	noun
<b>phr v</b>	phrasal verb
<b>pl</b>	plural
<b>prep</b>	preposition
<b>prep phr</b>	prepositional phrase
<b>pron</b>	pronoun
<b>sing</b>	singular
<b>v</b>	verb

## **Summary of points to be noted**

- The list does not include every word that may appear on a Cambridge English: Business Preliminary paper.
- The list covers receptive and productive vocabulary.
- Prefixes and suffixes used at this level appear in an appendix.
