

Volk Protective Products

*Innovative products for the
foodservice, janitorial, sanitation
and processing industries.*

Whether it is protecting the food you serve or protecting your valuable employees, Volk Protective Products provides a wide range of the highest quality and most cost-effective products to support your efforts to promote safety in the workplace.

Founded in 1988 as WorkWell and acquired by Volk Enterprises in 1995, the company name of Volk Protective Products was adopted in 2003 allowing us to share the strong brand equity of our parent company. We combine the best practices of both companies and market value to the food processing, foodservice, industrial safety, and janitorial/sanitation industries.

Our goal is to always surpass our customers' expectations. You'll find that our dedication to food and worker safety — and saving you money — hasn't changed. Our product offering has grown. And we're especially proud of our employee training programs designed to reinforce the necessity for safe workplace habits . . . every day.

Browse through these pages to find the best solutions for food and personal safety, affordability and convenience. If you have a particular situation that we have not addressed, please contact us so that we may provide a more specific solution. Toll free: 800-856-2852

Dispense Safe

Cleaner

Fully enclosed dispensers reduce contamination by eliminating glove boxes on counters which get wet and dirty—becoming breeding grounds for dangerous bacteria. Plus, Volk's Dispense Safe™ system keeps right-type, fresh, clean gloves convenient to each prep area and washing station, increasing employee compliance.

More Efficient

Wall-mounted dispensers improve efficiency by freeing up counter space. This space-saving benefit is second only to the economic efficiency that one-at-a-time dispensing affords by reducing waste.

Single-use gloves and proper handwashing go hand-in-hand. Before handling any food, wash hands thoroughly and put on clean gloves. Remove and discard gloves after handling raw food. Wash hands again and put on clean gloves before handling ready-to-eat food.

* Meets ASTM STD-D 3578-91 for exam quality.

Never wash or reuse disposable gloves. Change to a clean pair every time you change foodhandling or exam tasks, touch your skin or hair, handle money, or use the restroom. Gloves should fit properly to allow dexterity and comfort.

Latex Disposables

Latex offers excellent durability, elasticity and chemical resistance making it one of the best barrier protective solutions. Our

Clean Hand® and Health Hand® latex gloves provide very good resistance to most common chemicals as well as excellent

tensile strength and durability. Best of class elasticity results in a perfect fit and long-wearing comfort. Latex allergies are an important concern. Call Volk customer service for questions regarding latex allergies or visit

www.volkprotectiveproducts.com.

SuperStretch™ Vinyl

Volk Protective Products is proud to introduce SuperStretch™ Vinyl, the first durable and truly comfortable alternative to latex. One problem with traditional vinyl gloves is that they are more easily torn and therefore provide less protection than naturally-elastic latex. SuperStretch™ vinyl is a new petroleum-based option that combines the comfort and tactile sensitivity of latex with higher tensile strength and tear-resistance when compared to traditional vinyl gloves. SuperStretch™ Vinyl's reduced breakage and waste allows you to affordably provide latex-like protection with no concern for latex-allergies.

81074 SuperStretch; powdered; 5 mil, rolled cuff; S, M, L, XL. 10 bxs/100 ea.

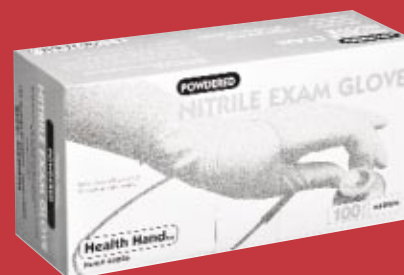

81075 SuperStretch; powder-free; 5 mil, rolled cuff; S, M, L, XL. 10 bxs/100 ea.

Vinyl Disposables

Volk Protective Products offers the largest selection of Vinyl Gloves. Our brands include Clean Hand®, Health Hand®, ValueLine and new SuperStretch™. Made of latex-free synthetic material, Vinyl gloves are an ideal substitute for people with latex-sensitivity. Vinyl is also an affordable solution for applications requiring regular glove change-out including examination, janitorial, sanitation and foodservice environments. Traditional vinyl provides neither the barrier protection nor the durability of latex and nitrile gloves. New SuperStretch™ has a higher tensile strength than traditional vinyl which results in improved tear-resistance and reduced waste.

Nitrile Gloves

No.	Description	Size	Box/ Glove ct	Dispenser options
Clean Hand® Nitrile				
60004	General purpose, powdered, 5 mil, rolled cuff, blue	S, M, L, XL	10 bxs/100 ea.	71102

* Meets ASTM STD-D 3578-91 for exam quality.

Nitrile Disposables

Nitrile gloves provide excellent resistance to tears and puncture. Nitrile is three times more puncture resistant than latex of the same thickness, making it one of the best solutions for long-wearing durability. Our Clean Hand® and Health Hand® Nitrile also

offer superior chemical resistance for a wide range of common as well as harsh chemicals. In addition to nitrile's excellent tensile strength and durability, the gloves conform well with excellent elasticity resulting in a latex-like fit and feel.

Nitrile's barrier properties make it "the choice" for foodservice, janitorial and sanitation safety. It is also popular with "first responders", including EMS, police and others.

To prevent the contamination of food and food-contact surfaces, foodservice managers must train and enforce good hygiene practices. First, review with employees the ways they can contaminate food. Second, review with your employees the components of a good personal hygiene program. Clean Hand® gloves are an integral part of your handwashing and hygiene program.

Poly Gloves & Sleeves

70860

73073

Clean Hands® Poly Sleeves

Clean Hand® Disposable Sleeves. Embossed polyethylene sleeves, 1 mil. 18" length with elastic ends.

Polyethylene Disposables

Used primarily in food service, Clean Hand® polyethylene disposable gloves are very cost effective and Volk Protective Products offers one of the widest selections of bulk packaging to help make the value that much greater for you. Our polyethylene gloves are hot seamed flat and are manufactured from materials to comply with FDA requirements for food contact. Recommended for short-term use these ambidextrous barrier solutions can be dispensed economically throughout any facility.

Volk Protective Products' poly line includes wrist length poly, elbow length poly, and poly sleeves.

- White with zipper front
- 25 Pieces per case

SB40000 Medium weight, Sizes: XL

Work Clean™ Work Apparel

Volk Protective Products essential Work Clean™ products protect both the work environment and the worker. The complete line includes disposable aprons, coveralls, bouffants, hairnets and beard covers. Work Clean products help workers comply with state and local jurisdictions that require food prep workers to keep their hair from coming in contact with food, clean equipment,

utensils and linens. In addition to preventing hair from falling into foods, hair protectors such as bouffants and beard covers discourage employees from running their hands through their hair or beard. Aprons protect clothing from stains, prolonging its wear life. Clean clothing naturally presents a more appealing appearance to guests.

Hairnets

White nylon hairnet. Case pack:

10 bgs/100 per

20018 Size 18"

20021 Size 21"

cover, one size. Case pack: 10

bgs/100 per bag.

Blue Bouffants

• Latex-free elastic headband for secure and comfortable fit

• Component materials comply with FDA regulations for food contact

• Polypropylene spun bond

• Available packing: 500 or 1000 pieces per case

A1819B/C Size 19", Blue

In addition to hand-contact, there are a number of other ways that poor hygiene can result in the transfer of bacteria to food, such as from dirty clothes or from hair falling into food. In cases of foodborne illness between 1988-1992 for which the cause of the illness was identified "poor personal hygiene" was cited 25% of the time (CDC, FoodNet 1998).

Work Safe

Blue Latex, 18 mil.

Latex with embossed grip, 12".

55668 Green unlined, embossed grip, 19", 22 mil. Sizes: 8-M, 9-L, 10-XL. Case pack: 1 doz. pair.

Work Safe™ Liquid & Chemical Resistant Gloves

Volk Protective Products offers hand protection products for heavy duty applications including using chemicals or harsh detergents and performing janitorial tasks and maintenance.

Work Safe supported and unsupported nitrile, latex and neoprene gloves are liquid- and chemical-resistant to protect workers from dermatitis caused by liquid, oil and chemical exposure and many abrasion hazards commonly encountered in foodservice facilities.

As part of your accident prevention program, Volk can provide you with training programs to teach workers proper use and care of their protective wear.

Frequent skin contact with solvents causes chronic cracking and reddening of the affected area. Due to lowered resistance, skin may be more susceptible to irritants for a long time after physical symptoms have healed. Continued exposure to solvents could result in permanent skin damage.

Cuff Color	Talon	Handguard II	Prepguard
X Small	134531	333019	133838

Whizard® Talon

Provides exceptional comfort and warmth in cold environments. 3" cuff. White or gray. Sizes: XS, S, M, L, XL. (See chart for part #s)

Whizard® Handguard II

The original knit cut-resistant glove. The highest level of cut protection, with softness, comfort and washability. White or gray. Sizes: XS, S, M, L, XL. (See chart for part #s)

Cut-resistant gloves incorporating high performance materials such as Spectra® and Kevlar®, in various combinations with stainless steel, fiberglass, synthetic yarns and high performance yarns, offer the best combination of protection, comfort and dexterity.

NOTE: Cut resistant gloves are extremely cut resistant but not cut proof. Do not subject to high speed or serrated blades.

Whizard® Prepguard

Lightweight and flexible cut protection for food prep and supermarket duties. High strength fibers and stainless steel construction. Sizes: XS, S, M, L, XL. (See chart for part #s)

Volk Cut & Safe

Value priced Spectra® knit. Launderable and bleachable. Sizes: S, M, L, XL.
52100 Heavyweight (7 gauge)
52050 Medium weight (10 gauge)

Stainless Steel Mesh

Ergonomic size and incredibly lightweight construction — Volk Metal Mesh offers excellent cut protection without impeding the speed and mobility of workers. Stainless steel rings resist process fats and oils and are easily cleaned. Sold by the piece. Reversible, full hand glove features side slit, with dome fastener for easy donning. Anti-microbial polypropylene strap and corrosion-resistant stainless steel offer increased contamination control.

PFA-515 XXS-XXL

Work Safe™ Cut Resistant Gloves

From opening cans to using knives to cleaning slicers, cut hazards abound in every commercial kitchen. Volk offers a comprehensive selection of composite-fiber cut-resistant gloves, including Cut & Safe™ and Whizard® brands. From the highest levels of protection to lighter-duty solutions, Volk has you covered. Many are made with patented yarn constructions that set the standard for cut protection, durability, and comfort in any application. Volk also offers stainless steel mesh cut resistant gloves—recommended for butchers, there is no greater protection available.

Considering that most hand injuries are preventable with proper use of cut-resistant gloves, compliance is key. Let Volk help you with cut-resistant glove training.

In 1999, the U.S. Bureau of Labor Statistics (BLS) recorded 20,964 cuts and punctures from knives, and 6,685 fingertip amputations. A typical hand injury costs a facility \$6,000 in lost time and Workmen's Comp claims. The need for protection is clear.

Work Safe

Bakers' Pads

High-loop terrycloth bakers' pads. Protects up to 460°F. Quality construction allows for repeated laundering.

J-2 Round Pad Protects to 460°F. Heavyweight terrycloth pad with hang loop. 8" round.

B-Pad Protects to 460°F. Extra heavyweight. Two layers of terrycloth with handhole.

G-Pad Protects to 460°F. Extra heavyweight. Two layers of terrycloth with elastic strap.

Terrycloth Mitt

Protects to 450°F. Lined, 17" long mitt with wing thumb. Sold by the dozen pair.

M917 Extra-heavyweight; size

M938HRL Heavyweight with steam and grease barrier in palm; size L

Thermal Lined Neoprene

Thermal foam lined neoprene. Fully coated, rough grip. Sold by the dozen pair.

52714F 14" gauntlet cuff

52718F 18" gauntlet cuff

Poly/Cotton Blend

Poly/cotton blended gloves are more easily washable and resist shrinkage, offering longer wear life than cotton alone. Great elasticity; glove stretches to fit and returns to form. Sold 25 dozen/cs.

00102 Sizes: M, L

Polarflex2

Freezer glove is a liquid-proof PVC/NBR blend. Features Polartec® lining and rough grip for easier handling of wet, slippery materials. Use for hot and cold protection.

862 12" Size: L

864 14" Size: L

Foam-Lined PVC

Provides protection for cold storage applications. PVC stays flexible even at low temperatures. Liquid-resistant orange coating resists abrasions, chemicals and oils.

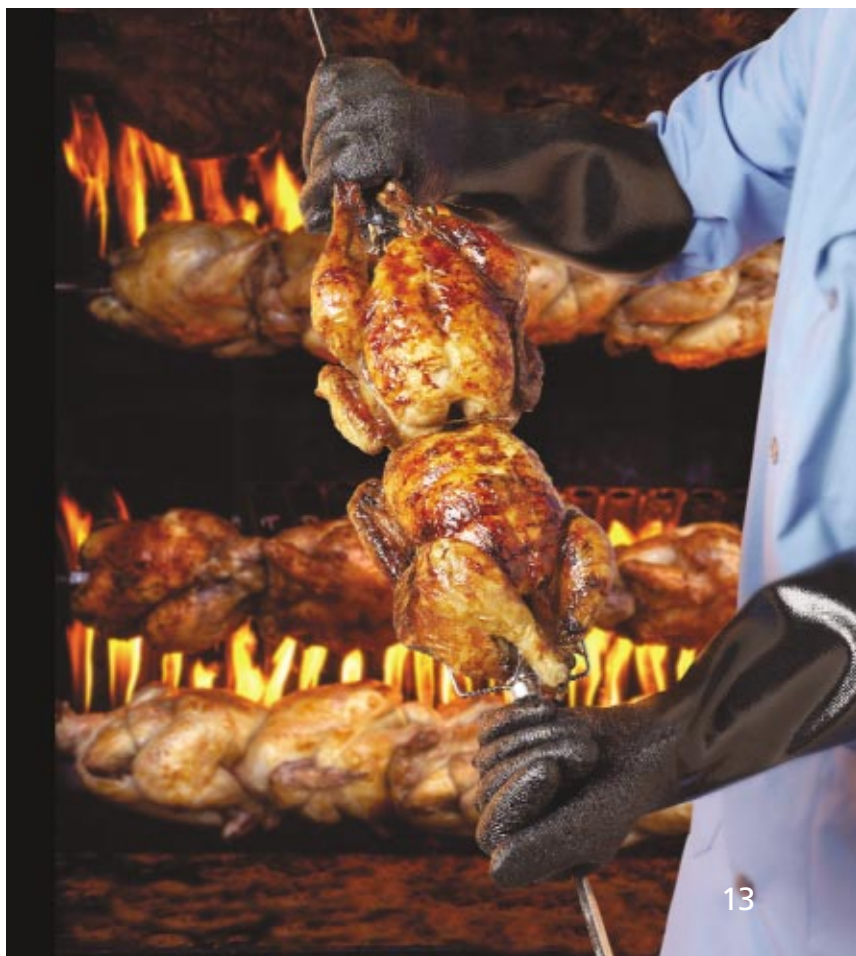

Y8144 Orange with knit wrist
Size: L

Work Safe™ Heat/Cold Resistant Gloves

Volk has a full range of solutions for commercial kitchens. Oven mitts for handling hot ovenware and broiling pans. Steam and grease mitts and flame-resistant gloves for grilling, broiling and barbecuing. Hot pads for baking, and cold-resistant gloves for working in walk-in coolers or freezers.

Volk has cost effective solutions to help you prevent burns, lessen accident downtime and lower the number of workers' comp claims.

According to BLS, 7,000 heat burns and scalds severe enough to cause lost workdays occurred to foodservice workers in 2000. Terrycloth is a natural insulator, ideal for bakers' mitts, gloves and pads, and stands up to repeated laundering with minimal shrinkage, remaining flexible and durable.

Work Safe

Rubber Coated Knit

Natural rubber coating provides outstanding abrasion resistance while cotton-polyester shell provides excellent comfort and fit. Textured, natural rubber palm for safe, sure grip. Gray fabric does not show dirt or grime. Sold by the dozen pair.

300 Size: XS-XL

Brown 8 oz Jersey

100% cotton jersey knit. Clute cut. Form-fitting. Excellent elasticity. Conforms to hand, allowing for better tactile sensitivity. Close fit improves glove's insulating performance. Sold by the dozen pair.

009-JI Size: Women's, Men's

Cotton/Canvas

8 oz. cotton canvas. Clute cut, straight thumb, knit wrist. Breathable fabric for all day comfort. Excellent seam strength. Sold by the dozen pair.

008-KI Size: Women's, Men's

Poly/Cotton Blend

Poly/cotton blended gloves are more easily washable and resist shrinkage, offering longer wear life than cotton alone. Great elasticity; glove stretches to fit and returns to form. Sold by the dozen pair.

00102 Sizes: M, L

Dotted Cotton

8 oz. cotton w/ PVC dots on palm, thumb and forefinger. Dotted on one side. Provides excellent grip and abrasion resistance. Dots increase glove wear life. Sold by the dozen pair.

- 00102-MPD** Single-sided dot. Size: Medium
- 00102-LPD** Single-sided dot. Size: Large
- 00102-MPD-2** Two-sided dot. Size: Medium
- 00102-LPD-2** Two-sided dot. Size: Large

Orange Gripper

Orange string knit with two-sided PVC criss-cross pattern for superior grip and wear resistance. Pattern on both sides, gloves are ambidextrous increasing wear life. Sold by the dozen pair.

- 45510** Sizes S, M, L

Leather Driver

Long wear and maximum dexterity for a variety of tasks. Grain leather is naturally comfortable, with less "breaking-in" time. Top grain cowhide w/ straight thumb.

- 003200** Sizes S, M, L, XL

Leather Palm

Ideal for a variety of applications, leather palm gloves offer comfort, protection and abrasion resistance. Economical solution. Wing thumb, with safety cuff. Knuckle strap provides additional abrasion resistance in critical wear area.

- 43401** Sizes S, M, L

Work Safe™ General Purpose Equipment and PPE

For all-around personal protection in the foodservice, food processing, industrial, grocery, janitorial and sanitation environments, count on Volk for protective gloves in canvas, leather and string knits. In addition to gloves we offer a variety of need-specific products to provide all degrees of protection that workers require. From emergency medical kits to emergency eyewash stations, from eye protection to hearing protection, Volk offers the products you need, creating a true one source resource.

Put our experience to work. Ask for a **free facility safety analysis** to help you properly match gloves and other personal protection to the application.

Cotton, canvas and jersey chore gloves protect workers from abrasions and blisters for performing maintenance, shipping and receiving and stock-handling tasks.

454 16 oz. Refill Bottles

455 32 oz. Refill Bottles

OSHA standard 1910.151(b) for general industry requires "... for the treatment of all injured employees, a person or persons shall be adequately trained to render first aid. Adequate first aid supplies shall be readily available."

Be sure that someone on your staff is trained in first aid procedures and always seek professional medical help for serious injuries.

1715BM

Direct Ventilation Goggles

- Economical protection against flying objects, dusts, & debris
- Meets or exceeds ANSI Z87.1-1999 standards

1780 144 pieces per case

Polycarbonate Visitor Spectacles

Ideal protection for short term use. Meets or exceeds ANSI Z87.1-1999 standards. Clear lens.

1750C 144 pieces per case

Comet™ Spectacle

Sporty wrap-around style and super light weight combine to make this the spectacle for compliance and protection. Frameless style ensures unrestricted, wide-angle vision. Scratch-resistant polycarbonate lenses blocks 99.9% of harmful UV light. Meets or exceeds ANSI Z87.1-1999 standards. 12 pieces per dispenser, 12 dispensers per case.

1715C Clear lens

1715AF Clear lens with anti-fog coating

1715A Amber lens

1715G Gray lens

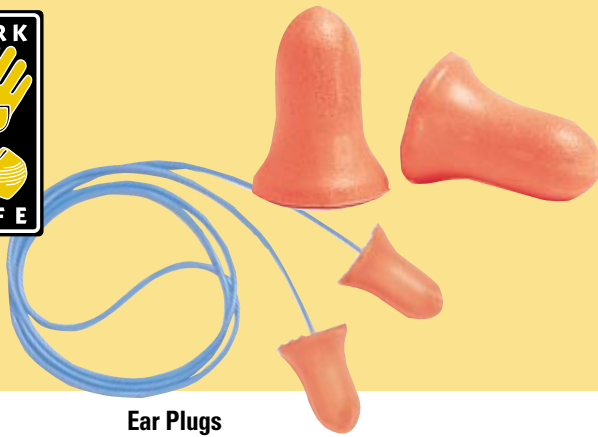

1715BM Blue mirror finish on gray lens

1715BM/C Blue mirror finish on clear lens

1715SM Silver mirror lens

1715T Indoor / outdoor clear mirror lens

Ear Plugs

The highest protection rating available. Remarkably soft, expandable foam ear plugs reduce pressure on the ear canal. Self-adjusting foam creates a custom fit. Smooth, soil resistant skin coating enhances hygiene and comfort. Flared end promotes optimum insertion depth and easy removal. Each pair individually packaged. NRR 33dB. Compliance: ANSI S3.19-1974.

LHMAX-1 Uncorded, 200 Pr/Bx

LHMAX-30 Corded, 100/Box

N95 Particulate Respirators

Protective Respirators designed with your comfort and protection in mind. Our nuisance masks are ideal for light filtering applications. Features latex-free double head strap, adjustable aluminum nosepiece, and comfortable nose foam.

- Compliant with 42CFR Part 84
- NIOSH N95 approved
- Meets CDC guidelines for TB exposure control

1895N No valve, 20 per box

1895NV Exhalation valve, 10 per box

Food safety in the processing environment means a manufacturing environment that employs Hazard Analysis Critical Control Point (HACCP) programs. This should include the critical step of microbiological testing of products. When protecting the food supply, never forget to protect your workers, too.

ProLine® Dispensers

Minimizes product waste. Cartridges are recyclable, collapsible and change-out fast to reduce maintenance costs. Tamper-resistant and durable. ADA Compliant

S198127 White ProLine, 1 liter

S198128 Black ProLine, 1 liter

Skin & Barrier Creams

All purpose protective cream protects the skin from harsh water- and solvent-based irritants. Suspends contaminants above the skin. Contains no silicone. Fast and easy clean up.

S148127 One-liter cartridge

Medicated Skin Cream

Promotes healthy skin and prevents dermatitis. Conditions, soothes, and helps heal the skin. Contains allantoin and chloroxylenol (PCMX). Quickly absorbs and leaves no greasy feeling.

S140127 One-liter cartridge

Blue Gel Hand Soap and Shampoo

Frosty-blue lotion soap produces a rich, creamy lather. Mild fragrance, offering a general purpose cleansing action that is ideal for handwashing or showering.

S174127 1 liter cartridge

UltraGreen Antimicrobial Gel Soap

Light-green antimicrobial gel lotion soap with a mild scent. It is 99.9% effective against most common bacteria and it is perfectly suited for healthcare, hospitality and food preparation industries. Contains triclosan.

S175127 1 liter cartridge

Epi San Instant Sanitizing Gel

Hand sanitizing without water. Especially designed to fight microbial pathogens; provides protection against a broad spectrum of pathogens such as infectious Hepatitis, Staphylococcus aureus, Norwalk virus, Escherichia coli, Streptococci, HIV, and Pseudomonas aeruginosa. Eliminates 99.99% of common disease causing organisms within 30 seconds. Contains skin conditioners with a light, refreshing fragrance.

S101127 1 liter cartridge

NEW

from volk protective products

New ValueLine Disposable Gloves

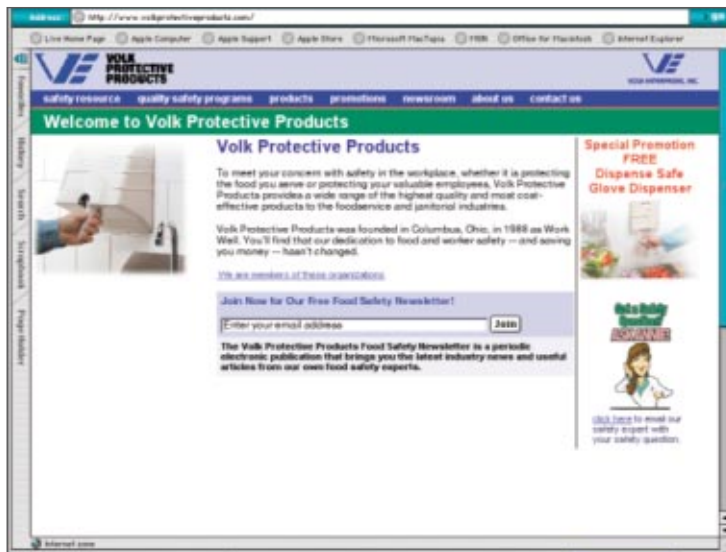

Let us help you balance your budget.

Introducing Volk ValueLine Single-Use Vinyl and Latex gloves — our lowest price offering in the category. How do we do it? We use our buying power to drive down the price you pay for quality disposable gloves. And we mean quality you can count on. Our gloves (like all Volk Protective Products) are tested in accordance with FDA requirements—ASTM D5252 (test data available on request).

See pages 3 and 4 for ordering information.

Visit Our New Web Site

The Volk Protective Products Web site has been completely redesigned to bring you more value: more product information, more safety resources, special promotions, news in our industry and more. You can share your workplace safety stories with us and win prizes. Link to government agencies for updates on codes and regulations. Get important food safety information. volkprotectiveproducts.com is your new foodservice safety "go-to" place.

Professional Training Modules

Volk Protective Products wants to make every day a safe day. Our professional training modules offer a programmed approach to personal and food safety. Contact us for further information about our Foodservice Training Modules:

- **Cut-Resistant Glove Training: Reducing Cuts and Lacerations**
- **Personal Hygiene (excerpt below)**
- **Single-Use Glove Training: Preparing and Serving Safe Food**
- **Protective Glove Use and Care**
- **Using Temperature Sensors and Keeping Temperature Logs**
- **Janitorial Glove Training: Safe Use of Cleaning and Sanitizing Chemicals**

Proper Handwashing and Glove Use: The Hygiene Protocol

Washing your hands...simple, right? Did you know that the Center for Disease Control (CDC) reports that 40% of food-borne illness outbreaks result from improper hand washing or hand washing non-compliance? Employees need to be taught the hygiene protocol, that is, how to properly wash and dry their hands and how to properly don their protective gloves.

Proper Handwashing

- Rings and other jewelry that may otherwise trap dirt and germs
- Moisten your hands under warm, running water from the sink.
- Spend at least 15 to 20 seconds working up a good lather. Pay particular attention to the fingers and the spaces between them and be sure to scrub dirt from around the tops and palms of the hands, between your fingers and under your nails where bacteria are most likely to hide. A nailbrush can be effective for cleaning nail beds and fingertips.
- Rinse all the soap off your hands with warm, running water.
- Avoid contact with potentially contaminated surfaces, such as sink or faucet handles, which can result in cross-contamination.
- Dry your hands using disposable paper towels.
- After drying hands, grasp the faucet handle with the used paper towel to turn off the water.

Proper Glove Donning

- Gloving is not and should not be considered to be an effective substitute for proper hygienic practices.
- After handwashing, avoid contact with potentially contaminated surfaces. Glove dispensing systems designed to dispense one glove per pull are recommended.
- Dispense one glove. Beaded cuffs facilitate donning. Pull this first glove completely on. A snug fitting glove helps prevent accidents and improves manual dexterity.
- With gloved hand, dispense next glove and complete donning.
- Replace gloves when changing tasks. Change gloves every time a work station is entered or exited. Also, change gloves when handling different types of food. It is important to remove gloves after coughing, sneezing or touching hair or face. After removing gloves, wash hands and replace with new gloves before returning to work.

After handwashing, avoid contact with potentially contaminated surfaces.

Employees should avoid touching glove boxes, a critical point for recontamination of clean hands. Glove dispensing systems keep right-type, clean gloves convenient to each prep area and washing station, increasing employee compliance.

Pull first glove completely on, then dispense and don second glove. A snug fitting glove helps prevent accidents and improves manual dexterity. Change gloves frequently to discourage cross-contamination.

Make Every Day a Safe Day™

Make better, more informed buying decisions with the help of Volk's Technical Support Specialists.

Partner with us! Our people – from our experienced inside support staff to our regional field groups – are committed to providing excellent products, timely service, thorough product knowledge and help in reducing your overall costs.

We're here to help. We know that worker injuries or even one case of foodborne illness can have a financial snowball effect. At Volk Protective Products our first priority and the company's goal is protecting your customers, your workers and your bottom line!
