

## WAH SHING INDUSTRY CO.(HK)

### XIECHANG PLASTIC MOULD PROCESSING FACTORY

#### Wahshing Offers You:

- ☞ In-house design and tooling
- ☞ Cost effective mould making
- ☞ Latest moulding technology
- ☞ Double shot plastic mould
- ☞ Machining and assembly
- ☞ Complete control over quality
- ☞ Full traceability of components
- ☞ On demand in time supply

## About Wahshing

WAH SHING INDUSTRY CO.(HK) is a professional mould maker in China with good organization, first-class management, strong engineering design team etc. We have all kinds of advanced and precise equipments such as CNC achines, EDM, Double-component injection moulding.

### Our products mainly cover:

- \* Auto parts mould
- \* Medical equipment mould
- \* Household appliances mould
- \* Electronic products mould
- \* Double color mould

The reason Wahshing grow up rapidly are stably and good quality, on time delivery, good services and so on. We have been exploring oversea market for five years. And our business scopes have expanded to Europe, United States, America, Middle East and Southeast Asia.

- ∴ Wahshing mould not only pursues mould core quality to complete, but also strict request completes the mould outward appearance.
- ∴ mould Standard: HASCO, DME, LKM.
- ∴ mould base supplier: LKM, MINGLEE, HASCO, DME.
- ∴ Steel supplier: LKM, ASSAB, THYSSENKRUPP, Usually use steel: H13, 420, S136, 2083, P20, NAK80, 2311, 2379, 2767, S-7.
- ∴ old components supplier: HASCO, DME, PUNCH, MISUMI
- ∴ Hot runner supplier: YUDO, HASCO, HUSKY, INCOE, MOIDMASTER, SYNVENTIVE.
- ∴ mould Features: Two-Shot, Over-moulded and Hot Runner mould, Screw moulds.

## Quality

Wahshing strictly comply with ISO9001:2008 instruction and requirements, use quality document system to control every process of design, production and inspection. We have established separate QA departments which are independent of production / design departments, set standard QA/QC procedures for each step of raw-material ordering, production, testing, assembly, packing and shipment then ensure customer get the best products and services. Quality begins with competent and experienced employees, bringing commitment and know-how to the company.

Our qualified suppliers, source mold base and mold steel are from LKM,ASSAB,THYSSEN and DAIDO; hot runner system from YUDO, MOLD-MARSTER, HASCO, DME, HUSKY. We also can select international standard component from LKM, DAIDO, HASCO and DME, to provide compatible standard component to help customer cost down.

Wahshing after service section will contact the customer to learn about the requirements and comments for mould quality after shipment. For quality problems or discrepancy of moulding under normal operation, we will make quick response and timely provide effective solutions for customers. Even we can promise to remake the inserts even some components for free, if they have problems that caused by our wrong working.

Wahshing has a high degree of in-process control on mold manufacturing and final mold qualification. Equipped with in-house mold trial injection machines, SPC analysis software and decouple molding system. We can ensure molds consistently produce high quality products at the shortest cycle.

### Wahshing QC Procedure:

Mould Design Control

Mould Steel Hardness Inspection

Mould Electrodes Inspection

Mould Core & Cavity Steel Dimension

Mould Core & Cavity Steel Dimension Inspection

Mould Pre-Assembly Inspection

Mould Trial Report & Samples Inspection

Mould Pre-shipment Final Inspection

Export Mould Package Inspection

We are strictly conformity with ISO 9001:2008 standard. All moulds have been well tested by professional equipments before shipping.

## Wahshing---Your best choice for plastic injection mould

Wahshing is a large-scale company integrates mould designing, mould making and mould production. We are based in China mainland and for more than 13 years we have worked in partnership with customers and suppliers across many industries to provide innovative and effective design, manufacturing and delivery solutions.

### Leading the Field

As experts in plastics technology we have not been afraid to push the boundaries to find new and exciting ways to tap the potential of the in large and thick section moulding and for our injection moulding process. We are renowned for our expertise **Double Shot Injection Moulding skills.**

### Traditional Values

We believe in putting the customer first. This means individual attention, listening to what you want and working with you to achieve the results you need. Most of all it means delivering on our promise to you - every time

### Building for the future

Our company always keep eyes on moulds skill, equipment, staff training and company management. This will ensure our ability to meet the current and future demands of the market with better quality and service.

### Free Advice

Our free of charge advice and quotations demonstrate our high quality, value for money service. Whether you are a new or an existing user of the plastics injection moulding process we would like to hear from you. Our advice is free and our service is, quite simply, excellent.

## Plastic Injection moulding

Wahshing can offer plastic injection mould with all kinds of plastic material, such as ABS, PA, PC, PE, POM, PBT and PET etc. provide auto parts mould, medical equipment mould, household appliances mould, electronic product mould, double color mould and so on with cold or hot runner.

### Cost Effective Production

We have extensive experience in producing a vast range of products and components in a wide variety of thermoplastic materials. Our mould shop is equipped with modern machinery utilising the latest computer technologies. You can be sure our skilled technicians and operators will use the most cost effective production methods.

### Flexibility

We can manufacture to order or work to your schedules. To help you achieve maximum cost efficiency we can also manufacture in larger quantities and hold the balance in stock for you to call off as required.

### Solutions

Wahshing has horizons for the plastic injection moulding process. We have made it possible to produce items traditionally made by more costly methods. Small or large, thin or thick, one moulding or whole assemblies –we can offer a solution. We manufacture products weighing just from a few grams and have particular expertise in producing mouldings with sections.

## Double Color Plastic Injection mould

Double color mould is a highlight among mould family. It attracted eyes of the world and open a new area in mould' s history. It's belived that it will be a new direction of mould developing. In Wahshing We focus on 2 shot parts mould making and production, painting,thin wall and high precision parts mould making and production.

### The characteristics of double color mould

1. High precision and stable quality.
2. Good structure strength and durability.
3. Smaller gap between different color parts and better apprance than normal products.
4. Lower cost and promote added value as compounded parts.

### Why choose double color plastic injection mould ?

1. **Function requirements.** Such as power swith, mobile keypad, keyboard indicator, car swith and so on. They require the parts with LED diaphanous.
2. **Inprove handle feeling.** Some handheld products, they require to use rubber on handheld parts in order to make them more comfortable. Such as interphone cover, electric power tool handle, spanner, toothbush handle, thermos cup and so on.
3. **Make products more beautiful as decorate.** Some goods need to make logo, and it will be excellent and you don't need to worry the logo will be rubbed off any more.
4. **Parts of the products need to be electroplated.** As we all know, only ABS and PSU's surface are electroplating among plastic family. We can set the resin as ABS in the parts that need to be electoplated and other parts us PC or some other material if parts or one side of the products need to be electorplated.

## Visit Us

The following details are the comments of how to visit us in a good way according to where you stay.

In Shenzhen, you will spend about one hour and a half arriving at our factory from **Shenzhen Airport**.

It will only need 30 mins to arriving our factory from the world's biggest golf course-**Mission Hills Golf Club**.

Address: No. 9, Danxing District, Guanjingtou,  
Fenggang, Dongguan, China.
