**WAKEBOARDING
FEATURES
CATALOGUE**

WakeStation Features

Using the best materials and technology, WakeStation manufactures a full range of features for two-tower and full size cable parks. We are well aware that awesome features are what make a park popular and booked all the time, so we aim to please by offering both off-the-shelf features and custom-made designs. All of the features are made from high density polyethylene (HDPE) — which means that they look great, are safer to ride and will last much longer than steel or timber frames.

How do we manufacture them? In the production process, all parts are cut out from HDPE sheets with CNC routers. UV-proof HDPE details are assembled and welded together with a UV-proof welding rod. Features are filled with styrofoam to ensure floatage, keep them in good shape and quiet during riding. What distinguishes us most from other producers is that we are using a unique hot bending technology to create rounded edges that are strong and safe to ride.

Kickers

thoroughly crafted shapes
for controlled airtime

Palanga Wakepark, Lithuania
photographer Tomas Jakovlevas

Kicker 80

SIZE L:300 W:200 H:80

LEVEL Beginner, Intermediate

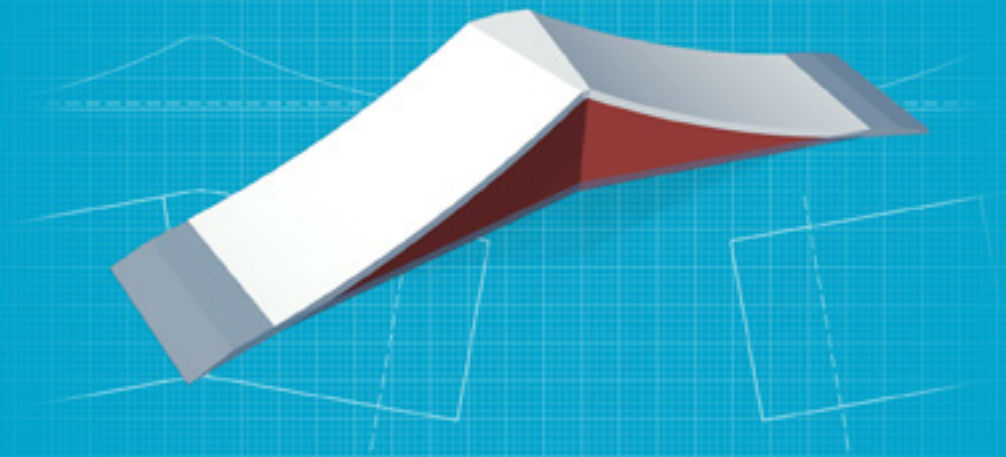

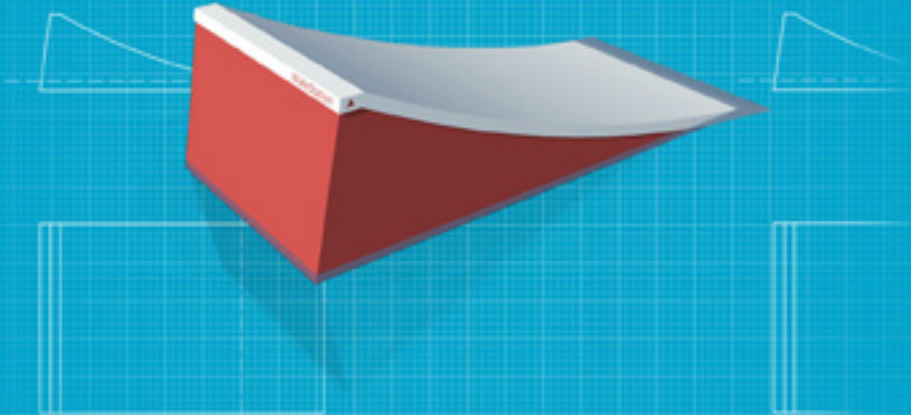

Our smallest kicker. **Friendly** for first jumps, yet really **poppy** when approached from the optimum angle.

Spine Kicker 80

SIZE L:600 W:200 H:80

LEVEL Beginner, Intermediate

Everything the Kicker 80 offers, but **both ways**.

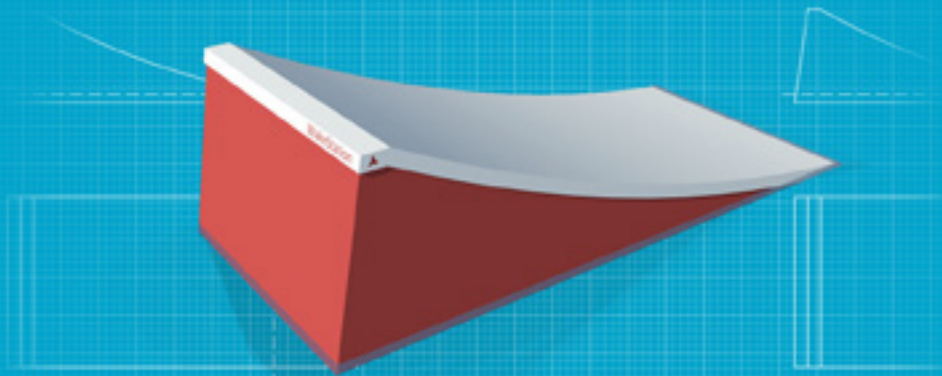

Kicker 110

SIZE L:400 W:200 H:110

LEVEL Intermediate, Advanced

The favorite shape of riders.
Provides **fully balanced** launches and great airtime.

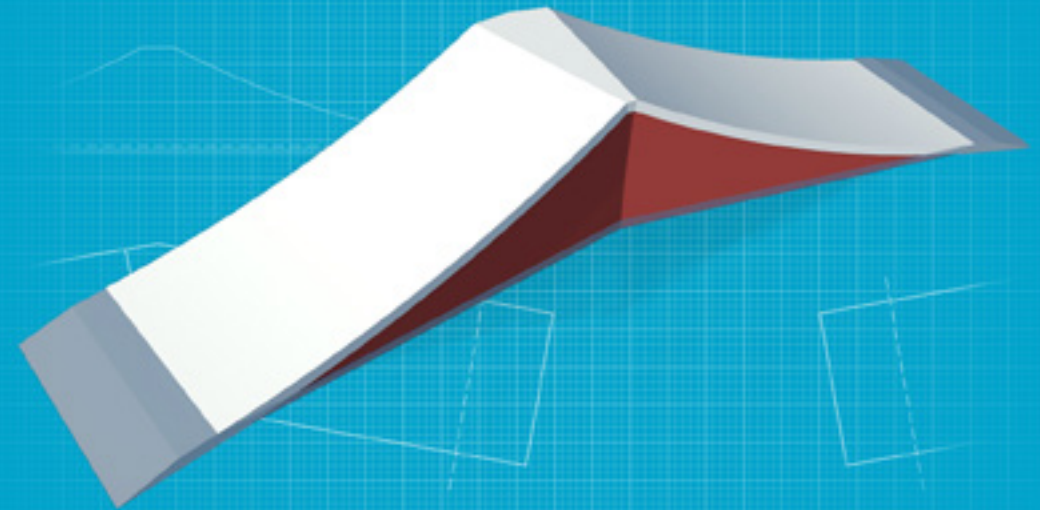

Spine Kicker 110

SIZE L:800 W:200 H:110

LEVEL Intermediate, Advanced

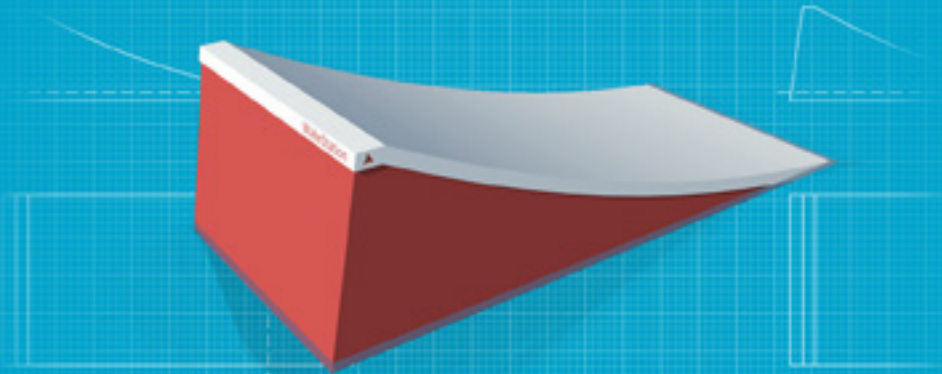

Just like the Spine Kicker 80,
but with **greater length and height**.

Kicker 130

SIZE L:500 W:200 H:130 **LEVEL** Intermediate, Advanced

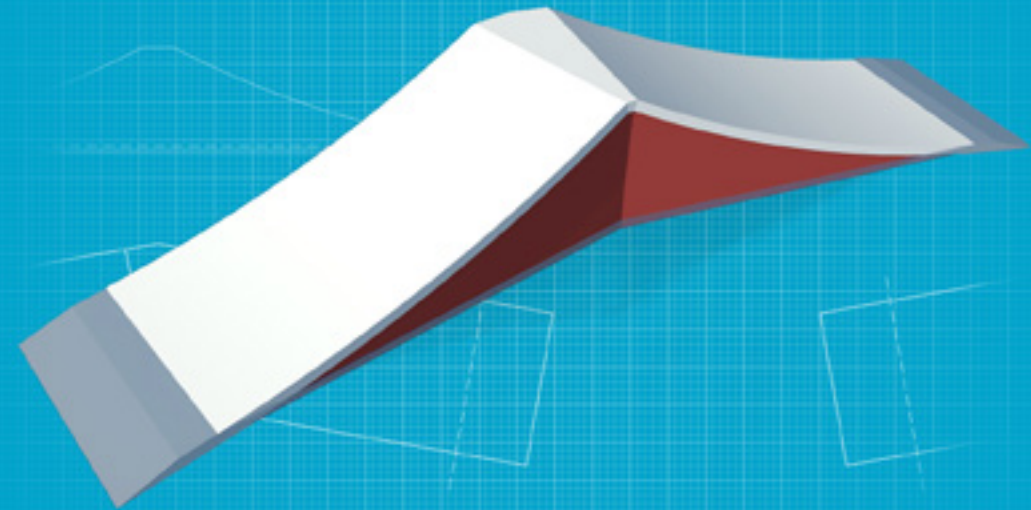

For those who like **rocketing into the skies**.
Pump the transition and go to infinity.

Spine Kicker 130

SIZE L:1000 W:200 H:130 **LEVEL** Intermediate, Advanced

Our **biggest** ready-made Spine Kicker,
with a length of 10 meters and a height of 1.3 meters.

Rail-
BOXES

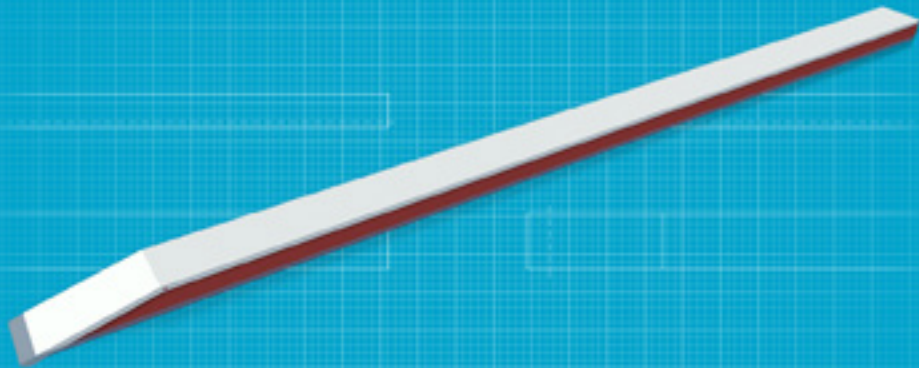

**an essential feature available
in many variations**

Wake the Stadium event, Finland
photographer Tomi Tähti

Flat Box I

SIZE L:2000 W:100 H:50 **LEVEL** Beginner, Intermediate

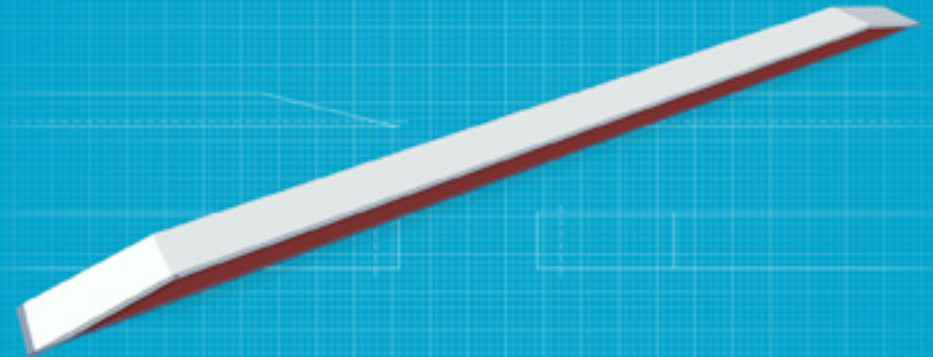

A flat, wide box for those who are just taking their first slides or trying out new tricks. A **must-have** for every wake park.

Flat Box II

SIZE L:2000 W:100 H:50 **LEVEL** Beginner, Intermediate

Mellow noses on both ends makes this **The One** for two-tower wake parks.

Rainbow

SIZE L:1600 W:60 H:130

LEVEL Beginner, Intermediate

A favorite since the beginning with its smooth transition, the Rainbow is a **time-honored classic**. Perfect for introducing narrower features to beginners looking to progress, but great for more advanced tricks as well.

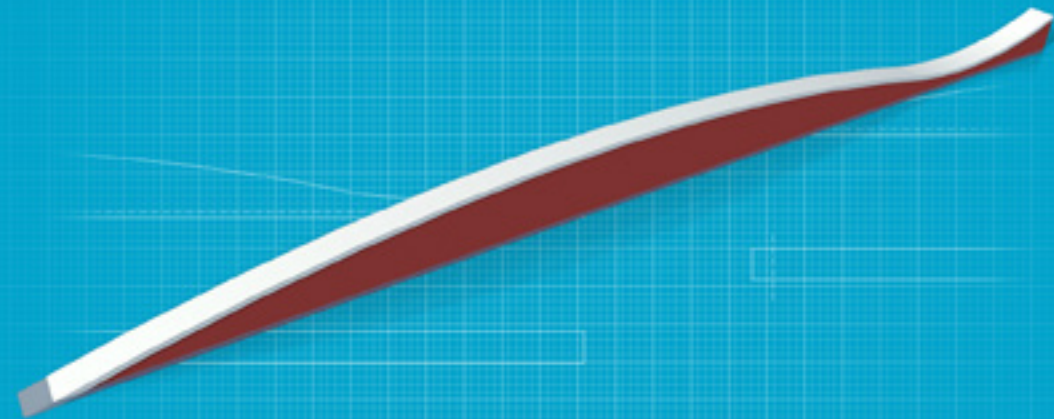

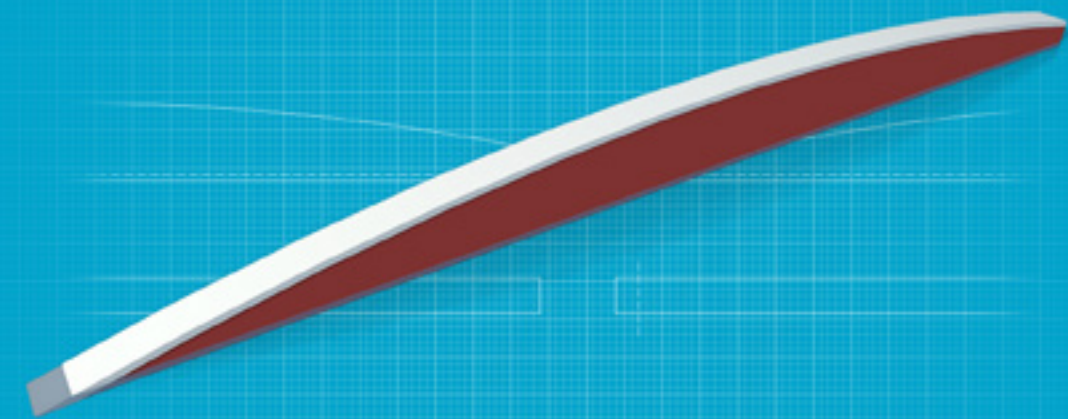

Elephant

SIZE L:2050 W:60 H:130

LEVEL Intermediate, Advanced

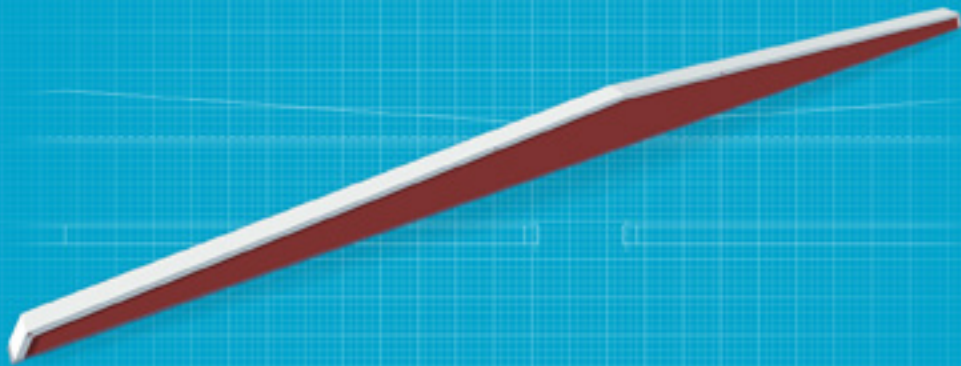

Growing from our Rainbow shape, the Elephant adds on a **kicker-type transition** at the end. A **great hybrid** of two favorites!

Rooftop

SIZE L:2000 W:45 H:110 **LEVEL** Intermediate, Advanced

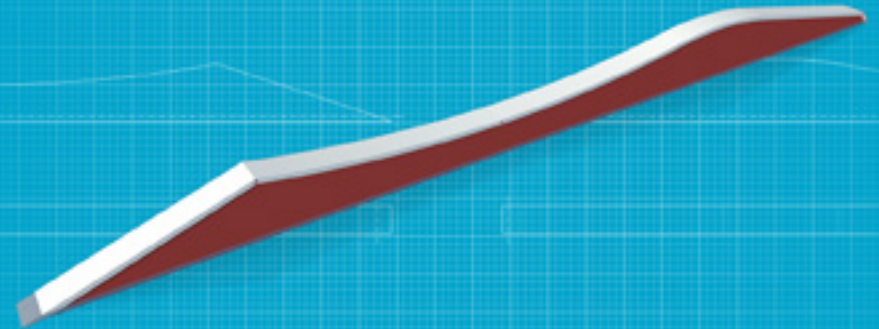

A **proven classic**. The gently angled shape gives the rider a platform for **ultimate creativity**.

Incline Wave Box

SIZE L:2100 W:60 H:125 **LEVEL** Intermediate, Advanced

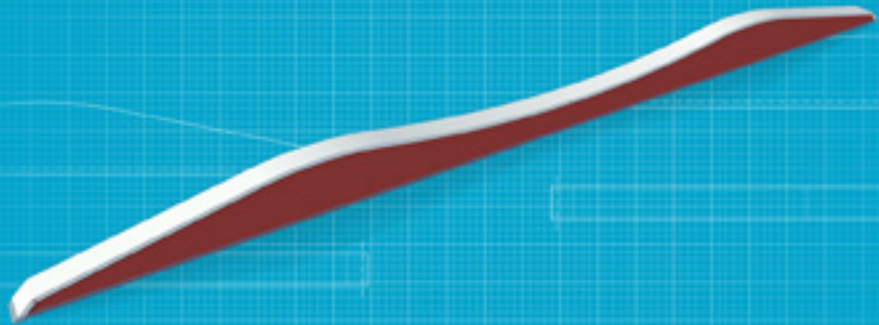

The **wave shape** makes everything more fun. Something **interesting** instead of a standard rail box.

Double Wave Box

SIZE L:2400 W:60 H:125 **LEVEL** Intermediate, Advanced

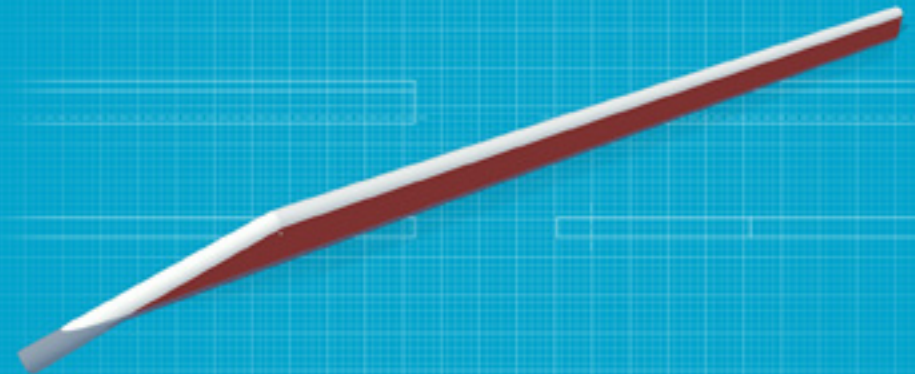

When one wave is not enough! The **smooth curves** make it feel like you're riding a mild swell.

Pipe Box I

SIZE L:2200 W:35 H:75 **LEVEL** Intermediate, Advanced

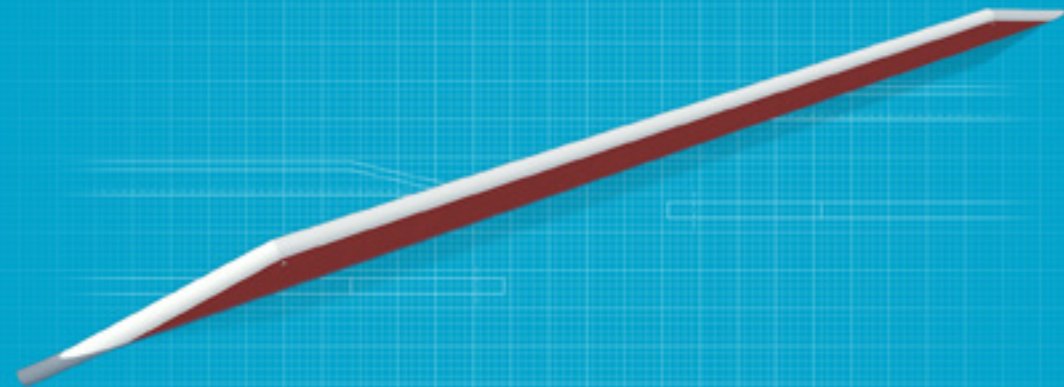

A **more technical** rail option, this is a logical step up from standard box rails. Makes working on your balance fun and easy.

Pipe Box II

SIZE L:2200 W:35 H:75 **LEVEL** Intermediate, Advanced

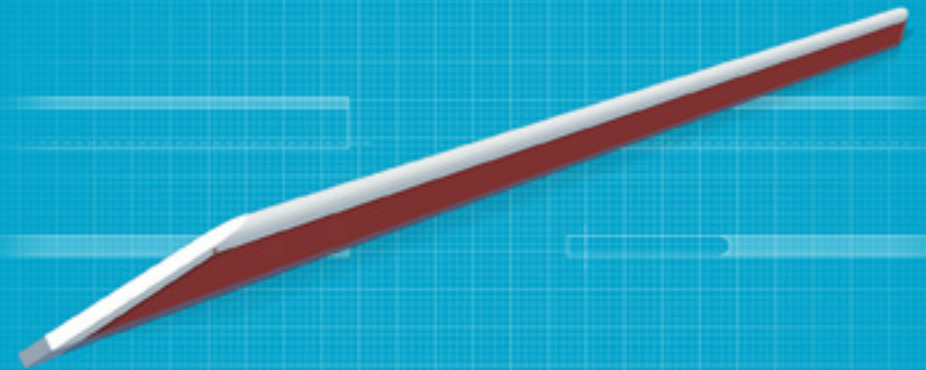

Perfectly **adapted for two-tower** wake parks, this pipe box comes with ride-on noses at both ends.

Pipe Box 90

SIZE L:1900 W:35 H:90 **LEVEL** Intermediate, Advanced

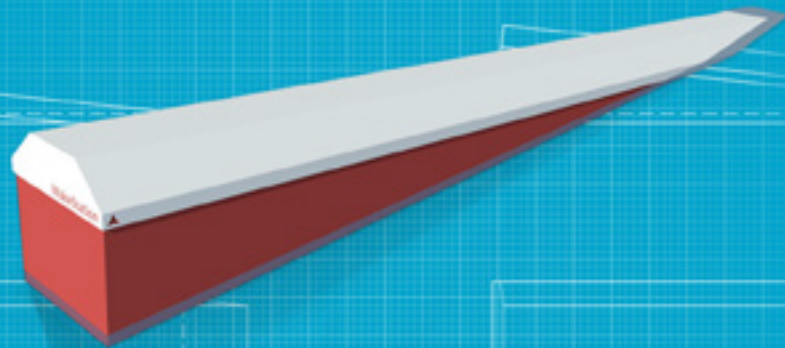

This pipe box stands **taller** than our other ones for that **added challenge**.

3D Incline

SIZE L:1000 W:100 H:110 **LEVEL** Intermediate, Advanced

We had to call this 3D!
Approaches **from all sides** and a nice drop off the end.

Fat Pipes

challenge everyone's
balance and control
in a friendly, fun way

Cable park Gribze, Lithuania

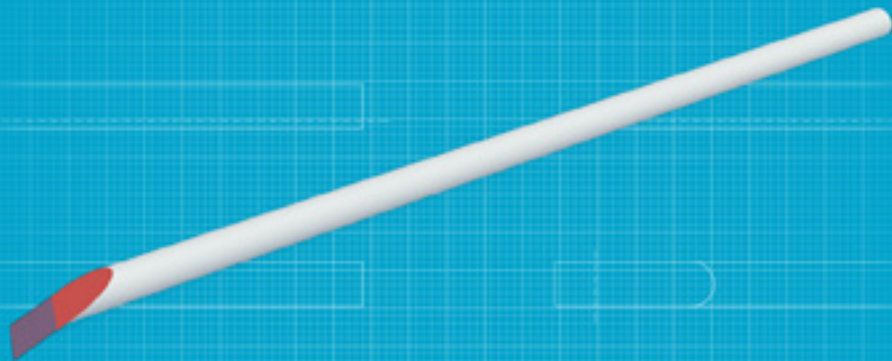

Fat Pipe I

SIZE L:2000 W:80 H:80

LEVEL Intermediate, Advanced

The thick, round shape gives multiple **safe approach** options.
An incline at one end makes it **accessible for beginners** to progress on.

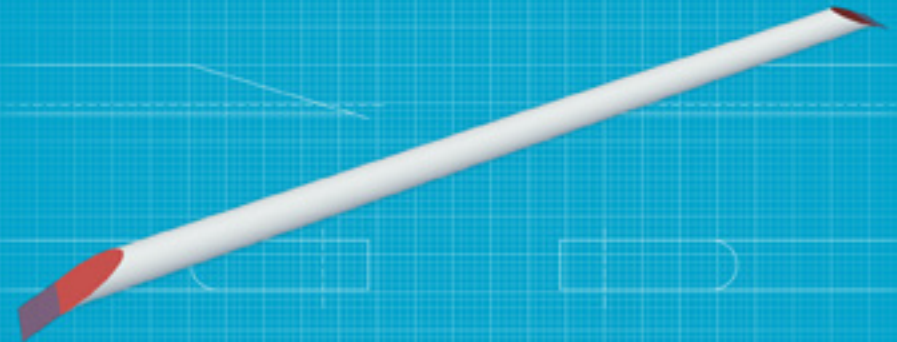

Fat Pipe II

SIZE L:2000 W:80 H:80

LEVEL Intermediate, Advanced

The **two-tower cousin** of the Fat Pipe I for a progressive wake park.

HANDRAILS

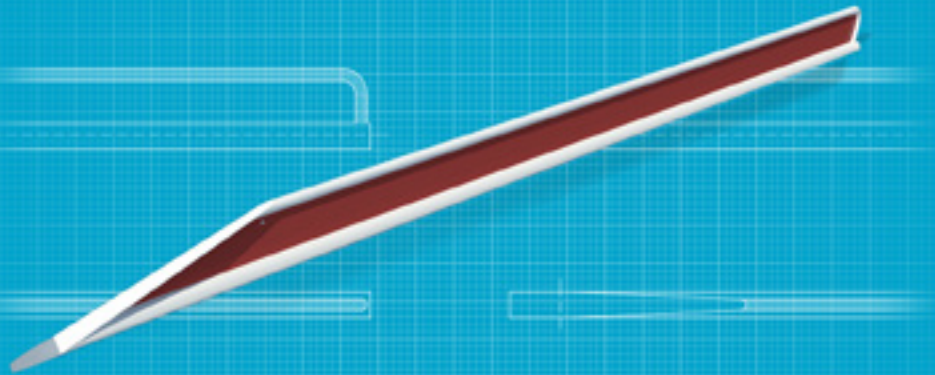

technical shapes taken
straight from the
urban environment

Rahinge Ekstreempark, Estonia
photographer Liidia Maier

Ride-on Handrail

SIZE L:1500 W:160 H:90 **LEVEL** Intermediate, Advanced

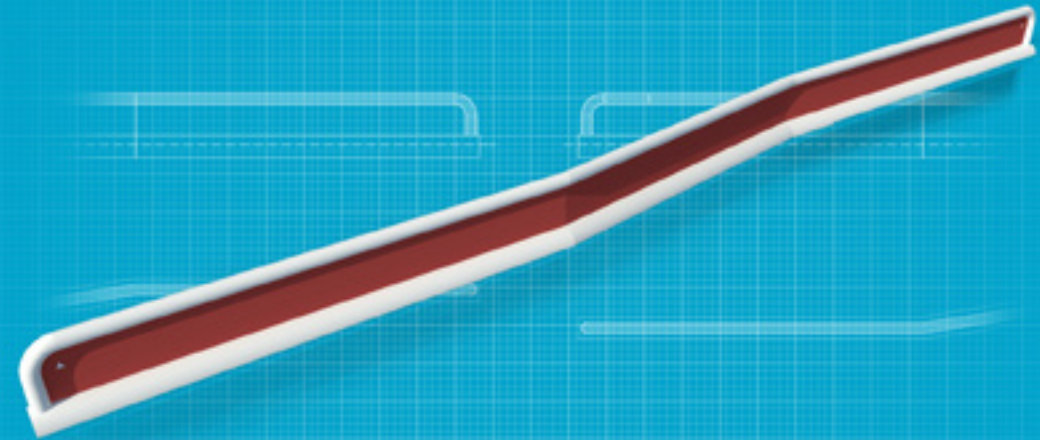

A thin, straight rail with a long nose, this feature is accessible **for more than just the pros.**

Snake Handrail

SIZE L:1500 W:1000 H:80 **LEVEL** Advanced

For the **urban style geeks**. The Snake Handrail tests every rider's balance and tech skills to the maximum.

Transfer
BOXES

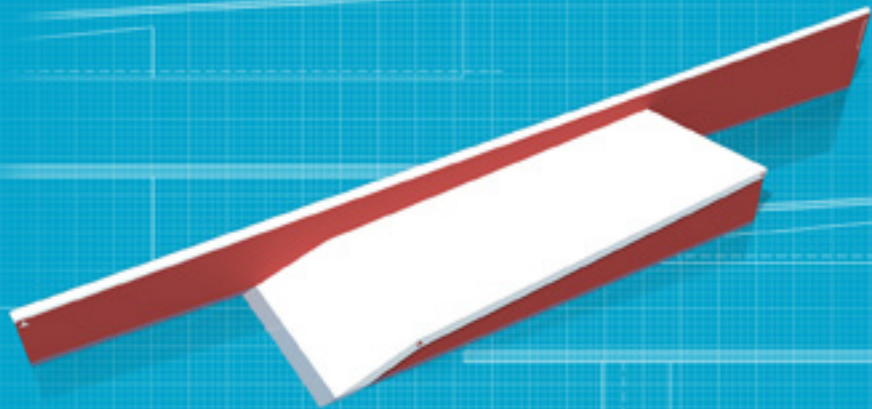

interesting shapes
with multiple accesses
and riding lines

Honor Wake Jam event, Finland
photographer Tomi Tähti

Handrail Funbox I

SIZE L:1200 W:205 H:130 **LEVEL** Intermediate, Advanced

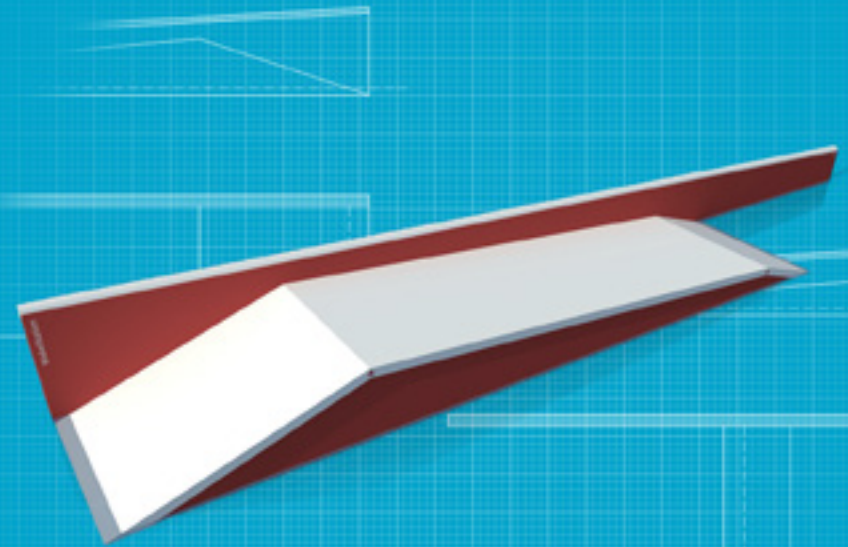

A simple funbox with a mellow up-ramp and challenging handrail. This multi-use feature sits **great in any park**.

Handrail Funbox II

SIZE L:1200 W:205 H:130 **LEVEL** Intermediate, Advanced

Approachable from both ends and **perfect for two-tower** wake parks, the Handrail Funbox II provides even more riding options.

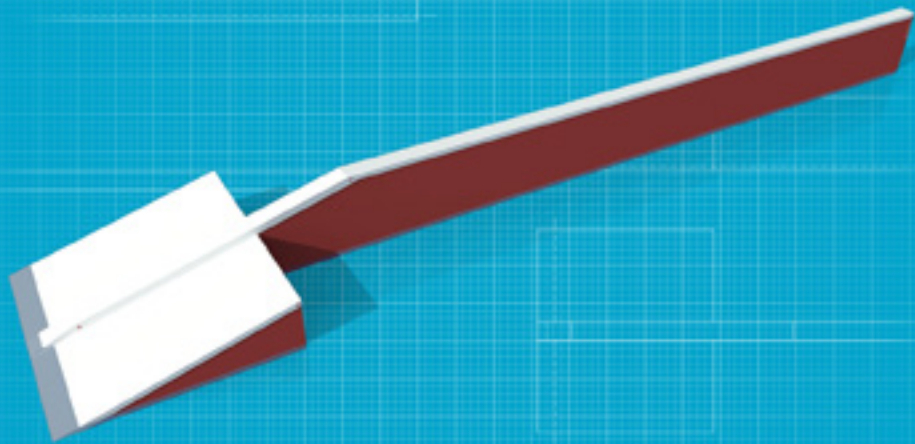

Ledge Transfer

SIZE L:2100 W:440 H:160 **LEVEL** Intermediate, Advanced

A wedge on each side of the rail gives the freedom to place this feature on the left or right side of the cable. An easy way to add **exciting variety** to a park.

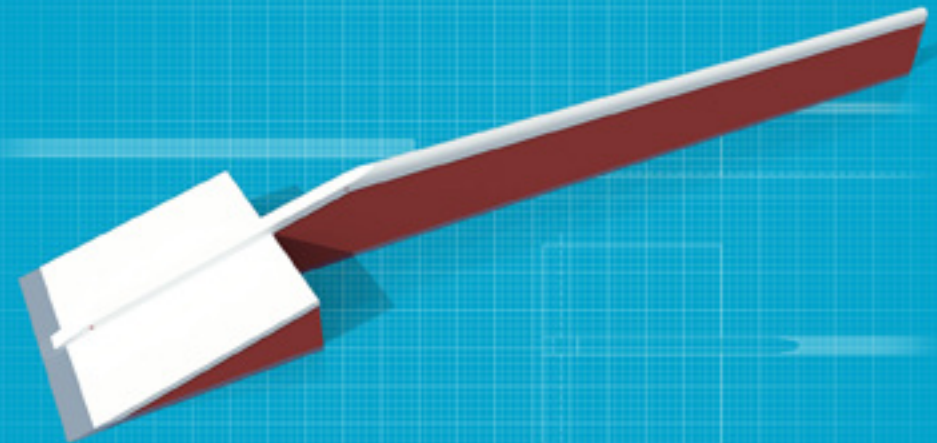

Pipe Transfer

SIZE L:2000 W:435 H:160 **LEVEL** Intermediate, Advanced

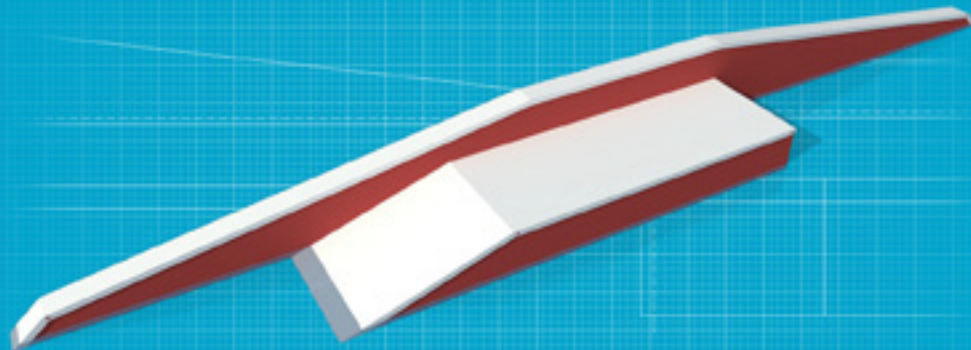

Similar to the Ledge Transfer but with a round pipe top requiring **practice and precision**, the Pipe Transfer is another easy addition to any wake park.

Funbox I

SIZE L:2000 W:240 H:150 **LEVEL** Intermediate, Advanced

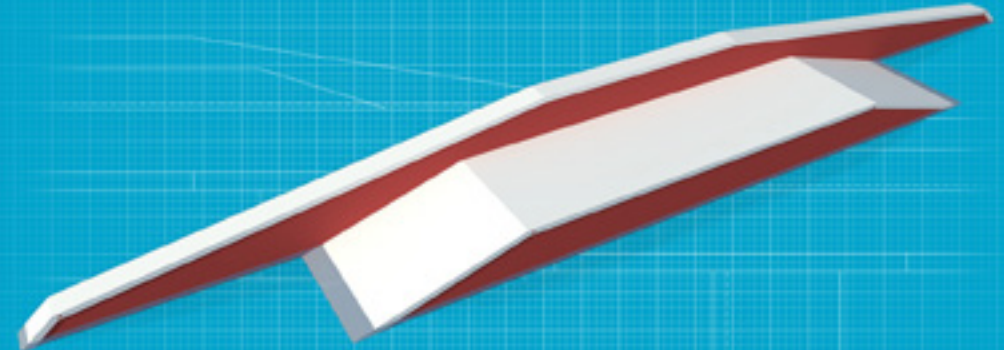

Our **most popular** transfer box shape offering numerous sliding and transfer options.

Funbox II

SIZE L:2000 W:240 H:150 **LEVEL** Intermediate, Advanced

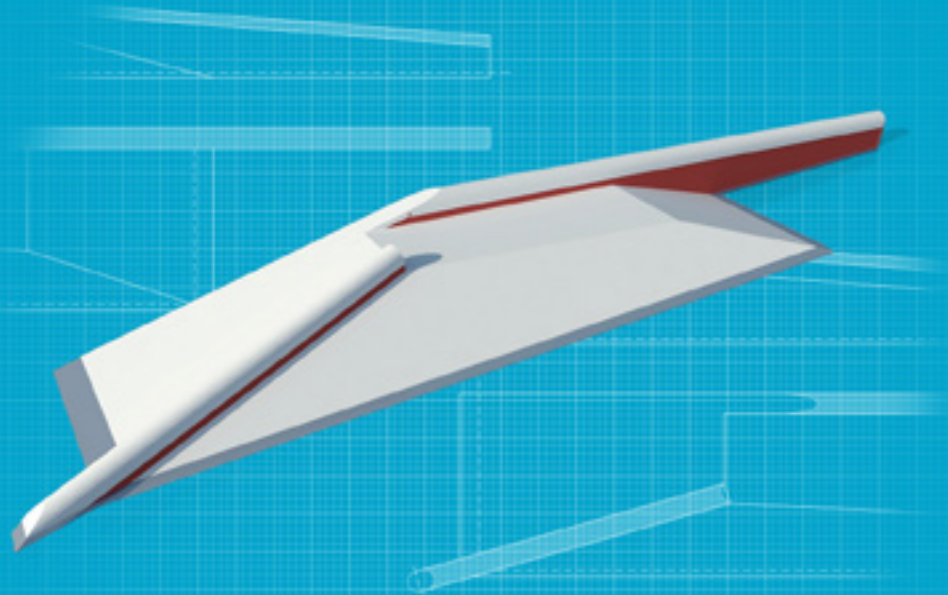

A traditional shape made **symmetrical to suit two-tower** wake parks.

Pipe-to-Pipe Transfer Box

SIZE L:1850 W:320 H:160 **LEVEL** Advanced

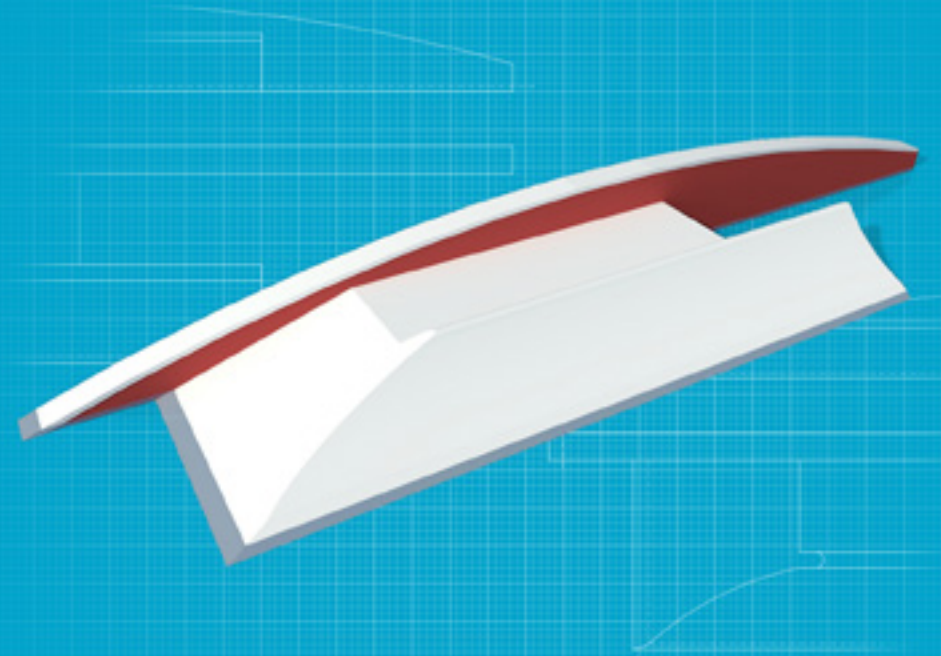

A transfer box with a sweet **pipe-to-pipe** option.
This line will **challenge** even the most skilled riders.

Rainbow Transfer Box

SIZE L:2100 W:470 H:190 **LEVEL** Intermediate, Advanced

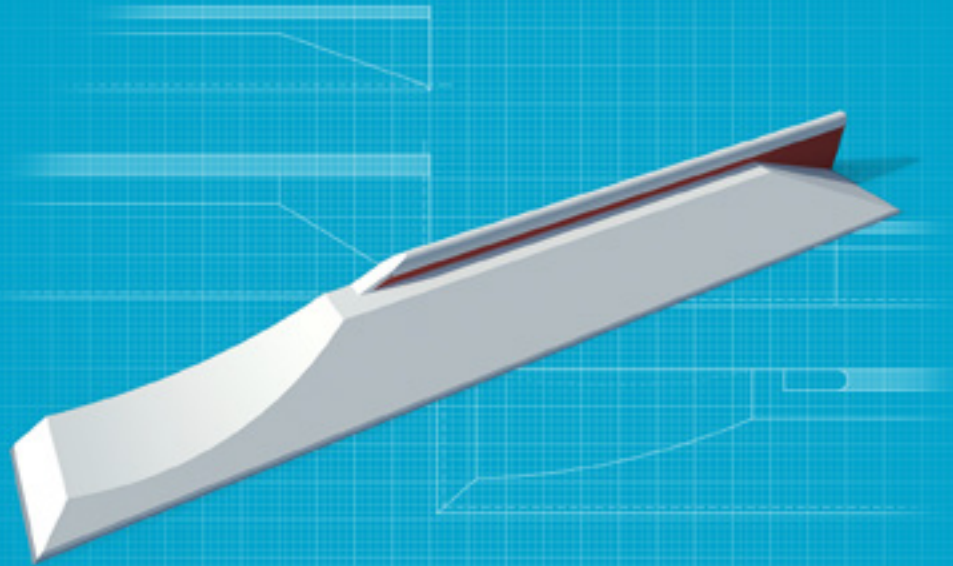

From the first, easy transfer attempts to the most technical lines and tricks,
this feature is fun in many ways and caters to a **variety of abilities**.

Bowl-to-Pipe Transfer Box

SIZE L:1900 W:250 H:145 **LEVEL** Intermediate, Advanced

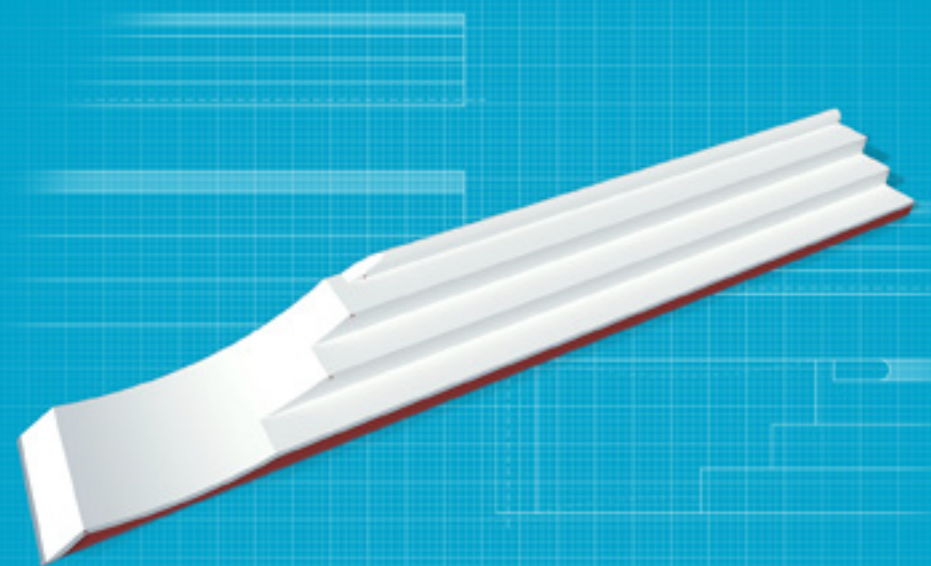

Our signature bowl surface offers a **smooth, natural transition** to a technical pipe rail.

Bowl-to-Pipe Pyramid Box

SIZE L:1900 W:265 H:160 **LEVEL** Intermediate, Advanced

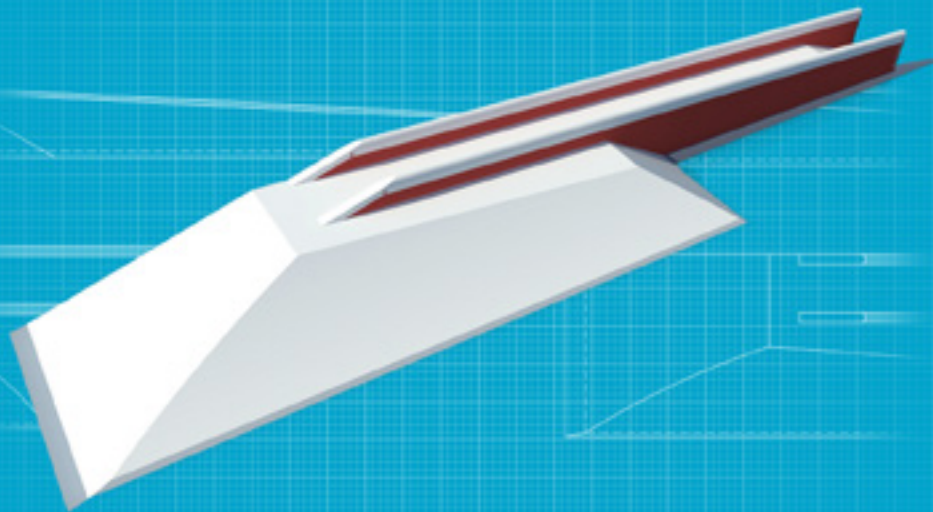

A **pyramid shape** with our bowl approach offers many riding lines for hopping or sliding up and down. The pipe on top gives the finishing touch to this must-have feature for **creative** parks and riders.

Banana Transfer Box

SIZE L:1700 W:300 H:130 **LEVEL** Intermediate, Advanced

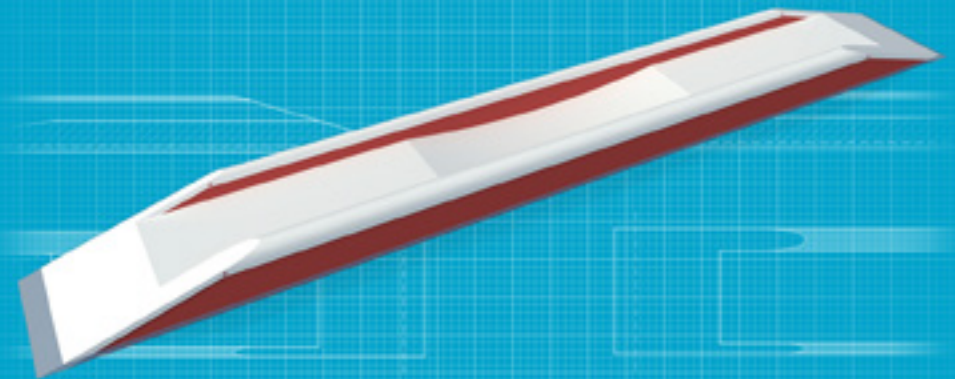

Go bananas with your wake park by putting in this transfer to sloping twin pipe rail. Plenty of **different ways** to explore this feature keeps riders coming back to it time after time.

Double Pipe Bowl Stage

SIZE L:1700 W:200 H:90 **LEVEL** Intermediate, Advanced

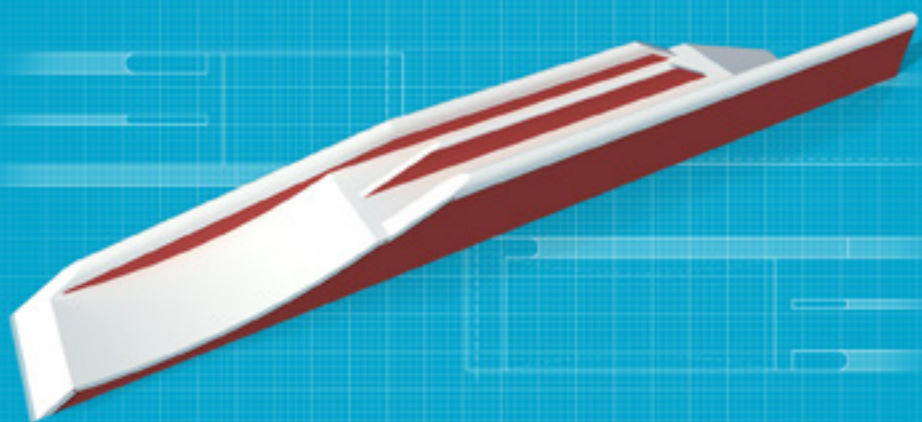

Two different diameter pipes with our signature bowl in between them. A **brilliant stage** for perfecting even the smallest of technical tweaks, while still allowing flowing slides. Suitable for any wake park.

Bowl-to-Triple Pipe Stage

SIZE L:2000 W:235 H:160 **LEVEL** Advanced

A shape with **more riding options** than a wakeboarder can dream of. Our signature bowl approach surface with three pipe rails positioned for extreme levels of ability and creativity. This feature **challenges** any rider year after year.

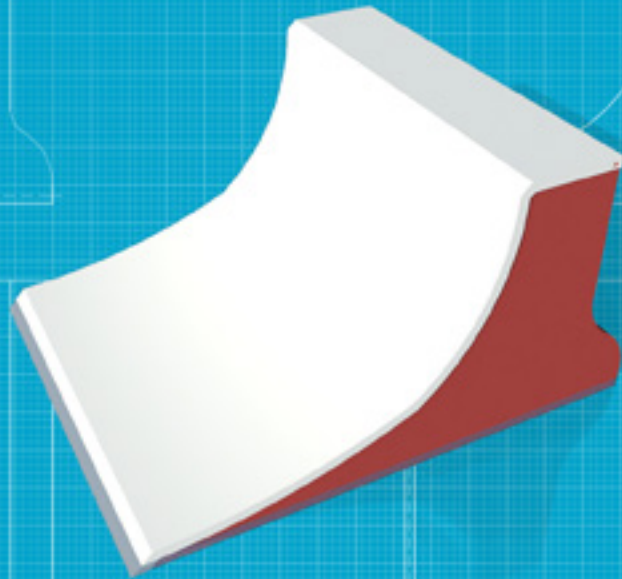

Wake the Stadium event, Finland
photographer Tomi Tähti

Quarter Pipe

SIZE L:450 W:400 H:240 **LEVEL** Beginner, Intermediate, Advanced

An alternative for cornering on a straight line cable, riding up and back down the Quarter Pipe is **tricky to master but easy and fun to try**. A popular choice for both permanent parks and temporary contests, the world has only seen the start of what is possible with a wakeboard on this feature.

Wake the Stadium event, Finland

Palanga Wakepark, Lithuania
photographer Tomas Jakovlevas

We founded WakeStation in 2011 because we weren't happy with the options available on the market when we started to build our own wake park. Our aim was to make the best two-tower, straight-line cable system for wakeboarding and snowboarding. We've since installed **75 cable systems** and have very satisfied customers in **17 countries**. Our vision is to be a leader in the industry by using the latest technology to keep improving the WakeStation system and features, year after year. We have partnered with Pentasi FSC, and together we cover the full spectrum of cable wakeboarding.

As all of our customers can tell you, our **personalized service is second to none**. Based on the setup of your wake park, we provide advice on everything from choosing the features to their ideal positioning.

We also provide **custom-made, bespoke features** to suit your requirements. Unique does not have to mean large or expensive. All of our features can be altered, whether by adding or removing a nose piece, a full box section or a change of dimensions. Our experienced and attentive design team will make your dream feature a reality!

*"Wakestation is NOT just a two-tower cable system — it is a provider of a lot of **unforgettable memories**. The fast and easy setting allows us to create events all over the country. The **pro riders love it...** and so do we."*

— **Robin Lecorvaisier, Festival International des Sports Extrêmes (FISE), France**

*"We are pleased to have five two-tower WakeStation systems. The system **works faultlessly**, is easy to maintain and, most of all, pleases our riders by providing good fun and the right tension for every trick. We also installed thirteen WakeStation obstacles that are smooth, well designed and **truly delicious** to ride on."*

— **Luis Segadaes, Wakeboard Portugal**

*"Wakestation obstacles have perfect proportions with the best material and **high build quality**. The obstacles have many fine details."*

— **Lars Bloksgaard, Herning Vandski & Wakeboard Klub, Denmark**

*"WakeStation obstacles are **strikingly cool** to watch, as well as an incredibly good ride!"*

— **Timo Piippo, FlowFun OY, Finland**

*"We have the WakeStation obstacles, which we are super satisfied with. They look nice, are easy to assemble and feel **safe to ride** on for beginners and advanced riders."*

— **Henning Jorlén, Malmö Wake Park, Sweden**
