### Welcome to the web based Green Procurement Report (GPR)

Changes to environmental legislation have resulted in an increased emphasis on the procurement of environmentally preferred products. The Green Procurement Report (GPR) can be used by military services and Federal Agencies to track environmentally friendly purchases and provide required data input to pollution prevention reports (i.e., RCRA6002). The GPR provides visibility of green procurements from the stock system of Defense Logistics Agency (DLA) and the General Services Administration (GSA). Each authorized GPR User can customize their report and display the results by Service/Agency, DODAAC (DOD Activity Address Code) and Environmental Attribute Code (ENAC). The GPR pulls information from ERLS to compile the reports.
