# DECK JETS & AERATORS

Introducing our new, fully machined, billet brass Aerators and Deck Jets. Whether you're crafting a remodel, new-build, or maintaining the delicate balance of pool water, our solid brass aerators will serve as a solution to breaking and discoloration of plastic aerators while reflecting the time and effort that goes into every detail of a finished product. Our Deck Jet features an adjustable inner delrin nozzle and flush mounted deck cap to ensure your outdoor design maintains its carefully crafted look.

PERSONALIZED FIRE PIT

# PERSONALIZED FIRE PITS

The personalized fire pit is constructed of steel or stainless steel that will not warp from the heat. Our matching metal covers make it easy to convert the fire pit into a table when not in use, and the grill attachment allows you to cook over an open flame.

**MATERIALS AVAILABLE:**

*Cor-ten steel will naturally weather and may cause discoloration on some surfaces.*

- Ways to personalize:
- o Personal Name
  - o Special Date
  - o Hotel Name
  - o Saying or Quote
  - o Sports Team
  - o Logo
  - o Company Name
  - o Custom Design

- Three fire options:
- o Wood Burning
  - o Manual Key Valve
  - o Electronic Ignition

Sizes:  
28" & 48"

Materials:  
1/4" Thick Stainless Steel  
1/4" Thick Steel

# GRASS EDGE

Our Vanishing Edge pool system allows for the grass in a landscape to run right up to the edge of any pool. The angled stainless steel edge of the pool kit creates an extremely sleek and smooth transition between the two elements of grass and water. The stainless steel system, which combined with a hidden overflow gutter system buried beneath the grass, creates a thin dividing line between the pool and the surrounding landscaping. In other words, the only visible divider between the water's surface and the grass edge is a thin sliver of marine grade steel capped with a small rubber tip for both safety and customer comfort. Our sleek system can be used with natural or artificial grass.

## PRODUCT DETAILS:

- Constructed of 316L Stainless Steel
- Engineered using 1/4" thick metal
- Custom rubber tip prevents stainless steel exposure
- Can be made straight or to fit any radius
- Sold in 1' increments, any length
- Proudly engineered / designed / manufactured in the USA
- Patent Pending

The Grass Edge is a collaboration between Bobé Water & Fire Features and Brian Van Bower of Aquatic Consultants Inc.
