All of My Most Closely-Guarded Trading Secrets Will Be Revealed in a RARE TELL-ALL Investing Secrets Boot Camp Seminar!

9 SEATS LEFT!

I Have ~~24~~ Spots Left and THAT'S IT! Are You SERIOUS About Becoming a Full-Time Trader? If You Are then You WILL Be After You Get Through Our 24-Hour Kick-Ass Tell-All Investing Secrets Bootcamp Seminar!

Dear Trader,

If you're not signed up for the Investing Secrets Bootcamp Seminar Event yet then SHAME ON YOU! I'm getting concerned and let me tell you why...

When you first became immersed in the *The Slice System*, I was under the impression that you really wanted to get good at trading the markets. I thought you wanted to make a fortune trading ETFs. You really seemed gung-ho about it. So, what happened?

Let me share a very real scenario about how your life can change in just 90 days using these trading strategies...

Imagine kicking back at home, looking at charts for a short time, placing a trade or two online, *and then taking the rest of the day off*. Is this realistic? Absolutely. In fact, there is no other "business" out there that can provide that same kind of freedom. By trading for a living, you can even move to France and, as long as you have access to charts, current market activity, and a telephone (or computer for online trades), you can live your life on the French Riviera with all the other wealthy and elite entrepreneurs and investors.

There is NO other way to make a fortune other than having a business and/or investing. Yes, there are other ways like winning the lottery, inventing the next thingy-majig, or writing the next best-seller about your dog, Moe, but...waiting for one of those ways to become rich is like waiting for lightning to strike the center of your head. Yes, it's possible but, it's better to do something else... to focus on something that's a little more "guaranteed."

The Only FREEDOM Business I Found Was Trading the Markets!

I discovered that there really IS a way to sit by the pool all day and drink little alcoholic umbrella drinks with *two small additions*...I had to have my laptop and with an internet connection so I could look at charts and place trades online. Some may argue that I could get up earlier, do my charting, place my trades, and THEN sit out by the pool and relax. Getting up too early is NOT my cup of tea and opening my eyes before 6am will never happen (unless there's a fire in my house).

TURN THE PAGE AND KEEP READING!

I've made a fortune trading the markets but, more importantly, I've shown others how to make their own fortunes too. In the past I have done training sessions with my students showing them the mechanics of *The Slice* and during these they've had some staggering profits that I'm ecstatic to report to you. Here are some real numbers:

- \$37,544 in four months with a short position in the SPY...
- \$14,810 in two months with a long position in the QQQ...
- \$23,330 in two months with a call option in the IEFA...
- \$6,828 in six weeks with two put options in the SPY...
- \$12,454 in two months with a long position in the VTI...
- \$31,875 in three months with a long position in the IWM...
- \$63,492 in two months with a long position in the GLD...
- \$9,274 in two months with three put options in the VEA...
- \$14,520 in six weeks with three call options the QQQ...
- \$3,784 in nine weeks with two put options the SPY...
- \$6,925 in three months with a long position in the VWO...
- \$2,695 in one month with one call option in the GLD...
- \$4,435 in one month with a long position in the DLS...
- \$11,672 in five months with a long position in the TAO...

And one gentleman gave me some mind-blowing news by saying this:

“I had the unfortunate experience by trying [BLANK]’s course and lost over \$40,000 but since working with *The Slice*, I’ve been able to profit over \$23,000 in about ten weeks. I’m very grateful for your strategies. I’m just sorry that I didn’t find your system first...”^{oo}

Or how about how Bill K. in Biloxi, MS said:

“I started with a \$3,500 margin account less than six months ago. Now my account is at \$56,400.” And when asking Bill about what he traded in to make all of that money he said: “The QQQ and SPY mostly. I traded a few iShares but I really made a killing in the QQQ and SPY markets.”

Sure, Students Have Made a TON of Money in Trades So Far... But What Are the Markets that are About to Make BIG MOVES in the Near Future?

Success stories are inspiring...But let's find out how you can profit from some BIG market moves that are about to take place...And you definitely DO NOT want to miss out!

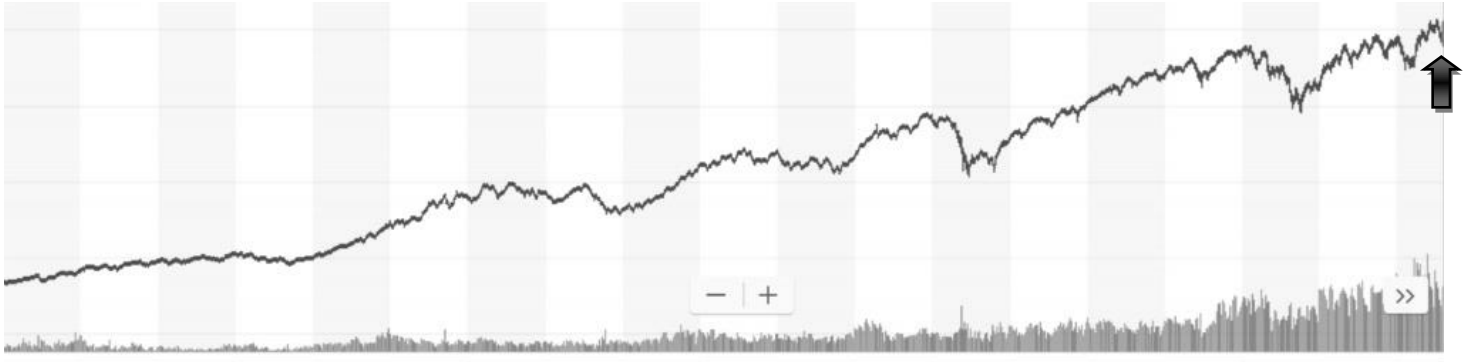

Certain international markets are about to take a nosedive and you can stand to profit five- or six-figures depending on your trading strategy. You NEED to have a specific TRADING PLAN in place to profit effectively from these markets. And I'll show you which metal markets are about to allow you maximum profit opportunities and how to trade them for maximum profitability!

And, as you know, the S&P 500 market has already been making some big moves and has been for a short time. Does that mean you missed out? *Hell no!* Remember, what goes up, must come down! And what goes down, must come up! Most times the ride down is much easier (and quicker) than the ride up, allowing for faster and bigger profits. However, certain trading strategies also apply to other financial markets as well and you DON'T want to miss out on this opportunity! If you miss out, it could cost you six- or even seven-figures! (*Quite seriously!*)

Take a look at this historic chart for the S&P 500 on the next page...

^{oo} We have elected to blank out the name of the trading "guru" who our student had referred to because, although a lot of money was lost, we still don't believe in berating others for our potential gain. In addition, although we truly believe that trading strategy and technique will make or break the profitability of a trader, there is still risk in trading the markets. Our job is to help minimize that risk and maximize your gain by using unique trading strategies. Remember that there is a substantial risk of loss in trading the markets.

The market looks kind of high. That's because it IS high. And this is our classic and most basic patterning we always look at when first looking at a new market. Where is it NOW in comparison to years past. And, as you can see, it's trading REALLY HIGH. Remember, what goes up (and what IS up), MUST COME DOWN, even if it's only a short-term fall. A put option will run you a couple hundred bucks but could yield you thousands per option you buy! A put position is when you expect the market to fall. Taking an option stance allows you the "protection" of the market moving against you with a max loss of what you bought the option for. The potential gain is massive when the market moves in your favor. (I always recommend new traders start with options.)

So, here's a strategy that you could potentially use. You could potentially take a long position when buying a SPY ETF but, to best leverage yourself against loss, you can straddle your position with put options. This way if the market moves against you, you can take jump in on a short position after getting stopped out on your long position. The point is: you have to know the right trading strategies to get the most out ANY of these markets because if you trade them correctly, you can stand to make as much as \$1,000,000 or more which I'll show you how!

Two Gold ETF markets are on the verge of taking off and, being that these markets are very tricky, you definitely need to know how to trade these markets for maximum profitability. In fact, if you don't know the secrets to these markets, you shouldn't trade them. And if you know how to work these markets, you stand to gain six-figures easily and I'll show you how to do it!

Several emerging markets are already going through some major tumultuousness and you stand to make five-figures in *each one but only if you know which precise markets*. You also need to know how to trade them in accordance to their individual market personalities. There are three of these equity markets alone where you can stand to make six-figures *in each direction (long and short)*, but only IF you know which markets and how to trade them which I'll show you.

And finally, there's a secret to seasonality trends in certain ETF markets. If you learn how to trade this one seasonal group of markets with the secret elements of trading, you can make a five- to six-figure a year income, just from this one small group! The trick? Learning just a few easy seasonal secrets that can make you a steady income forever...but only if you know the secrets which I'll reveal to you!

Can You Afford NOT to Know These Secret Trading Strategies?

If you're not where you want to be as a trader, then you can't afford to miss out on learning these special trading strategies. If you're not pulling a consistent five-figure income each month, then you're missing the boat somehow.

I've profited millions of dollars over the past several years by using these exact trading strategies that I'm about to show you. *In fact...*

I'm Going to Show You in 2 Days What it Took Me an Entire Lifetime to Learn...

My first trading experience wasn't a great one. I lost almost \$3,000 in mere hours it seemed. It caused me to take a step back and re-evaluate the situation and by getting back to my root teachings that came from my grandfather, Bobby B.

To make a long story short, once I got back to the basics (instead of allowing these other slick useless trading strategies to distract me), I got really good at using specific geometrical patterns to forecast the market. This is the exact trading

strategy that I learned from my grandfather and the one I use in my own trading today. And ever since I decided to focus on the REAL secrets of trading, I've been consistently profiting on an average of 90% of my trades; pulling in hundreds of millions of dollars to date!

The Two-Day, 24-Hour Power-Intensive Investing Secrets Bootcamp Seminar Event...

I'm going to show you, top to bottom, exactly how to work the markets and how to make money...*real money*...the green kind that's going to be deposited into your margin account for your successful trading!

We're also going to have some industry professionals come in and get down to the nitty-gritty about placing trades, how to trade online, how to get the best deals on commissions, and how to quickly set up an account for trading (if you don't already have one). They'll explain some of the hard-core technical issues about trading that a lot of novice (and even advanced) traders don't know but were afraid to ask. This is an absolute must-see!

On a personal note: Since I've been ill for awhile now, I will likely not be able to speak at the podium during the event. But, God willing, I will be there. Otherwise, I will have only the *crème-de-la-crème* showing my you my precise trading strategies step by step. These are people who learned it directly from me and they'll be showing you how this all works.

However, I've just got the okay from a very special guest who, as I promised him, would remain a secret until the seminar. This man is a trading pro and is oozing out the ears with trading secrets! He'll be there and you can even corner him during the breaks where he'll probably dish out a few personal market picks to you right then and there. Just promise me that you won't let his advice go in one ear and out the other because he's a walking Yoda when it comes to trading knowledge!

And, we're also going to have a special guest speaker who's been trading for many years who's going to go into detail about how to profit in the markets, how to become a full-time trader, which markets to trade, which markets to avoid, and how to use special trading strategies to become a multi-millionaire!

We're going to have so much fun and I can't wait to meet you. I've been fortunate enough to come across some powerful information – thanks to my grandfather – and so far I've been able to share it with so many who have greatly benefited from it. I'm looking forward to sharing what I know with you and helping you change your life too.

I know you are hesitant, as I'm sure you've dumped thousands of dollars down the drain on books, courses, and seminars...but, this is different. You are going to be scouring my brain and learning every detail about how I trade and how you can use the same techniques to trade too.

KEEP READING...

Once you learn the techniques, it's like falling off a log. A lot of traders want to take the easy route and let a broker handle their trades. **WRONG!** If you're going that route then park your money in a CD instead. Every profession requires training. If you're a doctor, you've gone to school. If you're a mechanic, you've gone to school or trained on the job. If you're a teacher, you've gone to school...Need I go on? So why do people who want to trade just jump in the market without any schooling or training? Sounds ridiculous, right?

This is your school. This is your training. You need schooling and training to learn how to effectively and profitably trade the markets. Without the proper training, trading the markets would be equivalent to standing at a roulette table in Las Vegas! Yet so many people do it! WHY?

If you want, more than anything, to become a full-time trader – work at home and play most of each day, afford anything you ever needed or wanted – you have to learn **EVERYTHING** there is to know about trading the markets successfully! Everything! I'm going to show you everything at the next bootcamp seminar event!

If you have any questions, call my office at (661) 295-5050. You can speak to either Ana, Holly, Jennifer, Monica or myself if you request and if I'm immediately available. We're here between 9am and 5pm Pacific Time and we can answer any question you have about this upcoming seminar event. Or you can register right now at www.TradeTheSlice.com/Bootcamp.

This moment is one of those crossroads...It's one of those moments that we later look upon as "life changing." Please don't let it pass by...I'm looking forward to meeting you soon.

Sincerely,

Dr. Peter Barrington
Millionaire Trader and Investor

P.S. If you don't like the seminar by lunch on the first day you're there, you can leave the event and get a FULL REFUND. This makes this offer RISK FREE which gives you NO EXCUSE not to come to this mind-blowing, power-packed event!

IMPORTANT DISCLOSURE TO READ BEFORE REGISTERING FOR THIS EVENT:

Many of you know that my health has been suffering for the past couple of years. Because of this, there is a strong chance that I won't be able to personally make it to this event because of the required travel arrangements that surround my illness. In light of this, I will 100% guarantee that everyone who participates in showing you how to trade will be using **ONLY MY TRADING STRATEGIES** as learned from me PLUS additional successful strategies that will give you the ultimate marketing edge. I would never have anyone other than a student or professional who uses **MY TRADING STRATEGIES** plus other top strategies to teach an event. So, the core of what you'll receive, likely, will be **BETTER** than what I could personally provide due to my health.

However, if the only reason you want to attend is to see an old man in a wheelchair with an oxygen tank, I suggest that you (1) reanalyze your priorities in life and find something much better to want to look at, and (2) you're not really in this for making money but rather you want to be a fan boy (or girl). And that means you're in this for the wrong reasons so really learning the craft of lucrative trading probably isn't in the cards for you. Admit it while you're ahead and don't sign up.

Please note that I will make *every attempt* to be there. But if I'm not, please know that you'll be in good hands and the event you do attend will be much better than if I'm trying to teach with all of my illness issues. Thank you for your understanding. :-)

WHAT TO EXPECT ON EACH DAY OF MY UPCOMING BOOTCAMP SEMINAR:

Day 1 (September 13th): Basic and Intermediate Investing Secrets. Everyone will be brought up to full speed on EXACTLY how it all works from what markets to trade (and why) and how to use geometric angles for market forecasting. We'll quickly bring everyone from the basics through intermediate trading strategies in a fun and interactive way. If you've never had the time to learn to trade, this is definitely the day that will show you everything!

Day 2 (September 14th): Advanced Investing Secrets and the Most Unusual Investing Secret Revealed. On the second day, you'll be shown my most advanced strategies including *The Slice*. Many people don't know that there are several angles for *The Slice* (and not just one). ALL of these angles will be revealed on this second day. Also, you'll be shown the Most Unusual Investing Secret that is definitely something to add to your portfolio ASAP!

Day 3 (September 15th) Hands-On Investing Workshop (Day 3, for Platinum VIP ONLY): One-on-One Hands-On Investing Workshop. This is, quite possibly, the most important of all 3 days. This is because we'll be taking actual charts and drawing the geometric patterns on them using every unique angle and pattern you need to know. You'll be drawing and angling these patterns as many times as it takes so it permanently sinks into your brain.

PLUS... a SPECIAL BONUS For PLATINUM VIP Full-Pay Students ONLY...

Day 4 (September 16th): Basic Flip It Profit Real Estate Investing Secrets with Monica Main. My long-time colleague and business partner will conduct a VERY RARE 2-day real estate investing event. On this first day, expect to get a "crash course" on how to REALLY flip real estate for a profit. (Semi-spoiler alert: Her secret is NOTHING like you'll ever find out through those late-night infomercial "gurus" or from anybody else who claims to make money in real estate through flipping.) This first day includes information on how to get started in the business and how to never touch a hammer or nail to flip property since you can make money as a "professional finder" by finding properties for her investment company and investor network to get referral fees for the profitable deals you find!

Day 5 (September 17th): Advanced Flip it Profit Real Estate Investing Secrets with Monica Main. On the second day of Monica's Flip It Profit Bootcamp Seminar, she'll reveal how to flip properties if you really want to amp up the amount of money you want to make in real estate. The key is that you can make more money flipping duplexes, triplexes, and fourplexes instead of SFRs (single-family homes) like most flipper "gurus" will teach. She can show you how to flip anything from a studio condo unit to a small apartment building for BIG MONEY. She'll ALSO show you how to get up to \$450,000 in UNSECURED CASH from her exclusive money source so you can flip these properties without using your own money. Remember, her money source is EXCLUSIVE to her students ONLY so you don't want to miss out on getting access to this money source which is the KEY to becoming successful as a real estate flipper.
