

Weaverham High School French Department

Schemes of Home Learning – Year 7

Vision and Intent: In the French Department, our schemes of home learning are based around the following principles;

- To consolidate and reinforce prior learning and to prepare for future learning.
- To develop organisation, independence and a pupil driven approach to learning.
- To develop effective 'learning for linear' strategies, including retrieval, revision and memory techniques.
- To develop academic and technical language, specific to our subject area, therefore enabling complex thinking.

Implementation: In the French Department, our schemes of home learning will be planned and delivered around the following principles;

- To support and extend the high quality learning taking place in all lessons in the French Department.
- To offer consistency for all pupils, ensuring that all pupils have access to the same high quality experience of learning beyond the classroom.
- To offer a differentiated experience of home learning, with greater stretch and challenge available where required as well as greater support if needed.

Impact: In the French Department, our schemes of home learning will have the following impact upon learning in our department;

- To support effective outcomes for all our learners and contribute to progress in learning.
- To develop key learning skills, applicable to our subject area, but also transferable to all areas of the curriculum.
- To inspire and nurture a love of learning that goes beyond the confines of the classroom.

Overview / Unit: Year 7 French (Studio Accès)
