Architectural Glass Systems

Excellency in
Aluminum Glazing Facade Systems
Designers & Fabricators Of
Aluminium Glazing Façade Systems

WELCOME TO ARNAV ARCHITECTURAL GLASS SYSTEM

We are pleased to introduce ourselves as one of leading quality fabricator for Architectural Aluminum Systems Via, Doors, Windows, Upvc windows, Partitions, Curtain Walls, Structural Glazing, Spider Glazing, Aluminum composite panel wall Cladding systems etc. Our Company has been in this field for more than 10 years and have carried out several prestigious projects in Maharashtra (including Mumbai),Gujrat, Raipur, Bangalore, Goa etc. with the entire satisfaction of our client and with proper time schedule.

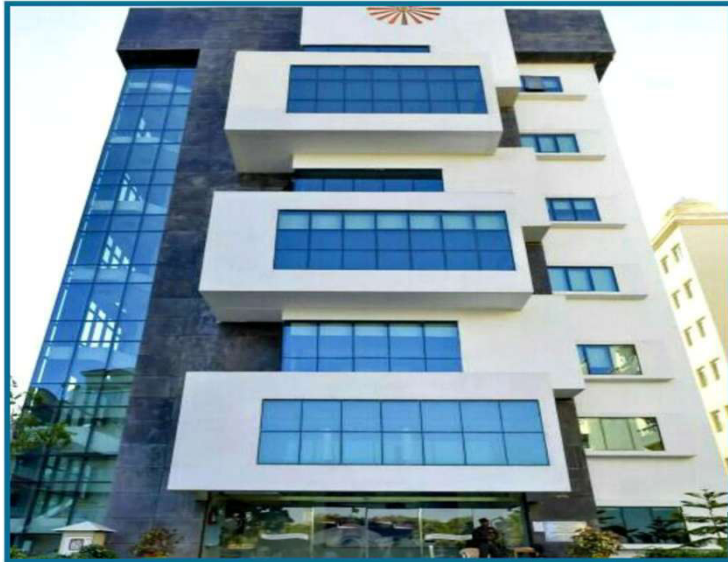

INTRODUCTION

It take great pleasure in introducing ourselves as one of the leading Fabricator in Aluminum Sliding Windows, Doors and partition, Since Last 10 Years. We started initially with fabrication of Aluminum Windows, Doors and Partition and four year ago with the work of structural Glazing, Aluminum Composite Panel Cladding, S. S. Railings, M.S. Structure Fabrication, Turnkey contracts for many well established Builders, Multinational Companies, Retail outlets etc.

It will not be out of place to mention here that all our projects have been Executed on time with an accent on quality with total commitment . In a remarkably span of time we have become a company to be reckoned with, because of our dedicated work and attention to the execution, our impeccable quality and our innovative ability. We always vouch for the quality and looks of our work.

It is no surprise to us and we are proud to add that we are well received in the market and a fast growing contracting company at this moment. We have on our rolls experienced engineers and skilled staff to carry out the work perfectly to the clients and consultants taste and satisfaction. Needless to mention that our technical team has good man-management qualities and good command over the workers to get the job done in time with proper finish. We believe in a proper channel of communication and keep in regular Contact with the client and consultant from time to time as required for the effective results and execution of the project. Each one of our Projects is handled by one full time qualified person with Project Manager and coordinated by one of our Director.

We believe that the only path to success is through team work and dedication. This progressive way of looking at the company has inspired the activities of the people who are the heart of the company. Whether it technical personnel or other staff, every member of our company is sincere, loyal and dedicated. We all realize that this attitude is beneficial to the company as well as every individual of the team. Being in the company's spirit, we are continually looking for new challenges and activities that test our skills. All our project personnel are well trained and highly experienced and personally attentive to the needs.

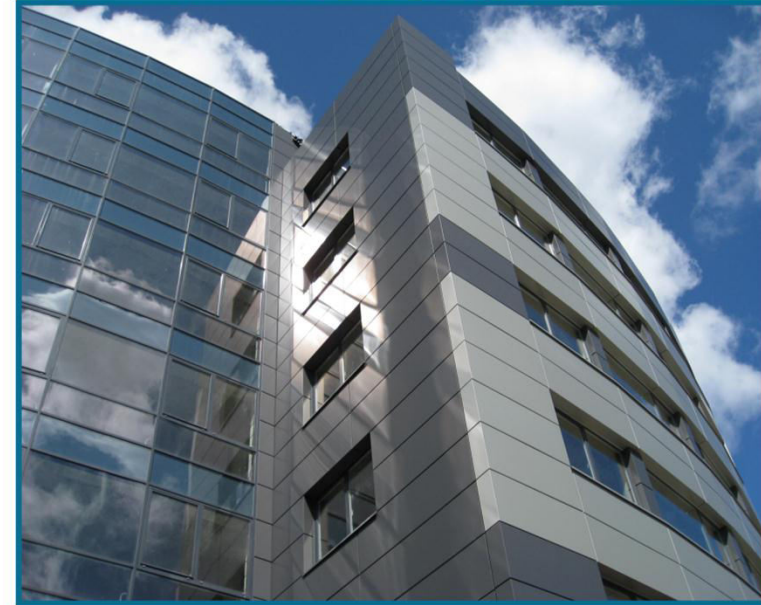

STRUCTURAL GLAZING

Structural Glazing systems incorporating spacers and adhesives are now widely accepted glazing option and are used in a growing share of curtain wall, window and storefront installations. In fact, many people have come to regard structural glazing as the superior method of glazing. When properly installed, the structural sealant forms a continuous, waterproof seal against leakage and air infiltration. The sealant and spacer transmit wind load movement to the structure and withstand flexure, tension, compression and differential thermal shear stresses. Silicone resists UV, ozone and other environmental exposures and does not take on a compression set or lose resiliency. While structural sealants generally carry a 20 year of exposure still demonstrate elasticity, adhesion and strength.

Aluminum Composite Panel

We are engaged in trading and supplying a wide range of Aluminum Composite Panels. Clients can avail these panels in various colors, designs and styles as per their requirements. Moreover, owing to their easy maintenance, accurate dimensions, corrosion resistance and durable finish, these panels are widely used commercial buildings like shopping malls, factories and hospitals. Moreover, the panels offered by us are tested on various parameters to ensure their adherence with set industry.

Aluminum Doors & windows

Aluminum doors and window are offered by us to the customers in a wide variety and they consist of innovative designs and they require very low level of maintenance. The product is made using high quality of raw materials and they can be customized as per the specifications of the clients. These windows are available in a variety of patterns, shapes and sizes; we carry out strict quality checks on the aluminum doors and windows to ensure that they fulfill the quality parameters

Spider Glazing / Canopy

We are providing the best solutions with Spider Glazing in the Industry by maintaining high quality standards for products as well implementation. With changing technologies and market requirements the Glass Curtain Walls and Glass Structures are finding new heights in terms of glazing. We provide the best services with the above technology with great quality and maintaining High Standards.

Glass & S.S. Railing

Railing Systems are designed to meet and exceed the strictest building code requirement and support a wide range of infill panels. Glass, metal, and stainless steel bars are just a few examples. These innovative systems are designed and fabricated to order based on your requirements. produce your next custom fabricated welded railing system.

Glass Patch Fitting Door

We provide Patch Fitting Doors to meet the demand of durable aluminum fittings, with quality and great finishing.

UPVC Window & Doors

Our Range- UPVC windows offer a MS, hospitals, range of outward-opening casement, sliding, French door and inward-opening windows and doors for homes, office, apartments, condominiums, hospitals, factories, hotels and most other built environments. All of our UPVC windows are manufactured to individual specifications, depending on the application. Almost limitless windows designs are possible, including the artistic use of angles, arches and circular shapes. :

Arnav Architectural Glass System gives vast range of hygienic and technical benefits

- ❖ Compound ventilation mode – Natural draught and mechanical ventilation can alternatively operate under different conditions.
- ❖ Best system structure.
- ❖ Heat/cool preservation property.
- ❖ Sound insulation property.
- ❖ Natural and forced ventilation system.
- ❖ Inner curtain wall.
- ❖ Sun shading device.
- ❖ The design idea is to save energy and enrich environmental protection by providing most healthy working and living environment.
- ❖ Beautiful exterior effect.
- ❖ Heat insulation effect in summer and winter.
- ❖ Better shading system.

We are specialized in the fabrication and installation of the following Architectural products:

❖ Heat/cool preservation prop Cladding Systems

- Aluminum Composite Panel Cladding
- Aluminum Solid Sheet cladding
- Dry Stone Cladding
- S.S Column Cladding
- Perforated Metal Cladding
- Funder Max Cladding

❖ G-Clad structural glass cable and tension structures

- ❖ **Frameless shop front**
- Bolted (Spider fitted) Glass Assembly
- Suspended (Patch fitted) Glass Assembly
- ❖ **Skylights, domes and roof light**

❖ Curtain Walling Systems

- Semi Unitized Curtain Wall Glazing
- Curtain Wall Glazing
- Toggle Glazing
- Tension Rod Spider Glazing System
- Canopies And Skylight
- Spider Glazing

❖ Frameless Partition & Door

- Aluminum & G.I.Louvers
- All Types S.S & Glass Railings

❑ Aluminum Doors & windows

- All Types Sliding Window System
- All Types Casement Window System

❑ Pharma Industry

- Aluminum & G.I.Flush Partition
- Aluminum & G.I.Flush Door
- Double Glazing Window
