

The Kreg logo features the word "Kreg" in a bold, blue, italicized sans-serif font. A red swoosh underline starts under the "K", goes under the "r", and loops around the "g". A registered trademark symbol (®) is located at the end of the swoosh.

Kreg®

Product Catalog

Volume 24 | 2009

In September of 1989, I took my "Craig's Jig" to a local woodworking show to get it in front of a woodworking crowd for the very first time. 20 years later, as I sit and think about it, things at Kreg and for the woodworking industry as a whole have changed quite dramatically. While our particular family owned business has grown and prospered, high school woodshop classes have disappeared from our public schools, consumer acceptance of cheap RTA furniture has increased, woodworking show attendance has gone down, and the list goes on.

During the past year though, I've noticed some particularly encouraging trends in the woodworking industry which I think speak to the longevity and broad appeal of woodworking. Individuals who previously would have never thought of themselves as 'woodworkers' are stepping up, giving it a try, and discovering what they've been missing all along. Whether it's due to the current economic conditions, new and exciting DIY TV shows promoting the value of building projects yourself, the internet's ability to spread a message quickly, or just the desire for homeowners to try something new and different... the fact is that things are changing.

Thankfully, at Kreg, we're excited to be playing a significant role in this turn around. Through the Kreg Jig®, we've been able to introduce an entirely new audience to the rewarding world of woodworking, and to give them the confidence to get started building their very own wood projects in just 3 easy steps – "Drill. Drive. Done!" What the Kreg Jig® really does is help make woodworking more approachable, and give individuals an opportunity to begin their journey into woodworking. At Kreg, it's our goal to help them continue on that journey by creating quality products that simplify woodworking challenges and inspire them to keep learning and improving their skills.

Some of our newest tools are a perfect example of this. Our all new Beaded Face Frame Fence which will be released in October of this year takes something that used to take several hours of painstaking work to finish, and helps anyone with a router table get it done in just 15 minutes or less. It's a truly remarkable tool that I think will completely change the way you view Beaded Face-Frame construction. We're also working to continually improve Kreg Joinery™. In fact, we've just released a new Micro Pocket™ Drill Guide which helps you create Pocket-Holes that are 25% smaller than a standard Pocket-Hole, perfect for creating pluggable Pocket-Holes in ½" material and working with mitered joints. You can read more about it on page 12.

There are a lot of exciting things going on at Kreg right now. Needless to say, the Kreg Jig® and all new Beaded Face-Frame Fence are just the start. Thanks to our devoted customers and the amazing team we've put together here inside the walls of Kreg, you can expect much more from us this year and in the years to come! Until next time, good luck, and good woodworking!

Sincerely,

Craig A Sommerfeld

Find Kreg Online

At Kreg, we're very excited to be bringing the benefits of Kreg Joinery™ and the Kreg Jig® to a much wider audience than ever before. Because of the speed, strength, and simplicity of Kreg Joinery™, DIY'ers and everyday homeowners are discovering that they too can have fun building wood projects, without the need for a shop full of specialty saws and sanders.

One of the ways we're reaching this new audience is by being as available as possible online. Check out some of the best places to get in touch with Kreg, online:

Find Your Local Dealer 365 Days a Year!

We're proud of our extensive dealer network and the service they provide. Finding your local Kreg dealer any day of the year is just a click away. Simply type in www.kregtool.com and then select the "Dealer Locator" icon in the upper right hand corner of any product page. Enter your zip code and the closest 10 dealers will be posted, including a phone number and a map link showing you the way to their door. As always, we suggest that you call the dealer before you visit to make sure the item you desire is in stock.

Kreg Tool Company
Huxley, Iowa 50124
1.800.447.8638 | www.kregtool.com

Amazingly fast.

When you don't spend your time clamping, waiting for glue to dry, and wading through complicated math, it's amazing how quickly your projects come together! With Kreg Joints™ you can forget all that other stuff and really have fun with your projects. Try a Kreg Jig® today, and learn what it's like to finish a project in hours instead of days.

Glue is optional.

It's time-consuming and it's messy... but best of all, it's completely optional! Unlike mortise and tenons, dowels, and biscuits, the self-tapping screws inside of every Kreg Joint™ hold the stock together without any additional help. For the very first time, if you don't want to use glue... you don't have to.

Simple math.

Put the calculators away, and start building already! With Kreg Joints™, what you see is what you get, and unlike other techniques, there's no need to spend all your time calculating stock-overlaps and dry-fitting individual workpieces. Simple math. Fast and accurate results. Kreg Joinery™.

Strength to spare.

It's fast, and it's easy... but it's also amazingly strong! Unlike other techniques, Kreg Joinery™ utilizes the mechanical advantage of self-tapping steel screws to maximize your joint-strength over the long haul. It's the same strength that industrial woodworkers have counted on for years, and now it's available to everyone!

Thousands of uses.

Kreg Joints™ can be used in nearly any situation; so whether you're building a chair, building a cabinet, making repairs to your squeaky floor, working with plywood or beautiful hardwood, Kreg Joints™ are always a perfect fit. Whatever it is you need to build, whatever it is that needs to be repaired, Kreg Joints™ can help!

No commitments.

Don't worry about needing a shop full of clamps or expensive saws and sanders. Kreg Joints™ are amazingly affordable to use, and require only the simplest of tools. All you need to get started, is a Kreg Jig®, a drill, and a saw. Happy building!

Half the work.

Kreg Joinery™ saves you time and frustration at every step... or lack of a step. Don't worry about precisely lining up dowel holes, or spending hours cutting a perfect mortise and tenon; just drill the holes, drive the screws, and move on to the next project! Drill. Drive. Done.

Drill.

Use the Kreg Jig® to drill specialized Pocket-Holes in your workpiece.

Drive.

Drive self-tapping screws into the workpiece for an incredibly strong hold.

Done!

You've just created an amazingly strong wood joint with no glue, complicated math, or expensive saws/sanders. It's that easy!

Decks

As woodworkers, trim carpenters, and weekend warriors have been finding out... the applications for Kreg Joinery™ are nearly endless. Whether you're fixing, building, or remodeling, the Kreg Jig® and Kreg Joinery™ can help you do it faster, stronger, and easier.

Give Kreg Joinery™ a try today and learn what it's like to finish projects in hours instead of days. We're confident that you'll soon be looking for more and more ways to use this amazing technique in your next project!

A quick and easy workbench.

Simple but beautiful bookshelves.

Storage for every room in the house.

Organized closet solutions.

Kreg Jig® Master System

**Ultimate Technology. Ultimate Features.
The Ultimate Kreg Jig®.**

The Kreg Jig® Master System is the ultimate Kreg Jig®, and a great choice for any woodworking enthusiast. Between its front-side clamping capabilities, Dust-Collection Attachment, Material Support Stop, removable 3-Hole Drill Guide, and seemingly endless adjustability, this jig truly has it all! If you're serious about Kreg Joinery™, and even more serious about owning the highest quality tools, look no further than the Kreg Jig® Master System.

Heading to the job site or working on two projects at once? The Kreg Jig® Master System's drill-guide block removes quickly from the benchtop base for use in the portable base.

**Demo Video
Available Online**

The Ultimate Joinery Tool

Two tools, actually. The Master System's Drill Guide can be quickly removed from the benchtop base and placed in the portable base for use in the workshop or on the job site. The portable base is designed to work with the dual purpose Face Clamp™ that both clamps the workpiece to the base while drilling and can then be used for assembly. In addition, the portable base can be screwed down to a board and used in a vertical position, much like the benchtop base.

**Interactive Demo Available
Online at www.kregtool.com**

Kreg Jig® Master System Availability

Kreg Jig® Master System

Kit includes Kreg Jig® Master System, Face Clamp™, Portable Base, Material Support Stop, Dust Collection Attachment, Stepped Drill Bit w/ Depth Collar, 6" Square Driver Bit, 3" Square Driver Bit, Starter Screw Set, Starter Plug Set, SkillBuilder™ DVD, Quick-Start Guide and durable carrying case.

Other patents pending.

A

B

C

A FRONT-SIDE CLAMPING

Exclusive spring-loaded front-side clamping means no more trying to reach around large panels. It puts everything within arm's reach, and also compensates for small thickness variations in your project stock.

B MATERIAL SUPPORT STOP

The Material Support Stop can be set at any distance from the jig to repeat the same Pocket-Hole over and over again. The stop can also be swung out of the way to serve as a support for large panels.

C DUST COLLECTION

The Dust Collection Attachment effortlessly snaps into place on the front of the jig and attaches to any standard 1-1/4" vacuum hose. In addition to a clean shop it also provides faster/easier drill strokes and extends the life of your drill bits.

Kreg Jig®

Fast. Fun. Easy.
The D.I.Y. Kreg Jig®.

The Kreg Jig® is the perfect choice for DIY'ers and anyone new to Kreg Joinery. Whether you're building your first set of garage storage shelves or making simple repairs around the house, the Kreg Jig® can help you finish the job in less time, and with far less effort than you ever thought possible. Its simple design gives you the confidence to start the project, and with joints as easy as "Drill. Drive. Done!" – you'll actually want to finish it.

Repairs Made Easy!

Drill Pocket-Holes at the problem joint.

Drive Self-Tapping Screws to secure the joint.

Done. Problem Solved. It's really that easy!

Easy Does It

The Kreg Jig® makes every joint you build faster and stronger... but perhaps more importantly, it makes them easier. Simple two-step operation, combined with easy thickness adjustments, built-in depth-setting gauges, a large clamping recess, and our patented 3-Hole Drill Guide, make this the most easy-to-use Kreg Jig® we've ever made.

Kreg Jig® Availability

Kreg Jig®

Includes everything you need to get started with Kreg Joinery™, including Kreg Jig®, Stepped Drill Bit, 6" Square Driver, Starter Screw Set, Starter Plug Set, SkillBuilder™ DVD, and Quick-Start Guide, all inside a compact and durable carrying case.

• **Warranty:**

The Perfect Tool for Repairs

Got a wobbly chair or table? You can pry it all apart, glue it, clamp it, reassemble it and hope it holds up, or... you can tighten it in a snap with the Kreg Jig® Jr. Small enough to fit just about anywhere, you can use it to fix chair runners, secure table rails to legs, and much more.

A CLAMP PAD ADAPTER

The Kreg Jig® Jr. is designed to be easily clamped in place with any of our dual purpose Face Clamps™. The Clamp Pad Adapter snaps onto the back of the jig allowing our Face Clamps™ (not included) to be attached to the jig for faster drilling.

B MATERIAL THICKNESS SETTINGS

From thin drawer boxes and craft projects to stout 2X4's, this jig can join them all. Independent Easy Press™ Positioning Sliders feature 9 separate depth settings, allowing you to easily join materials from 1/2" up to 1-1/2" thick, in 1/8" increments.

C ORGANIZED CARRYING CASE

We've packaged this Kreg Jig® Jr. in a durable plastic carrying case to keep things organized and to make sure that you always have the tool, drill bit, and screws on hand to complete your next project. As a bonus, we've molded a Depth Collar Gauge into the case for a handy reference.

D EASY-PRESS™ POSITIONING SLIDERS

Simply depress the button on the side of the jig and move the sliders so that your material thickness is aligned with the arrow on the jig body (shown in red) to set your drilling depth.

Kreg Jig® Mini

Minimal.

The Kreg Jig® Mini is good for very specific applications where the smallest jig possible is required. The minimalistic design includes the hardened steel drill guide of the other jigs, but does not include a reference fence so material thickness adjustments must be made manually.

A UNLIMITED MATERIAL THICKNESS

The Kreg Jig® Mini is the only Kreg Jig® that does not include a positioning fence. This fenceless design allows you to make precise angle and stock depth adjustments as needed, making the Mini the most 'positionable' jig available.

B WOOD-CHIP RELIEF HOLE

With the Kreg Jig® Mini, you don't have to keep removing the drill bit to clean out the hole. A wood-chip relief hole in the jig gives the removed material a place to go, so you can keep on drilling.

C PLUG SETTING FEATURE

If you decide to conceal or decoratively accent your Pocket-Holes with our solid wood Pocket-Hole Plugs, the Mini's plug setting feature is the fastest, easiest, and safest way to do so.

D HARDENED STEEL DRILL-GUIDE

Precise Pocket-Holes are a guarantee with the Kreg Jig® Mini because the hardened steel drill guide keeps the bit from deflecting as it hits the workpiece.

D

Micro Pocket™ Drill Guide

Take It to the Next Level

With a 25% smaller hole diameter, the Micro Pocket™ Drill Guide lets you create more compact, low-profile Pocket-Holes in the same joinery applications, but also tackle smaller projects, thinner stock, and tighter repair applications, where standard Pocket-Holes simply can't go. Designed for use with the Kreg Jig® or Kreg Jig® Master System.

D

A ENDLESS APPLICATIONS

25% smaller hole works great in virtually every application you'd use standard Pocket-Holes in, and because it removes less material, drill strokes are faster and easier as well.

B PERFECT FOR 1/2" STOCK

Screw heads seat well below material surface in thin stock, perfect for creating fully pluggable Pocket-Holes in 1/2" thick material like drawer boxes.

C PERFECT FOR NARROW STOCK

Reduced width lets you drill two holes across extremely narrow stock, down to 1" wide, creating a much stronger joint in narrow pieces.

D CHOOSE YOUR JIG

Fully compatible with the Kreg Jig® and Kreg Jig® Master System. Features black color to differentiate from standard Drill Guide.

SPECIFICATIONS

The Kreg Pocket-Hole Machine Advantage

When it comes to production Pocket-Holes, we've got you covered. We offer the widest selection of industrial Pocket-Hole Machines on the market. Semi-automatic, fully-automatic, single-spindle or multi-spindle, choose an option that fits your production schedule and budget. A demonstration DVD is available upon request.

Fast

Cycle times of 2 seconds or less... and we have machines that drill up to 5 holes per cycle! Fast, efficient and built for high-speed production.

Durable

Unlike other drilling machines, Kreg machines use a hardened steel drill-guide that supports the drill bit all the way into the workpiece, prolonging drill bit life and improving the cut quality of each Pocket-Hole.

Quiet

No need to bring your earplugs... Kreg machines (electric and pneumatic) are the quietest on the market. Now that's something everyone in the shop can appreciate.

Reliable

All Kreg Pocket-Hole Machines are TRUE production machines featuring high-quality industrial motors that are built to run all day, every day, in high volume production environments. Our unique design minimizes the stress on moving parts and eliminates failure prone parts.

Repeatable

Kreg machines feature unique Swing Stops that allow your stock to be positioned in a repeatable fashion and Pocket-Holes to be easily duplicated in the same location across cabinet rails. A Swing Stop can be quickly swung out of the way – and bypassed completely – by simply pushing your stock into its face.

Quick

Don't let bit changes slow you down! All of our machines feature a simple and straight-forward design which lets you switch bits in 60 seconds or less. Time IS money after all.

Adjustable

Whether you're working with 1/2" material or 2x4s, we've got the machine to handle it. All Kreg Pocket-Hole Machines are easy to adjust for specific stock in just a few seconds.

The Foreman Pocket-Hole Machine

**Demo Video
Available Online**

Single-Step Pocket-Holes. A Small Shop's Dream.

If your production needs have outpaced our manual jigs, but you're not quite ready for a heavy-duty production machine, the Foreman is just what the contractor ordered. It features single-step operation for simplicity and speed, swing stops for production repeatability, and a durable design which is perfect for any jobsite or small shop.

Choose the way you work. The Foreman is available in two individual models – Pneumatic and Electric.

Simply Smart

The operation of the Foreman couldn't be more simple — one pull, one perfect Pocket-Hole. Other Pocket-Hole Machines require you to take the time to clamp your workpiece manually, but the hands-free clamping of the Foreman saves you that step, greatly increasing productivity.

Foreman Availability

Electric Foreman

Take your work on the road. This Foreman features a rugged 3/4 hp, single-phase electric motor. Anywhere you've got a standard 110V outlet, you've got high speed Pocket-Holes, on demand.

ITEM# DB110

\$849

Pneumatic Foreman

Got air? This Foreman features an industrial-grade 3/4 hp pneumatic motor capable of the same Pocket-Hole power as the electric version. Requires a compressor capable of producing 6cfm at 120 psi.

ITEM# DB55

\$849

Recommended Accessories

DKDB drill bit

3/8" drill bit. Highly heat-resistant cobalt steel construction for a longer life.

ITEM# DKDB

\$34⁹⁹

SPECIFICATIONS

- **Motor:**
Electric: 3/4 hp 110 V single phase
Pneumatic: 3/4 hp
- **Drill Bits:**
DKDB Drill Bit (3/8" Shank Dia. 3/16" Pilot, 1/2" long)
- **CFM Rating:**
Electric: N/A
Pneumatic: 6 cfm clamp cylinder (120 psi min)
- **Cycle Time:**
1 second
- **Material Clamping Capacity:**
1-1/2"
- **Hole Centering Capability:**
1/2" material to 1-1/2" material
- **Weight:**
40 lbs.
- **Dimensions:**
Electric: 27" H x 14" W x 23" D (7" table height)
Pneumatic: 20" H x 14" W x 23" D (7" table height)
- **Warranty:**
1 Year

A

B

C

A RELIABLE, ONE STEP DRILLING

Just position the wood and pull the lever. The automatic clamp secures the workpiece and the 3/8" stepped bit drills the Pocket-Hole in one smooth operation. In just seconds, you're ready to drill another workpiece.

B MATERIALS UP TO 1-1/2" THICK

The Foreman quickly adjusts from the top side of the machine to position a screw in material from 1/2" up to 1-1/2" thick. Drill everything from drawer boxes to face-frames and deck material using this one machine.

C SWING STOPS

The one-step drilling isn't the only thing that speeds production. The material positioning stops allow you to place Pocket-Holes precisely across a workpiece, yet swing out of the way when not needed, such as drilling across the length of a panel.

DK1100 Pro Series

Single-Spindle Pocket-Hole Machines

Demo Video Available Online

Fast. Quiet. Reliable.

The Production Pocket-Hole Standard.

The DK1100 series (and all of our machines) is built with true industrial-grade motors that provide the power to run day after day – quickly, quietly, and reliably – in even the most high-production environments. For most shops, this translates into previously unheard of productivity and efficiency. Something we could all use more of.

The DK1100 is available in three models – one Electric and two Pneumatic – which fit the specific needs of almost any production shop.

It Works For You

The DK1100 series of machines are the standard in the industry for drilling a single Pocket-Hole at a time. We've packed a ton of functional features into these machines that really set them apart from the competition. Choose from electric or pneumatic powered, free-standing or bench-mounted to fit the way you build.

DK1100 Single-Spindle Availability

DK1100 FE

Add real productivity and efficiency to your shop with the 'Production Pocket-Hole Standard.' This model works with any standard 20 amp 110V outlet and features a strong 1-1/2 hp electric motor, single-spindle simplicity, and cycle times of less than one second.

ITEM# DK1100 FE
\$2,999

DK1100 FP

Already set up for pneumatic? This model features an industrial-grade 1-1/4 hp pneumatic motor capable of the same Pocket-Hole productivity as the electric version. Requires a compressor able to produce 8cfm at 120 psi. (50% duty cycle)

ITEM# DK1100 FP
\$2,999

DK1100 TP

This model is identical to the DK1100 FP, just in a much smaller frame. It features a table height of 8", making it easy to build into your workbench or relocate from time to time. Requires a compressor able to produce 8cfm at 120 psi. (50% duty cycle)

ITEM# DK1100 TP
\$2,799

SPECIFICATIONS

- **Motor:**
Pneumatic Models: 1-1/4 hp
Electric Model: 1-1/2 hp 110 V single phase
- **Drill Bits:**
DKDB Drill Bit (3/8" Shank Dia. 3/16" Pilot, 1/2" long)
- **CFM Rating:**
TP & FP: 8 cfm at 50% Duty Cycle (120 psi min)
FE: 1 cfm clamp cylinder (90 psi min)
- **Cycle Time:**
1 second
- **Material Clamping Capacity:**
4"
- **Hole Centering Capability:**
1/2" material to 1-1/2" material
- **Weight:**
TP: 77 lbs., FP: 138 lbs., FE: 176 lbs.
- **Dimensions:**
TP: 19" H x 24" W x 24" D (8" Table Height)
FP: 50" H x 24" W x 24" D (40" Table Height)
FE: 50" H x 24" W x 24" D (40" Table Height)
- **Warranty:**
5 Year Limited Warranty

A CONVENIENT SWING STOPS

Quickly position two Pocket-Holes across rails of various widths by placing it against one stop, drilling the hole, then repeating with the rail against the other stop. For drilling Pocket-Holes in panels, the stops simply swing out of the way.

B ADJUSTABLE FENCE

Adjustments couldn't be easier as the fence adjusts right from the topside of the machine to let you center a screw in 1/2" to 1-1/2" thick materials. The hold down clamp also adjusts to allow materials up to 4" thick to be drilled.

C QUICK DRILL BIT CHANGES

Changing drill bits is a quick and simple process. Simply loosen the collet with the provided allen wrench, replace with a new bit and you are back in production in less than 60 seconds.

D MOTORS BUILT TO LAST

The industrial grade motors used in Kreg machines are built for long lasting service. Kreg machines are also designed to minimize stress on moving parts, greatly reducing the likelihood of failure.

DK3100

Multi-Spindle Pocket-Hole Machine

Demo Video
Available Online

The Same Face-Frames. Twice as Fast.

If you're looking for the ultimate machine to build face-frames, look no further. The multi-spindle DK3100 contains three spindles which allow you to drill two Pocket Holes across rails of varying widths in just one machine cycle – something that no other Pocket-Hole machine on the market can do. Best of all, it can also be quickly changed to drill a single Pocket-Hole, like our DK1100 series, by simply removing a drill bit. In short, if you're serious about face-frame production, the DK3100 is the machine that will deliver real performance to your shop and profits to your bottom line.

The DK3100 not only drills two Pocket-Holes in one cycle, it also gives you options for spacing the holes. You can set the drill spindles at 3/4", 1" and 1-3/4" on center, perfect for today's most common rail widths.

Pocket-Holes Twice as Fast!

Multiple spindles give you the option of three different hole spacings to fit today's most common face-frame widths. If you would prefer to drill only one Pocket-Hole, no problem, just remove a drill bit and you get the equivalent of our DK1100 single-spindle machine. Only Kreg offers you the option of one or two Pocket-Holes at a time and your choice of three different on-center hole spacings **IN THE SAME MACHINE!**

DK3100 Multi-Spindle Availability

DK3100 Multi-Spindle
Twice the Pocket-Holes. Twice the Productivity. The DK3100 features a strong 110V 1-1/2" hp electric motor which runs two separate spindles and drills two perfect Pocket-Holes in less than one second.

ITEM# DK3100

LH-DKDB drill bit (DK3100 only)
Left handed 3/8" drill bit. Highly heat-resistant cobalt steel construction for a longer life.

ITEM# LH-DKDB

\$39⁹⁹

SPECIFICATIONS

- **Motor:** Electric, 1-1/2 hp 110 V single phase
- **Drill Bits:** DKDB Drill Bit (3/8" Shank Dia. 3/16" Pilot, 1/2" long)
- **CFM Rating:** 1 cfm clamp cylinder (90 psi)
- **Cycle Time:** 1 second
- **Material Clamping Capacity:** 4"
- **Hole Centering Capability:** 1/2" material to 1-1/2" material
- **Weight:** 176 lbs.
- **Dimensions:** 50" H x 24" W x 24" D (40" Table Height)
- **On-Center Spindle-Spacings:** 3/4", 1", 1-1/2"
- **Warranty:** 5 Year Limited Warranty

A EASY SETUP

The lift-off top gives you direct access to the drill bits. A simple turn of an allen wrench in the drill bit collets is all it takes to change bits. In less than a minute, you can change to any of the three settings or set up the DK3100 for single-spindle drilling.

B ONE SECOND CYCLE TIMES

Two Pocket-Holes in one second? It's not a dream, it's reality with the DK3100. The one-touch foot pedal fires the spindle to make two perfect Pocket-Holes in one second.

C DURABLE

The DK3100 uses a hardened steel drill guide that supports the drill bits all the way into the workpiece, prolonging drill bit life and improving the cut quality of the Pocket-Hole.

DK5100

Panel Boring Pocket-Hole Machine

One Machine Cycle. Five Pocket-Holes.

Five industrial-grade motors, five individually activated clamping cylinders, and five durable drill spindles; all in one amazing machine. The DK5100 makes drilling multiple Pocket-Holes across cabinet sides, shelving, stairs, and window/door extensions, easier than ever before. In the right situation, it can beat the bottle-neck that's slowing down your shop and significantly improve your bottom line.

Don't let bit changes slow you down. The simple and straight forward design of the 5100 – and all of our machines – lets you make easy bit changes in 60 seconds or less.

**Demo Video
Available Online**

Increase Your Shop's Output

This machine is built for the shop that has a specific repetitive application that screams for increased productivity. The time saved by drilling up to five Pocket-Holes at once is truly dramatic and will allow you to reallocate resources to areas of your shop that need more attention.

DK5100 Multi-Spindle Availability

DK5100 Panel Boring
Production panels just got faster. The DK5100 features 5 industrial-grade 3/4 hp pneumatic motors which power 5 individual drilling spindles. Requires a compressor able to produce 20 cfm at 120 psi. (50% duty cycle)

Self-Tapping Pocket-Hole Screws
Square drive, case hardened, flat head, auger-point screws. Perfect for any Pocket-Hole application. See Pages 25-26.

SPECIFICATIONS

- **Motor:** Pneumatic, (5) 3/4 hp motors
- **Drill Bits:** DKDB Drill Bit (3/8" Shank Dia. 3/16" Pilot, 1/2" long)
- **CFM Rating:** 20 cfm at 50% Duty Cycle (120 psi)
- **Cycle Time:** 2 seconds
- **Material Clamping Capacity:** 1-3/4"
- **Hole Centering Capability:** 1/2" material to 3/4" material
- **Weight:** 350 lbs.
- **Dimensions:** 50" H x 36" W x 24" D (40" Table Height)
- **On-Center Spindle-Spacings:** 6"
- **Warranty:** 5 Year Limited Warranty

A INDIVIDUAL CONTROL

Each of the five spindles is controlled with an on/off switch located on each clamping tower, giving you instant control of every spindle. Drill with all five spindles at once or turn a couple off to best meet the needs of your project.

B 5 POCKET-HOLES, 1 CYCLE

The DK5100's five spindles are spaced 6" on-center, the perfect spacing for many panel applications. A simple tap of the foot pedal will create five uniform Pocket-Holes in less than 2 seconds. Now that's productivity.

C PNEUMATIC POWER

All five drill spindles are driven by industrial grade pneumatic motors that are designed to provide you with plenty of drilling power, panel after panel, year after year.

Face Framing Table

Demo Video Available Online

Save Time. Save Your Back.

Assembling perfectly flush face-frames is a breeze with our pneumatic Face Framing Table. Assembly is quick, and since the flush assembly reduces and often eliminates the need for sanding, you'll save even more time and money. Best of all, the Framing Table stands at a 30 degree angle, so it uses less floor space than a flat table and saves your back by allowing you to work upright rather than hunched over.

Flush face-frames made easy. Align stile and rail along squaring fence. Adjust clamp cylinder and secure joint line. Drive self-tapping screw.

Perfectly Square. Perfectly Flush.

Fast assembly is great. Fast, accurate assembly that virtually eliminates sanding is even better. With the Framing Table, you'll get it all. It begins with the squaring fence for a perfectly square start. The pneumatic clamping cylinders hold your frame flush against the sturdy surface, helping to eliminate imperfections in the assembly so you'll rarely — if ever — need to finish sand your frame.

Face Framing Table Availability

SPECIFICATIONS

- **Table Dimensions:**
76" H x 110" W x 30" D
- **Angle:**
30° from vertical
- **Weight:**
350 lbs.
- **Retractable Squaring Fence:**
Retracts out of the way for frames longer than 8'.
- **Work Surface:**
4'x8' melamine, 1-1/8" thick
- **Clamping:**
Four high-quality clamping cylinders can be independently controlled. Activate one at a time or all at once by a master switch.
- **Accessories:**
Add our Pneumatic Screwgun and 8' Coil Hose

A RETRACTABLE SQUARING FENCE

The aluminum squaring fence on the left side of the table retracts out of the way to accommodate frames longer than 8'. Just begin your frame with the squaring fence up, then retract the fence as needed.

B CUSTOMIZED SETUP

Each clamping cylinder can be independently controlled, so you can actuate each cylinder individually or activate them all at once with a master switch located at the bottom of the clamping arm.

C POWERFUL CLAMPING

The four high-quality clamping cylinders apply tremendous pressure on the joint line to maintain a flush assembly. The clamping arm rolls easily on roller bearings and each cylinder glides smoothly along the arm for perfect positioning.

Self-Tapping Screws

Our self-tapping screws are specially designed for Kreg Joinery™. They feature a self-tapping auger point that eliminates pre-drilling and a flat head that seats flush in the bottom of the Pocket-Hole. All of our screws utilize a #2 square drive recess. The deep recess of the square drive provides positive driver engagement to reduce cam-out. Like every Kreg product, our screws are manufactured from the highest quality materials. To manufacture a virtually unbreakable screw, industrial quality steel is first case-hardened and then coated with a dri-lube finish which reduces driving torque and gives them their bronze appearance.

Choosing the right screw...

We offer three thread types, two head styles and four different lengths to handle all pocket hole applications. Find the right screw using the information below.

Screw Length

Choosing the correct screw length depends on the size of the material you are working with. Using the correct screw will eliminate the possibility of break-through and provide optimum hold-strength on the joint.

Find your correct screw length: (all screw lengths assume joining stock of equal thicknesses)

1/2" Stock:	1" Screw
3/4" Stock:	1-1/4" Screw
1-1/2" Stock:	2-1/2" Screw

Thread Type

Choosing the correct thread type depends on the species of wood you are working with. Using the correct screw will ensure maximum hold pressure and dramatically strengthen each joint.

Coarse Thread: Soft Woods and Composites Plywood, MDF, Pine, etc.

Fine Thread: Hard Woods Oak, Maple, Walnut, Cherry, Hickory, etc.

Hi-Lo: For use as a general purpose screw and with medium hardwoods such as Poplar.

Head Style

Choosing the correct head style depends on the species and size of material you're working with.

The Maxi-Loc™ washer-head screw is the most popular style and provides a large amount of surface area on the head of the screw, helping to ensure the strongest possible hold and keeping it from being overdriven in soft woods such as plywood or pine.

Pan-Head screws feature a slightly smaller size – in both shank diameter and head size – which makes them the preferred choice for extremely hard woods. This smaller head also guarantees that the screw will set below the surface of the wood when joining 1/2" stock.

For more info on Kreg Pocket-Hole Screws please visit kregtool.com/screws.

Weather Resistant Self-Tapping Screws

Self-Tapping Screws Availability

Maxi-Loc™ Fine

Maxi-Loc™ Fine Thread - This is the standard screw for hardwood to hardwood applications. Large washer head provides a superior hold in the bottom of the pocket.

Part #	Description	100	500	1,000	5,000
#SML-F125	#7, fine thread, 1-1/4"	\$4.49	\$17.99	\$26.99	\$74.99
#SML-F150	#7, fine thread, 1-1/2"	\$4.99	\$19.99	\$29.99	\$84.99

Maxi-Loc™ Coarse

Maxi-Loc™ Coarse Thread - This is the standard screw for Kreg Joinery™ in softer materials such as pine, plywood, particle board, MDF and melamine. Larger diameter threads provide maximum holding power while the washer head seats flush in the bottom of the pocket, eliminating any chance of pull through.

Part #	Description	100	500	1,000	5,000
#SML-C1	#8, coarse thread, 1"	\$4.25	\$16.99	\$25.99	\$69.99
#SML-C125	#8, coarse thread, 1-1/4"	\$4.49	\$17.99	\$26.99	\$74.99
#SML-C150	#8, coarse thread, 1-1/2"	\$4.99	\$19.99	\$29.99	\$84.99
		50	250	3,000	
#SML-C2	#8, coarse thread, 2"		\$3.49	\$13.99	\$64.99
		50	250	2,000	
#SML-C250	#8, coarse thread, 2-1/2"	\$4.99	\$17.99	\$59.99	

Maxi-Loc™ Hi-Lo

Maxi-Loc™ Hi-Lo Threads – This dual thread design is as close as we come to an all purpose screw and works well in a wide variety of wood species. This screw drives significantly faster than a standard fine or coarse thread screw because of the presence of two separate threads on the screw body.

Part #	Description	100	500	1,000	5,000
#SML-HL125	#7, Hi-Lo thread 1-1/4"	\$4.49	\$17.99	\$26.99	\$74.99

Pan Head Fine

Pan Head Screws - The fine thread version of this screw is very popular for producing face-frames with hardwoods. Choose from either the 1-1/4" or 1-1/2" screw to join 3/4" thick frames. The coarse thread 1" screw (SPS-C1) is the recommended screw for assembling 1/2" plywood drawer boxes.

Part #	Description	100	500	1,000	5,000
#SPS-F075	#6, fine thread, 0.75"	\$3.99	\$15.99	\$24.99	\$64.99
#SPS-F1	#6, fine thread, 1"	\$4.25	\$16.99	\$25.99	\$69.99
#SPS-C1	#7, coarse thread, 1"	\$4.25	\$16.99	\$25.99	\$69.99
#SPS-F125	#6, fine thread, 1-1/4"	\$4.49	\$17.99	\$26.99	\$74.99
#SPS-F150	#6, fine thread, 1-1/2"	\$4.99	\$19.99	\$29.99	\$84.99

Pan Head Coarse

Blue-Kote™ is the next generation of rust-resistant screw and the best choice in the majority of Pocket-Screw applications. Through an extensive process which chemically combines three special anti-corrosion layers, Blue-Kote™ screws take on amazing new rust-resistant properties which are rated 400% better than our old zinc-plated screws.

Part #	Description	100	1,000	5,000
#SML-C125B	#8, coarse thread, 1-1/4"	\$5.99	\$35.99	\$89.99

#CAP-LTB		LIGHT BROWN	\$6.99	\$24.99

Drill Bits / Driver Bits

Drill Bits

Our one-piece design eliminates clogging and provides a much smoother and faster drilling stroke than the drill bits with replaceable center drills. The KJD bit for our manual Kreg Jigs® is made of high-speed steel while the DKDB machine bit is made of cobalt steel that increases the bit's life. Because the DKDB bit is also 3/8" diameter it can be used in any of our manual jigs as a premium replacement. Be sure to order the left hand drill bit (LH-DKDB) for the center spindle of the DK3100 fully-automatic machine.

- A. #DKDB For DK1100, DK3100, DK5100 and Foreman \$34.99
- B. #LH-DKDB For DK3100 Center Spindle (Left Hand) \$39.99
- C. #KJD For Kreg Jigs® \$16.99
- D. #KJSC/D Depth Collar / Allen Wrench \$2.25
- E. #KJD/MICROBIT For Micro Pocket Drill Guide \$16.99
- #KJSC/MICROBIT Micro Pocket Depth Collar / Allen Wrench \$2.25 (KJSC/MICROBIT Not Shown Above)

Drivers

Deep #2 Driver resists cam-out and comes in either 3" or 6" lengths. The 6" length is easier to use in the majority of applications, but the 3" works great in tight spots.

- F. #D3 3", #2 Square Driver \$1.75
- G. #D6 6", #2 Square Driver \$2.75
- #DDS 3" & 6", #2 Square Driver Set \$4.49
- #D6X2 (2) - 6", #2 Square Driver Set \$5.49

Drill Bit Sharpening Service

Dull drill bits run hot which shortens their lives. We'll sharpen them for a fraction of the cost of a new one. Charge is \$4 per bit in the continental U.S. and \$6 per bit in Canada, Alaska, Hawaii and Puerto Rico. Call 1.800.447.8638 for more information.

- #SHARP US Sharpen One Drill Bit \$4.00
- #SHARP CAN Sharpen One Drill Bit \$6.00
- Each Additional Bit \$2.00

Quick Change

Quickly switch from drilling Pocket-Holes to driving Pocket-Screws in just seconds with our Quick Change products.

Quick Change Kit The complete set. Includes everything you need for faster and more secure bit changes.

- Kit Includes:
- Quick Change Chuck
- #2 Square Drive
- Hex Shank Pocket-Hole Bit
- Depth Collar / Allen Wrench

Precision Router Table

Tablesaw Fundamentals. Precision Routing.

A quality router table is one of the most important tools for any serious woodworker to have in their woodshop. Whether you're routing a simple dado, putting an edge on a countertop, or building an entire set of raised panel doors, the Kreg Precision Router Table can help you finish projects faster, and with greater accuracy than ever before. Through a unique set of features including its table-saw inspired self-squaring fence, the Precision Router Table provides an innovative look at one of the most useful tools in your shop.

Our exclusive Micro-Dot surface, 'swiss-cheese' free Insert Plate, and uniquely designed accessories ensure that you get the best possible routing experience on each and every pass.

FENCE

A TABLE SAW FUNDAMENTALS

Unique self-squaring t-square style fence design – similar to those found on high-end table saw rip fences – allows the fence to be quickly and accurately adjusted parallel to the miter slot. Unique cam-style locking handle and opposite-side anchor ensures incredible fence rigidity.

B HEAVY-DUTY ALUMINUM DESIGN

Fully enclosed heavy-duty aluminum extrusion provides unmatched rigidity, strength, and precision to your router top and helps to maintain an enclosed vacuum chamber for superior dust collection.

C BUILT IN JOINTER

Two fully independent fence faces and dual acrylic depth setting rods quickly turn your router table into a vertical jointer. Depth rods are stored inside of the fence and can be added behind the faces to allow for jointing depth adjustments of 1/16" and 1/32".

D UNPARALLELED PRECISION

Magnified Precision Lens Cursor lets you forget about using a tape measure and pencil, and start getting real accuracy out of your router table. The optional Micro-Adjuster allows you to dial down your precision even further.

TABLE

A EASY-SLIDE™ MICRO-DOT MDF

The professionally edgebanded MDF top absorbs vibration and noise like no phenolic top can. It features an Easy-Slide™ Micro-Dot skin – made from an impact resistant high-pressure laminate – which makes it incredibly easy to slide workpieces across the surface.

B STARTS FLAT, STAYS FLAT

Because of the rugged MDF top and extremely rigid dual steel struts which support the center of the router table, you'll never have to worry about the table bending and bowing over time... no matter how big your router and lift may be.

C COMBINATION MITER / T-SLOT

Combination Miter/T-Slot is located precisely parallel to the router fence, which makes it easier than ever to utilize various accessories such as the Kreg Precision Miter Gauge and Kreg True-FLEX™ Featherboards.

INSERT PLATE

A WORKS WITH ANY ROUTER

This 9-1/4" x 11-3/4" x 3/8" phenolic insert plate has been designed to easily mount to any router, utilizing your router's base plate and a simple (included) template. This 'swiss-cheese' free design eliminates hang-ups on the plate surface and reduces routing inconsistencies.

B UNIQUE BOTTOM-UP LEVELERS

These unique levelers feature a new bottom-mount design, 8 adjustable points of contact for leveling precision, four-corner lock-downs for stability, and locating-tabs for easy installation.

C VERSATILE REDUCING RINGS

Dual reducing rings (2", 1-13/64") boast three independent leveling/lock-down screws and compatibility with standard Porter-Cable guide bushings for fast and easy template routing on your router table.

Precision Router Table Insert Plate

This rugged 3/8" phenolic plate was designed to accept nearly any router, without the use of a "swiss-cheese" style pre-drilled surface. It features an exclusive bottom-up mounting design which makes it easier than ever to get a solid, secure, and 100% level routing surface, along with dual reducing rings (2" and 1-13/64") which bring template routing to your table top through compatibility with standard Porter-Cable guide bushings. It's a professional router table insert plate, designed for individuals who can truly tell the difference.

ITEM# PRS3030
\$69⁹⁹

Extremely flat surface with no "swiss cheese" pre-drilled holes.

Bottom-up levelers create an incredibly solid, secure, and level surface.

1-13/64" ring is compatible with common Porter-Cable guide bushings.

True-FLEX™ Featherboard

The True-FLEX™ Featherboard gets its name from the careful engineering that went into its design. Many featherboards on the market today apply too much pressure or not enough pressure to the workpiece, resulting in imperfect cuts and less than safe operation. We've designed each finger of the True-FLEX™ featherboard to provide a consistent and optimum pressure, and to stand up to years of use in your woodshop. The featherboard is made from an extremely durable plastic composite body and even includes an exclusive wedge-lock system which allows the featherboard to be secured to a variety of shop tools without the need for additional hardware. Whether you're using a miter-slot or a t-slot, working on a table saw or a router table, the wedge-lock system adjusts accordingly and lets you work with confidence.

Carefully designed fingers apply optimum pressure to each workpiece.

Vertical and horizontal positioning demonstrates wedge-lock miter slot and t-slot compatibility.

Unique wedge-lock hardware works in miter slots on tablesaws, router tables, band saws and more.

True-FLEX™ Featherboard Availability

True-FLEX™ Featherboard
Single featherboard. Comes with wedge-lock hardware which works in t-slots or miter slots on tablesaws, router tables, band saws and more.

ITEM# PRS3010 **\$19⁹⁹**

True-FLEX™ Featherboard Twin Pack
This set of True-FLEX™ Featherboards comes with an extended version of the wedge-lock hardware for use in tandem. When used together they provide additional support for taller workpieces, resulting in faster, safer, and higher quality cuts.

ITEM# PRS3020 **\$36⁹⁹**

Multi-Purpose Router Table Switch

Add safety and convenience to your Precision Router Table with this incredibly handy power switch. Features a 2-Plug design which allows it to control two independent devices at once, Key-Lok™ which eliminates accidental power-on, and a long 8ft. heavy-duty 14 gauge power cord.

Features compatibility with our Precision Router Table and Precision Benchtop Router Table.

Key-Lok™ eliminates unintentional power-on.

2-Plug design controls two independent devices at once.

ITEM# PRS3100
\$34⁹⁹

Router Table Stop

Bring more precision and repeatability to your Precision Router Table with this uniquely designed stop. Features a low-profile aluminum design uniquely made to flip out of the way when not in use. Also includes our exclusive Precision Lens Cursor giving you a clear, accurate, and precise view of the fence's tape.

Features compatibility with our Precision Router Table. Adaptor kit required for use with the Benchtop Router Table.

Unique design allows the stop to flip out of the way when not in use.

Get extra precision and unmatched repeatability for stop-dados, tenons, etc.

ITEM# PRS7850
\$24⁹⁹

Precision Router Table Insert Plate Levelers

These unique levelers are the easiest way to add an insert plate to your shop-built router table. They eliminate the need for a supporting rabbet and feature a unique bottom-mount design which includes 8 adjustable points of contact, four-corner lock-downs for stability, and locating tabs for easy installation.

ITEM# PRS3040 **\$19⁹⁹**

Precision Micro-Adjuster

Do you need even more precision? When added to the Precision Router Table Fence, this Micro-Adjuster allows you to dial down your measurements even further!

ITEM# KMS7215 **\$14⁹⁹**

Heavy-Duty Casters

Add true mobility to your Universal Steel Stand with our Heavy-Duty Casters. Built to last and perform, these casters feature a dual-locking mechanism that won't roll OR pivot once engaged, resulting in an extremely stable work station. Includes all necessary hardware.

ITEM# PRS3090 **\$59⁹⁹**

Precision Benchtop Router Table

Demo Video Available Online

Benchtop Portability. Floor-Standing Features.

Built from the ground-up as the portable solution to precision routing, this table provides trim carpenters and other mobile professionals with the quality materials and attention to detail that they're only used to finding in large router tables. It features the same high pressure laminate Micro-Dot MDF surface as our top-of-the-line Precision Router Table, a full-size Phenolic insert plate, and an innovative rigid steel base which – believe it or not – actually tests quieter than enclosed portable router tables. Why put up with 'portable' features when you can have the real thing?

Light yet durable, portable yet full-featured, the perfect solution for anyone working on the road.

A

B

A EASY-SLIDE™ MICRO-DOT MDF

Why deal with vibration and noise when you don't have to? This top features an Easy-Slide™ Micro-Dot skin – made from an impact resistant high-pressure laminate – which makes it incredibly easy to slide workpieces across the surface.

B BUILT FOR MOBILE PROFESSIONALS

This table was built to withstand years of use and abuse on the jobsite. It features a rugged stamped-steel foundation, four hard-wearing rubber feet, a professionally edgebanded table-top with an impact resistant Micro-Dot surface, and an incredibly accurate rigid aluminum fence, all built with mobile professionals in mind.

C BUILT-IN JOINTER

Fully independent fence faces and acrylic depth setting rods quickly turn your router table into a vertical jointer. Depth rods are stored on the rugged aluminum fence and can be added behind the faces to allow for jointing depth adjustments of 1/16" and 1/32".

D PHENOLIC INSERT PLATE

This full sized phenolic insert plate is held in place by our exclusive bottom-up levelers which feature 4 lock-downs – a must on the job site – and 8 adjustable points of contact for the most level surface possible. It features compatibility with an endless list of routers while omitting the usual 'swiss-cheese' pre-drilled top surface which can cause routing inconsistencies.

Precision Miter Gauge

Amazing Precision. Right Out Of The Box.

Why spend your time calibrating a miter gauge when you can get factory-milled accuracy right out of the box? Our Precision Miter Gauge System requires no calibrating, and features positive stops at 0, 10, 22-1/2, 30 and 45 degrees to make it easy to cut perfect miters quickly. Of course, when you do want to cut a more complicated angle, the easy-to-use Vernier scale allows for fast adjustments to 1/10th of a degree.

Vernier Scale adjusts to 1/10th of a degree.

Interactive Demo Available Online at www.kregtool.com

Perfect Miters, Fast!

Precision is the name of the game for this CNC milled miter gauge. We worked hard to build accuracy into every feature of this product from the rugged aluminum fence, to the solid, yet versatile Swing Stop™, to the easy-to-adjust Vernier scale. Bottom line, this miter gauge will put your projects on the fast track to perfection!

Covered by one or more of the following patents:
#5,768,966 #6,880,442 #D471,925 #5,337,641 #5,617,909
Other patents pending.

A PRECISION LENS CURSOR

Similar to the type of lens found on a quality table saw rip fence, the clear lens features a high-visibility red line that makes it easy to set the Swing Stop™ for precise cuts, time after time.

B NO PLAY IN THE MITER SLOT

Our extremely straight 24" anodized aluminum bar is 3/8" tall by 3/4" wide and features five bar adjusters that eliminate "play" in the miter slot with the turn of a screw driver.

C SWING STOP™

The Swing Stop™ slides effortlessly along the fence of the Precision Miter Gauge and locks securely into place with the simple turn of a knob. It also features a patented curved foot that lifts out of the way when you slide a board into it, so squaring an end and cutting to length doesn't require moving the stop.

D ADD A SACRIFICIAL FENCE

The curved foot of the Swing Stops™ "break-away" design allows you to add a sacrificial fence to your Miter Gauge.

Precision Band Saw Fence

Beat Blade Drift. True Band Saw Precision.

Most band saw blades don't run perfectly perpendicular to the front of your table. There's always just a little bit of "drift" that prevents you from getting precise cuts even with a fence. Until now. Our Precision Band Saw Fence easily adjusts to your blade's drift angle to provide you with a whole new level of band saw accuracy. This fence mounts to most 14" band saws right out of the box and can be modified to fit many others by drilling a single hole in the aluminum mounting rail.

Compensate for blade drift by loosening two hex bolts and adjusting the angle of the fence.

Add a stop to the fence for producing cuts to a repeatable depth, such as cutting tenons.

Interactive Demo Available
Online at www.kregtool.com

Unmatched Versatility...

Never before has a band saw fence allowed you to accomplish such a wide variety of cuts. This fence adjusts both for blade drift and for perpendicularity to the blade (essential when cutting thin veneers). In addition, the fence can be removed and reassembled in a low-profile position to allow the blade guard to be moved closer to the workpiece. Last but not least, the fence can accept resaw guides or our stops for use in additional applications.

Precision Band Saw Fence Availability

8.75 lbs.
- **Adaptability:**
Pre-drilled holes on the mounting rail fit on most 14" Band Saws

Covered by the following patent:
#5,768,966 Other patents pending.

A RIGID DESIGN

The aluminum fence is incredibly strong, straight and built to last for years to come. The face and top side of the fence contain t-slots for adding stops, resaw guides and more.

B EASY TO REMOVE

When you don't need the fence, remove it in seconds - no tools required! Just loosen the locking knob and lift the fence from the mounting rail, below your table's surface.

C PRECISION LENS CURSOR

Magnified and easy-to-read for even the smallest adjustments, the thin red line on the Precision Lens Cursor lets you accurately set up the fence for cutting veneer, tenons, and more.

D ADJUSTABLE IN 2 DIMENSIONS

This fence is unique in that it adjusts to set up perfectly square to your table and blade. Two simple adjustments allow you to set the fence to match blade drift, greatly enhancing cutting accuracy.

Precision Trak & Stop Kit

No Tape Measure. No Pencil. Just Precision.

Take the guesswork — and your tape measure and pencil — out of cutting wood to length. Our Precision Trak & Stop Kit allows you to turn your shop miter saw into a precise cutting system. Simply slide the cursor of the stop to the dimension you'd like to cut, place the board against the stop, and cut to an exact length time after time. You build the support wings yourself out of plywood or particle board then add the trak to the topside of the board. Perfectly sized workpieces couldn't be simpler!

Demo Video Available Online

Perfect for a Variety of Applications

The most common setup for the Precision Track & Stop Kit is with a miter saw, but many woodworkers find it handy to add to their radial arm saw or drill press. No matter where you use the Precision Track & Stop Kit, you'll find it remarkably faster and more accurate than a tape measure and pencil.

Precision Trak and Stop Availability

Precision Trak and Stop Kit
Includes four 2' pieces of Trak, one Swing Stop™, one Production Stop, one 12' length of L-R reading self-adhesive tape, one 12' length of R-L reading self-adhesive tape, detailed instructions, and mounting hardware.

- **Cutting Capacity:** 96" minimum
- **Weight:** 7 lbs.
- **Length:** (4) 2' sections for 8' of Trak length
- **Measuring Tape:** (1) 12' R to L Reading (1) 12' L to R Reading

Covered by one or more of the following patents: #5,768,966 #6,880,442 #D471,925 #5,337,641 Other patents pending.

A PRODUCTION STOP

Designed to stand up to the rigors of repetitive cuts in an industrial environment, the Production Stop drops onto the top of the fence and features dual lens cursors for convenient use on either side of the blade.

B SWING STOP™

The patented design of the Swing Stop™ gives you a precise measurement when you need it and swings out of the way when you don't, by simply pushing a board into the curved face of the stop. Like the Production Stop, it features the Precision Lens Cursor for fast, pinpoint positioning.

C SHOP MADE SUPPORT WINGS

Build a simple plywood or MDF box to match the height of your saw, then add a back fence that reaches 2-1/4" above the saw height for the stops to glide upon. Instructions and mounting hardware for the Trak are included.

D RIDGID ALUMINUM FENCE

Incredibly strong and built to last, our anodized aluminum Trak features an L-shaped foot that makes alignment and mounting to any 3/4" thick board a snap. Trak is designed with a groove across the top to accept the included self-adhesive measuring tape.

Precision Stops

Kreg Precision Stops Availability

Production Stop
Features dual lens cursors and the unique ability to be quickly moved to either side of the saw.

ITEM# KMS7800
\$19⁹⁹

Recommended Accessories

Miter Attachment
Easily attached to a Swing Stop or Production Stop, the Miter Attachment supports the mitered end of the board on two surfaces to make a more accurate cut. Perfect for picture framers.

ITEM# KMS7831
\$19⁹⁹

A PRODUCTION STOP

Our Production Stop is built for a rugged shop environment. Dual lens cursors on both sides of the stop allow it to be easily used on either side of the blade without re-configuring. This stop also drops onto both the Top Trak and Heavy Duty Trak from the topside, allowing it to be quickly removed and repositioned without sliding to the edge of the trak section.

B SWING STOP™

Our newly redesigned Swing Stop™ easily sets the distance between the end of the board and the saw blade for amazing cutting accuracy and repeatability. The curved design of the Swing Stop™ allows a board to bypass the stop face by simply sliding the board into the stop, lifting it out of the way. The Swing Stop™ features an adjustable lens cursor much like that found on a high-quality tablesaw rip fence that can be "zeroed out" to assure pinpoint accuracy.

C MITER ATTACHMENT

Our "Perfect Miter" attachment is designed to support the mitered end of a board so that the sharp point of the miter is not damaged while cutting. The attachment also allows the mitered end to be measured off two points of contact instead of the toe of the miter, creating increased accuracy. A slot is machined into the attachment which enables it to be attached to the Production Stop or Swing Stop™ with a simple carriage bolt (included).

Trak Components

A. Jig and Fixture Bar

This is the same adjustable bar that comes standard on the Precision Miter Gauge. Six nylon screws along the length of the bar adjust with the turn of a screwdriver to take up any play in the miter gauge slot. Mounting holes are located every 4" along the length of the bar. Perfect for building workshop jigs and fixtures.

#KMS7303 Jig & Fixture Bar (30") **\$23⁹⁹**

B. Combo-Trak

Building your own router table? This combination Miter-Trak and Mini-Trak works with your miter gauge, featherboards, and other accessories to help add tremendous flexibility to your table top.

#KMS7432 Combo-Trak (32" length) **\$29⁹⁹**
#KMS7448 Combo-Trak (48" length) **\$39⁹⁹**

C. Trak Clamp

This inexpensive and versatile clamp works great in a variety of applications. Fits the Mini Trak, Top Trak or HD Trak. You may also mount the clamp to a piece of wood by drilling a 1/4" hole and then countersinking a 7/16" hole for the bolt head. When mounting the clamp on any of the tracks, be sure to have the base of the clamp seated on the track to avoid pulling the track out of the work surface. For most clamping applications, we suggest using two clamps to keep the workpiece from rotating.

#KMS7511 Trak Clamp **\$4⁹⁹**

D. Mini Trak

Mini Trak can be used to produce countless types of woodshop jigs and fixtures such as taper jigs, cut-off sleds, and more. An adaptation of our other popular styles of trak, Mini Trak contains t-slots that will capture the head of a standard 1/4" hex bolt. You can surface mount Mini Trak or mount it flush into a 3/8" x 3/4" dado or rabbet. These sections can be easily cut to length with a hacksaw. As an added feature, Mini Trak now contains a recess in the bottom of the extrusion that will receive a 1/2" measuring tape (sold separately). Simply slide the tape into the trak and enjoy the added precision of your shop-made jigs and fixtures.

#KMS7507 Mini Trak (24" length) **\$11⁹⁹**
#KMS7508 Mini Trak (36" length) **\$14⁹⁹**
#KMS7509 Mini Trak (48" length) **\$18⁹⁹**

E. Top Trak

Trak features a self-aligning L-shaped mounting foot for easy installation to a shop-made fence. Just drill 1/8" holes through the back of the extrusion and secure with the included mounting screws.

#KMS7712 Top Trak (2' length) **\$21⁹⁹**
#KMS7714 Top Trak (4' length) **\$34⁹⁹**

F. Heavy Duty Trak

Our Heavy Duty Trak is an L-shaped, anodized aluminum extrusion that is extremely straight and perfect for heavy use commercial applications. Contains four T-slots which accommodate the head of a standard 1/4" hex bolt. A 1/2" recessed indentation runs along the top and frontside of the trak for easy application of a self-adhesive measuring tape (sold separately).

#KMS7702 Heavy Duty Trak (2' length) **\$39⁹⁹**
#KMS7704 Heavy Duty Trak (4' length) **\$59⁹⁹**

G. Imperial 12' Self-Adhesive Tape

This 1/2" wide, self-adhesive measuring tape fits snugly into the indentation on the topside of our Top Trak and Heavy Duty Trak. Metallic tape is highly scuff resistant and can be trimmed to length with a scissors.

#KMS7723 Tape (12' R-L reading) **\$7⁴⁹**
#KMS7724 Tape (12' L-R reading) **\$7⁴⁹**

H. Metric 3.5 Meter Self-Adhesive Tape

Metric 3.5 meter tape, self-adhesive and fits snugly into the indentation on the topside of our Top Trak and Heavy Duty Trak. Metallic tape is highly scuff resistant and can be trimmed to length with a scissors.

Designed WITH KLAMPING IN MIND.

Every wood-worker knows that the quality of their work and the time they invest in each project, are directly affected by the tools they use. Many times however, we overlook the small things; like our workbench, clamps, and measuring devices. But no more! With the Kreg Klamp System™, you'll notice an immediate difference in productivity, efficiency, and ease-of-use, which translates into real results.

Designed from the ground-up as the ultimate clamping solution for Kreg Joinery™ and the perfect 'helping hand' around the work shop, Kreg is proud to introduce the entire family of Klamp System™ Components. If you've ever struggled to get perfectly flush Kreg Joints, ever failed to get your clamps positioned exactly where you need them, or ever just need an extra set of hands around the work shop, this is exactly what you've been looking for.

Instead of being restrained to clamping in very specific places, Klamp System™ components let you work wherever you need to most. Utilizing a simple technology called Inter-Lok™, the Bench Klamp™ can be quickly added almost anywhere you need it, positioned precisely, rotated 360 degrees, and – just as quickly as it was added – removed to regain your perfectly flush work surface. Add a Klamp Trak™ to the edge of your workbench or add a Klamp Plate™ to the center of your workbench, and start clamping where you've never been able to before. For the very first time, you can stop working around your clamps and start working with them.

A BENCH KLAMP™

This unique clamp glides along the Klamp Trak™ or secures to the Klamp Plate™, providing an amazingly strong 360 degree clamping station, wherever you need it most. Simply remove the Bench Klamp™ to regain your perfectly flush work surface.

B KLAMP TRAK™

Turn the entire length of your workbench into a clamping station. This amazing track provides a seamless clamping plane down the edge of your work bench; perfect for quick positioning of your Bench Klamp™ and Klamp Blocks™.

C KLAMP BLOCKS™

When used with the Klamp Trak™, these simple blocks allow you to quickly and accurately register your stock to the edge of your work space and bring your entire project into alignment. Made from durable, impact resistant plastic.

D KLAMP PLATE™

Don't be satisfied with clamping on the edge of your workbench. When paired with the Bench Klamp™, this plate provides a clamping station wherever you need it most. Rout one into the center of your work bench, drill press, or sawhorse!

Inter-Lok™

This Quick-Connect feature serves as the foundation for all Klamp System™ components. With it, the Bench Klamp™ can be quickly moved from place to place, providing 360 degree clamping, wherever you need it most.

Klamp Table™

Demo Video Available Online

The Ultimate Clamping Solution for Kreg Joinery™!

You don't need an army of clamps to get the job done; you just need the right ones. Our Klamp Table™ is the ultimate 'helping hand' around the workshop and the easiest way to get perfectly flush Kreg Joints™, one after another.

Drilling, routing, sawing, sanding... whatever you're doing, the Klamp Table™ can help make it faster and easier.

Perfect Kreg Joints. Every Time.

If you've ever struggled to get your Kreg Joints to come out perfectly straight and flush, the Klamp Table™ is an invaluable addition to your collection. While the two Bench Klamps secure each joint, the 5 individual Klamp Blocks™ allow you to quickly register your workpieces to the edge of the table, center the Bench Klamp along the joint line, and bring your entire project into alignment.

Klamp Table™ Availability

Klamp Table™ / Stand Combo

It's time you had a table that was designed with clamping as its primary focus. This is the ultimate solution for any handy-man or woodworker, and a great addition to any workshop.

ITEM# KKS2000

\$399⁹⁹

Combination of Klamp Table™ and Universal Steel Stand.

Klamp Table™

Buy the Klamp Table™ separately and use it on top of your current workbench. Includes 2 Bench Klamps, 5 Klamp Blocks™, 2 lengths of Klamp Trak™, all positioned on a durable melamine surface.

ITEM# KKS1000

\$249⁹⁹

Universal Steel Stand

The perfect foundation for all Kreg Table Top Solutions. Includes 4 leveling feet and assembly hardware. Made from heavy-gauge steel. Adjustable from 31" to 36" in height.

ITEM# KRS1030

\$149⁹⁹

Recommended Accessories

Heavy-Duty Casters

Add true mobility to your Universal Steel Stand. Includes 4 Heavy-Duty casters. Dual-locking mechanism protects against caster roll and pivot. Includes all necessary hardware.

ITEM# PRS3090

SPECIFICATIONS

Klamp Table™:

- Large, 21-3/4" x 33-3/4", clamping surface.
- Replaceable, glue resistant, melamine surface.
- Trak on two sides of the table, provides endless flexibility.
- Klamp Blocks™ allow for fast, accurate, and consistent registration of workpieces.
- Multi-Function: Can be used for a variety of woodworking functions, including sanding, routing, layout, etc.

Universal Steel Stand:

- Heavy gauge steel construction
- 31" to 36" height adjustability
- 4-Stable leveling feet
- Durable painted finish
- Fast and easy assembly

Build your own.

Each Klamp System™ component can be purchased separately. Whether you need a seamless clamping plane down the edge of your current workbench or a stationary clamping station in the center of your sawhorse, you can pick the perfect Klamp System™ component, and install it yourself.

Individual components can be found on page 43.

A

B

C

A FLEXIBLE POSITIONING

Stop working around your clamps and start working with them. The Klamp Trak™ allows you to position your Bench Klamp™ and Klamp Blocks™ anywhere along the table's edge, and quickly remove them to regain your flat work surface.

B VERSATILE CLAMPING

Are you always looking for the right clamp? The Bench Klamp™, with Inter-Lok™ Technology, is great for almost any woodworking task. It slides across the Klamp Trak™, rotates 360 degrees, and firmly locks into place wherever you need it most.

C PRECISE ALIGNMENT

Made from durable, impact resistant plastic, Klamp Blocks™ glide along the Klamp Trak™ allowing you to quickly register stock to the edge of your work space, and bring your entire project into alignment.

Right Angle Clamp

90° Clamping Made Easy

Attaching a face-frame to a cabinet carcass, assembling drawers, shelving and other situations where you need to join workpieces at 90 degree angles is a snap with the Right Angle Clamp. It features a steel pin on one arm that fits snugly into one Pocket-Hole to clamp the pieces together as you drive a screw into an adjacent hole. Using the Right Angle Clamp is like having a helper on hand to hold materials at a perfect 90°.

Right Angle Clamp Availability

Right Angle Clamp

Features a pivoting clamp face and unique steel pin that fits down in the Pocket-Hole for joining 90° angles.

ITEM# KHC-RAC
\$27⁹⁹

90° Corner Clamp

Self-squaring joints, quick and easy.

- Self Squaring Design aligns workpieces, making it easy to secure individual joints at a 90° angle, every time!
- L-Handle lets you quickly and easily adjust for varying stock thicknesses up to 1-1/4".
- Innovative Swivel Head and quick release lever improve ease-of-use and efficiency.
- Large Clamping Surface protects soft woods against workpiece imprint.
- Durable Heat Treated Steel construction features nickel plating for additional longevity.

90° Corner Clamp Availability

90° Corner Clamp

Self-squaring joints, quick and easy.

ITEM# KHC-90DCC **\$34⁹⁹**

Face Clamp™

Perfectly flush Kreg Joints, in no time.

- The large pad on one arm is placed directly across the top of the joint line to help create a perfectly flush joint as the screws are driven.
- Uniquely designed to both hold the joint line flush while screws are driven, and to secure our portable Kreg Jig®'s into place on the workpiece.
- New Ergonomic comfort grip reduces slipping and eliminates the possibility of pinching.

Face Clamp™ Availability

Face Clamp™

Best for a majority of Pocket-Screw applications. 3" reach, will handle workpieces up to 2-3/4" thick.

ITEM# KHC-PREMIUM **\$21⁹⁹**

Large Face Clamp™

Good for applications where a slightly longer reach is helpful. 6" reach, will handle workpieces up to 5" thick.

ITEM# KHC-LARGE **\$29⁹⁹**

XL Face Clamp™

Good for applications where the longest possible reach is required. 10" reach, will handle workpieces up to 6" thick.

ITEM# KHC-XLARGE **\$39⁹⁹**

Multi-Purpose Push Stick

The Kreg Multi-Purpose Push Stick helps bring safety and organization to many of the tools in your shop. Whether you're working on your table saw, router table, band saw, or jointer, the Push Stick helps you maintain a safe distance between your hand and the saw blade, while at the same time keeping the tools you need most often, close at hand.

- Thin Design For Use With Small Stock
- Built-In Pencil Holder and Depth Gauge
- Balanced and Ergonomic Design
- Powerful Magnet Lets You Store It Almost Anywhere

ITEM# KMA1000
\$17⁹⁹

Drawer Slide Mounting Tool

Put an end to trying to mount drawer slides with one hand attempting to hold the slide in place while the other hand fiddles with the drill and screws. Attaching drawer slides — bottom mount or full-extension — perfectly parallel to the drawer opening is a snap with our Magnetic Drawer Slide Mounting Tool. The strong, rare earth magnets hold most types of metallic drawer slides in place, freeing your hands for the rest of the job. The tool includes an easy-grip handle and provides a flat surface for easy clamping. Designed to work with both face-frame and faceless cabinets, the Mounting Tool features large openings in the side to give you clear access for driving screws.

ITEM# NZ03 **\$29⁹⁹**

Drawer Slide Mounting Brackets

For both face-frame and faceless cabinets, aligning the drawer box to full-extension slides is simple with our Drawer Mounting Brackets. Simply clamp a bracket under each slide, set the drawer box into the drawer opening so it balances on the brackets, then pull the slide to the front of the box and drive your screws. The 12" brackets work with most common drawer sizes, and the 1/8" tabs on the front of bracket are designed to fit under mounted full-extension slides for perfect placement every time. Made of rugged, impact-resistant plastic for years of service, these brackets are a great addition to your workshop and toolbox.

ITEM# NZ03-B **\$9⁹⁹**

Trim Carpentry DVD

Gary Striegler, a second generation homebuilder with over 25 years of hands-on experience, demonstrates some of his time proven techniques for creating classic home details that set his work apart from the competition. In this two hour DVD, watch as Gary uses the speed, strength, and simplicity of Kreg Joinery to create a variety of eye catching trim details for the home.

Why Aren't You Building Beaded Face-Frames?

Beaded Face-Frames offer a high-end, rich appeal. Unfortunately, they can take hours of hand work on a table saw or thousands of dollars worth of specialized equipment to build correctly.

In October, Kreg will be introducing a revolutionary new tool designed to help you build the high-end beaded face-frames, faster, easier, and for far less money than ever before!

Visit www.kregtool.com/beaded to watch an exclusive video and get additional information about this exciting new product.
