Type	Features	Application	Polarity
Lincoln Electric Fleetweld® 180	Fleetweld® 180 offers excellent arc stability for excellent performance with power sources as low as 50V open-circuit voltage (OCV). A great stick electrode with the ability to start easily on low open circuit voltage welders.		AC, DC±
Lincoln Electric Fleetweld® 35	Fleetweld® 35 is a great electrode to use on jobs where the steel isn't clean.	Proven performer for sheet metal welding applications and AC pipe welding	AC, DC±
Lincoln Electric Fleetweld® 37	We've designed Fleetweld® 37 for excellent performance with smaller AC welders with low open-circuit voltages. It's an excellent choice for jobs involving irregular or short welds that require a change in position.	All-position electrode for low amperage welding on sheet metal – especially in applications where appearance is important.	AC, DC±
Lincoln Electric Fleetweld® 47	Easy-to-use, all-position electrode features high deposition rates for fast performance.	For sheet metal lap joints and fillet welds, general purpose plate welding and maintenance jobs.	AC, DC±
Lincoln Electric Lincoln® 7018AC	A great choice for low open circuit voltage AC power sources. Cold restrikes are no problem with this versatile, all-position electrode.		AC, DC±
Lincoln Electric Jetweld® LH®-70	Offers high deposition rates.	For welding on thick sections and restrained joints when cracking is an issue. It's also a good call when the project involves hard-to-weld steels.	AC, DC+
Lincoln Electric Excalibur® 7018-A1 MR	Industry premium, smooth arc, excellent strikeability, self-peeling slag and extremely low spatter levels. A low alloy, low hydrogen electrode with superior arc performance and operability	Low hydrogen stick electrode designed for all-position welding on 0.5% Molybdenum low alloy steels.	AC, DC+
Lincoln Electric Excalibur® 308/308H-16, 380L-16	Q2 Lot® - Certificate showing actual deposit chemistry and calculated ferrite number (FN) available online Designed with low carbon levels to help eliminate carbide precipitation in high temperature service Flux coating provides smooth arc transfer and slag is self-peeling for easy removal Versatile electrode designed to weld several types of austenitic steels	A743 and A744 Type CF-8 cast material Type 304 stainless steels	AC, DC+
Lincoln Electric Wearshield® ABR	Provides good resistance to abrasion, impact and some metal-to-metal wear Good hot forging properties Use on carbon, stainless and manganese steels Deposits limited to two layers Can be forged readily without affecting its mechanical properties	Crusher hammers Dozer blades Dipper teeth and lips Coal mining cutters Truck chain and gears	AC, DC+
Messer MG 80T -AC Plus	Designed to operate on almost any AC or DC welding machine even when the open circuit voltage is very low. The special coating protects the weld deposit from adverse conditions normally encountered in maintenance repair welding. Low amperage requirement controls distortion when welding thin sheet metal; spatter is kept to a minimum. Ideal for field repair work and out-of-position welding.	Fabrication of thin, medium, heavy and dissimilar gauge mild steels. Sheets, plates, angle iron, beams, pipes and machine parts can be welded in all positions. Also used for filling holes and build-up of over-machined and worn surfaces. Commonly used on applications requiring short, intermittent and spot welds because of the outstanding restarting characteristics.	AC, DC±
