## 1.0 INTRODUCTION

### 1.1 Philips Web Enabled Parts File (WEPF)

Philips Corporate IT created the WEPF (formerly called “*The PENA Parts Database*”) in 1984, based on specifications provided to them by the Philips Electronics North America Customs/Export Control Department.<sup>1</sup> Its primary function is to maintain on, an article level, tariff classification and other trade related data, in order to facilitate the import and export of these articles.<sup>2 3</sup> The WEPF must be utilized by approved Customs brokers in the United States to ensure consistent and accurate classification of imports, as well as other government agency (OGA) reporting.<sup>4</sup> It produces documentation to support both Customs and OGA reporting as well as a 5 year audit history of this data. Secondly, it provides links to wide variety of references, which help the users identify the required information. January 1, 2013 it was released with a new professional look and feel as well as additional support for the use of Free Trade Agreements.

### 1.2 An Informational Database

The WEPF **is not a classification tool. It is not a logic based system for the determination of import or export classification. These classifications must be determine by a person and uploaded into the WEPF, an informational database.** It contains the export classification on an article level basis. **REMINDER the Philips’ logic based system for proper license determination is PROTECT.**

The information in the WEPF is separated into five data categories, which correlate to the five database screens: Basic data, Other Government agency data, Special Trade Program data, Audit Data and Export Control Data.

---

<sup>1</sup> The information requirements and design were provided to CIT, by Katherine Terricciano, North American Philips Corporation Customs Manager. Originally written in COBOL (Customs Business Oriented Language) as a CICS (Common Information Control System) application, it was released in 1984. She provided CIT with expanded requirements and Microsoft Access database design in July 1994. The enhanced design enabled information required for both the importation and the exportation of articles to be maintained in the WEPF. The validation behind data input was greatly enhanced therefore eliminating duplicate and incomplete records. A complete Harmonized Tariff file with related special trade program, and other government agency information was added for reference. Trade action information for Anti-dumping and countervailing duty actions specific to Philips imports appeared in the file. Compliance Audit information supporting the classification decision such as rulings, explanatory and section notes was included in the database. All data elements defined in the Customs and Trade Automated Interface Requirements (CATAIR) were added and direct access was provided to external Customs brokers. Additional functionality was provided under the PENA CIT Y2K project in 1999. Periodic enhancements were made from 1999-2011. It was again redesigned over the course of 2012 in PHP-*Hypertext Preprocessor* and released anew January 1, 2013.

<sup>2</sup> Articles are systems, finished goods, subassemblies, components, raw materials, etc.in any form, manufactured, purchased, sold, received or exchanged.

<sup>3</sup> As of January 1, 2013, the WEPF includes articles imported, exported or utilized by Philips companies located in the United States. It can support the maintenance of information for articles traded between Philips entities located elsewhere.

<sup>4</sup> Complete requirements are located in the National Customs Broker Standard Operating Procedure

## 1.3 Benefits

The WEPF allows critical information required for the import and export of articles by Philips companies to be shared across business groups, product divisions and lines of business, regardless of the ERP system utilized by that business. Populating the file with the ‘other government agency’ data reduces the time spent by the Product Division in accessing and distributing this information. As a best practice, it is an effective component of the Philips Importer Self-Assessment Program, the Philips Customs and Export Control compliance system and the Philips Internal Control System. It contributes to the maintenance of our low risk importer status. It demonstrates our commitment to our mission “to increase shareholders value by minimizing the corporation’s duty burden while maintaining compliance with the Department of Homeland Security Customs and Border Protection and Bureau of Industry & Security laws, rules and regulations”.

## 1.4 WEPF User Manual

Contained in this manual are WEPF instructions on how to access and maintain various sets of data including screen shots with step-by-step instructions. There are 2 methods used for accessing a current version of this manual.

(1)

Corporate HQ Manual on Corporate Customs US Corporate Import Policies – Section [P3.Chapter 3: US Import Standard Operating Procedures \(SOP\)](#)

OR

(2)

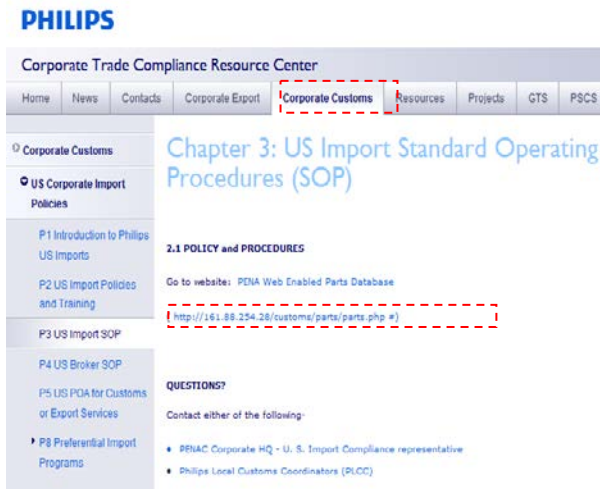

From every [WEPF page](#), click on the “**Documentation>User Reference Manual**” found on the bottom top right of the each WEPF webpage.

## 2.0 Navigating the WEPF

The WEPF can be accessed through the Corporate Customs US Corporate Import Policies website or direct access to the URL.

(1)  
Corporate Customs US Corporate Import Policies  
– Section [P3.Chapter 3: US Import Standard Operating Procedures \(SOP\)](#)

OR  
(2)  
Direct Access to URL <http://161.88.254.28:8080/WEPF/Home>

## 2.1 Logging In

Click Login on the right side of the screen in order to access the login screen.

You will see your user ID to the right of the Welcome, when you are successfully logged in.

## 2.2 Philips Employee Access

If you are a Philips employee with an existing WEPF account, your user ID is now your Code1 ID, although your password has not been changed.

Follow the instructions by entering your user name and password.

You will have read only access to the information on the WEPF.

## 2.3 Forgot Your Password

If you don't remember your password, click here to reset your password.

## 2.4 New Users

If you are a new user click Register and a new registration screen will appear.

## 2.5 Part Master Searches

There are six (6) drop down options under Part Master.

Browse Part Master  
Display Parts History  
Display PartMaster Analytics  
Download Parts Template  
Download Gen. Link Files Template  
Gen. Cert of Origin

The first is Browse Part Master.

Click on Browse Part Master.

Note: Most users have read only access to the information in the WEPF. A limited number of users are Administrators. Administrators will see 8 drop down options on the Part Master tab. Information regarding the additional functions granted to administrators, is contained in the Administrator Section of this manual.

## 2.6 Browse Part Master

The Browse Part Master screen will be visible. All visible boxes can be completed to access data based on a specified variable, including partial variables. The result key information including country of origin, the tariff code and the date the record was input or updated. Additional detail is available when you click the magnifying glass next to the record.

This is the result of the part number variable 927903400121.

You can get a PDF of all the data in the WEPF for a particular record by clicking the PDF icon at the bottom of any screen.

### 2.6.3 The “Others” Variable

The “others” variable enables the input of other items in the database as variables.

Note that the list is in the order of the data fields in the template, rather than in alphabetical order.

Select the type of variable and then input the condition in the next field.

PartMaster List

### 3.0 Viewing Part Details

#### Five Data Categories

Once you select a record via the view magnifying glass, you have visibility to each of the five categories of data:

**Basic Data, Other Gov, Special Program, Audit, Trade Action and Export Control**

Tariff Description	Duty	Start Date	End Date	Duty 2
ULTRAVIOLET LAMP	2.4000%	2012-10-31	9999-12-31	35.0000%

### 3.1 Basic Data Tab

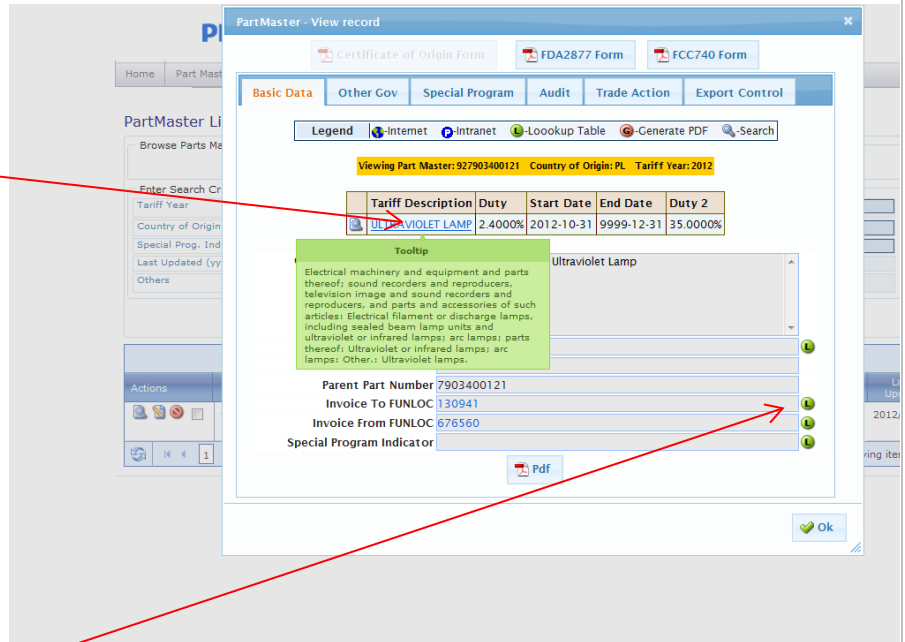

#### Basic Data Tab

The basic Data tab provides all the high level “basic” information on the record.

Place your cursor over any blue text to see expanded tool tip information.

Move your cursor and the tool tip will close.

As indicated in the legend the green circle L is a look up icon. Click the icon and you will be linked to the look up table.

The Legend shows icons and what they represent.

**World Icon- Internet** click action will take you to a designated internet site

**P –Intranet** - click action you will be taken to a designated intranet site.

**L-Lookup Table-** click action will take you to a designated lookup table.

**G-Generate PDF-** will generate a designated PDF file

### 3.1.2 ORU/FUNLOC

Various functions in the WEPF utilize depend on knowing the ORU/Funloc. Active ORU's are downloaded from the active SharePoint site. [ORU](#)

#### Lookup Funloc Table

This is the result of clicking on the funloc lookup icon.

Click okay to close any open lookup table. Invoice to funloc is a mandatory data element in the WEPF. Invoice from funloc is not a mandatory data element in the WEPF.

Code	Name
000001	tt

## 510(k) Premarket Notification

FDA Home Medical Devices Databases

A 510(k) is a premarket submission made to FDA to demonstrate that the device to be marketed is at least as safe and effective, that is, substantially equivalent, to a legally marketed device (21 CFR §807.92(a)(3)) that is not subject to premarket approval.

### 3.3 Toxic Substance Control Act TSCA

Articles, such as inks, paints, dyes, greases, solvents, and chemicals etc., regulated by the Environmental Protection Agency often require Toxic Substance Control Act Certification. These articles when imported by Philips are usually classified under chapters: 27, 28, 32, 34, 35, 38, 38 and 76. If there is a positive TSCA certification for these articles, the TSCA data field is completed with "Y" and if the TSCA Certification has been provided it is visible here along with the Material Data Safety Sheet.

#### Lookup DOT Number

Code ^	Name
1	The vehicle is 25 or more years old or the equipment item was manufactured on a date when no applicable Federal Motor Vehicle Safety, or Theft Prevention Standard was in effect. [591.5(i)] date when no applicable Federal Motor Vehicle Safety, or Theft Prevention Standard was in effect. [591.5(i)]
10	Reserved
11	The equipment item is subject to the Theft Prevention Standard and is marked in
12	The vehicle does not conform with all applicable Federal Motor Vehicle Safety Standards, but I am eligible to import it because:
12a	"I am a member of the armed forces of a foreign country on assignment in the United States;"

### 3.3 Special Trade Program Tab

[under construction]!!!!

#### Special Program Tab

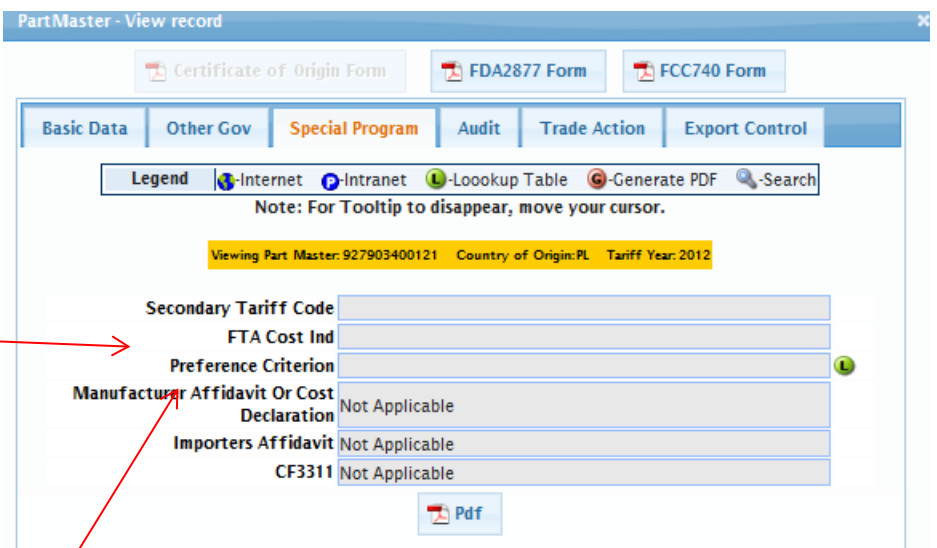

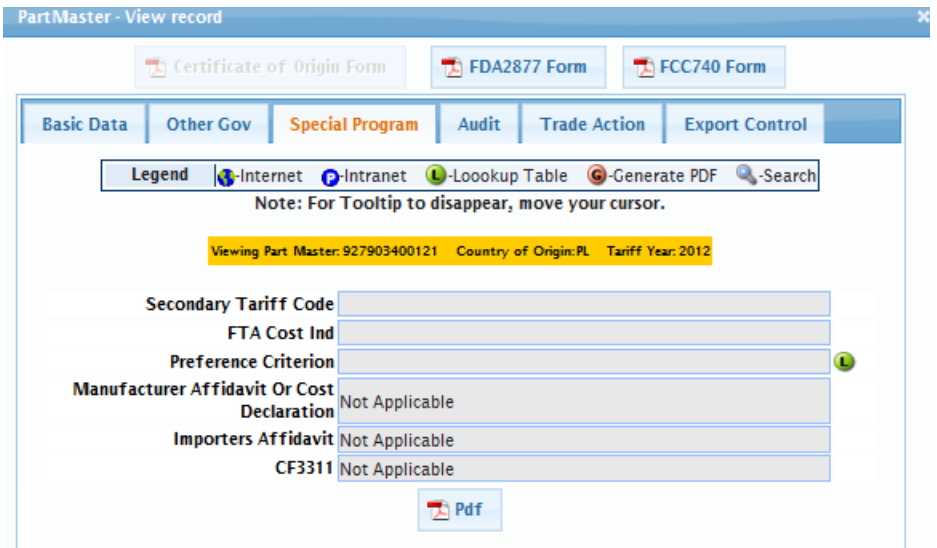

The special program screen displays supportive data and documents for the use of special trade programs. These are conditional and this screen gives access to the documents for each record.

The record key is [part number country of origin tariff year] enabling the information for each record to be maintained each year for minimum of 5 years.

Secondary Tariff Code is used to report the chapter 1-97 tariff code number. Documents to support these claims are Manufacturer's and Importer Affidavits and CF3311's.

The FTA Cost indicator and Preference Criterion are data elements reported on the various Certificates of Origin for FTA's.

The Manufacturer's Affidavit, Cost Declaration and NAFTA are documents supporting Chapter 98, and other FTA claims.

The Preference Criterion Reference allows you to view the defined preference criterion for each FTA.

**Lookup Preference Criterion**

Code	Name
A	The good is "wholly obtained or produced entirely" in the territory of one or more of the NAFTA countries as referenced in Article 415. Note: The purchase of a good in the territory does not necessarily render it "wholly obtained or produced". If the good is an agricultural good, see also criterion F and Annex 703.2. (Reference: Article 401(a) and 415)

### 3.4 Audit Tab

The Audit Tab provides access to documents and reference material to support Philips use of specific tariff codes. It also can be used to auto generate a Letter of Explanation (LOE) in evidence of the tariff treatment.

Functional Description enables the additional of information about the article, necessary for tariff treatment and OGA reporting that is not possible to maintain in a standard ERP system. This information is critical to the completion of the LOE, illustrating the tariff use and OGA reported information.

## 3.1.10 Letter of Explanation

### Letter of Explanation

A letter of explanation is auto generated by clicking the Letter of Explanation icon.

## PHILIPS

Philips Electronics N.A. Corporation  
Customs/Export Control  
3000 Minuteman Road, Andover, MA 01810-1099

RE: Philips Lighting Company (Somerset NJ)

To Whom It May Concern

Philips Lighting Company (Somerset NJ) is in the Lighting Sector of our company, as one of the world's largest lighting manufacturer, it offers a full range of leading-edge products in fluorescent, halogen, compact fluorescent, high intensity discharge, incandescent and specialty lighting categories that provides superior lighting solutions for all industrial, commercial and consumer applications.

This shipment consists of the articles described in the attachment to this letter and are classified as indicated therein.

I trust this information is satisfactory, however, if you require further information or have any questions regarding this matter, please contact me directly at 978 659 2204, email: katie.terricciano@philips.com.

Respectfully yours,

Katie Terricciano

RE: Philips Lighting Company (Somerset NJ)

To Whom It May Concern

927903400121 are PL-L 36W/01 4P UV-B Ultraviolet Lamp

These ultraviolet lamps are classified as medical lamps as defined in 21 CFR 878.4630. According to the General Rules of Interpretation, specifically, GRI 1, Classification under the HTSUS is made in accordance with the General Rules of Interpretation("GRIs"). GRI 1 provides that the classification of goods shall be determined according to the terms of the headings of the tariff schedule and any relative Section or Chapter notes. In the event that the goods cannot be classified solely on the basis of GRI 1, and if the headings and legal notes do not otherwise require, the remaining GRIs may then be applied.

When Applying GRI1 to the article in question it is properly classified under 8539.49.0040 HTSUS, which provides for:

*"Electrical machinery and equipment and parts thereof, sound recorders and reproducers, television image and sound recorders and reproducers, and parts and accessories of such articles: Electrical filament or discharge lamps, including sealed beam lamp units and ultraviolet or infrared lamps; arc lamps; parts thereof. Ultraviolet or infrared lamps; arc lamps: Other.: Ultraviolet lamps.."*

The rate of duty is 2.4000%.

### 3.5 Trade Action Tab

#### The Trade Action Tab

Trade Actions are defined as actions taken by customs authorities on behalf of other department's such as The Department of Commerce the International Trade Commission (Antidumping and Countervailing duty investigations). This screen enables the identification of these cases on a product level, the collection of required certifications.

The manufacturer section allows the reporting of this information which is critical to the correct trade action and related duty and fee collection. It also enables the proper other government agency such as the Food and Drug Administration and the Federal Communication. It also supports the autogeneration of Free Trade Agreement Certificates of Origin.

## 4.0 Data Input & Integrity

### 4.1 Data Integrity

Data integrity is everyone's responsibility. Basic edits have been put into the application to enforce consistency of the data. PENA Customs Analysts are not responsible for inaccurate or incomplete 'other government agency' data. They will work closely with their accounts to ensure that we reach a high level of performance. This is measured by the percentage of completed required data, the accuracy of the data and the timeliness of the data.

### 4.2 Where does the data come from?

The WEPF is populated with information input on an article level received via an integrated Email classification request called ALICE.

Or

The information is uploaded from a **Microsoft Excel** worksheet. The Customs Control Officer/ Export Control Officer at the US Product Division, Business Group or Business Line will coordinate other disciplines to ensure that all of the applicable data appears in the worksheet on an article number level.

### 4.3 Customs Control Officer/Export Control Officer Responsibility

The database "batch" files and 'ALICE' requests are to be sent in the appropriate Microsoft Excel format on a periodic basis to their PENA Customs Analyst. **The frequency of the distribution should be scheduled in an appropriate manner so that the classification and related information for articles to be imported or exported is available in the WEPF prior to this activity.** The Export Control Officer must supply the Tariff Code and the related ECCN MILCAT, License Type, License Exception and SGI. The Customs Control Officer can supply a Tariff Code. If your imported product is regulated by any of the 'Other Government Agencies' your input file must supply the conditional information. This is the information required under the regulations of the designated 'other government agencies' such as The Food and Drug Administration, the Federal Communication Commission, The Department of Transportation, and Environmental Protection Agency. The Customs Control Officer may need to obtain the other

government agency information from their internal network. They must make the WEPF an element of their Customs and Export Control Internal Control Procedure (ICP).

#### *4.4 PENA Customs Analyst Responsibility*

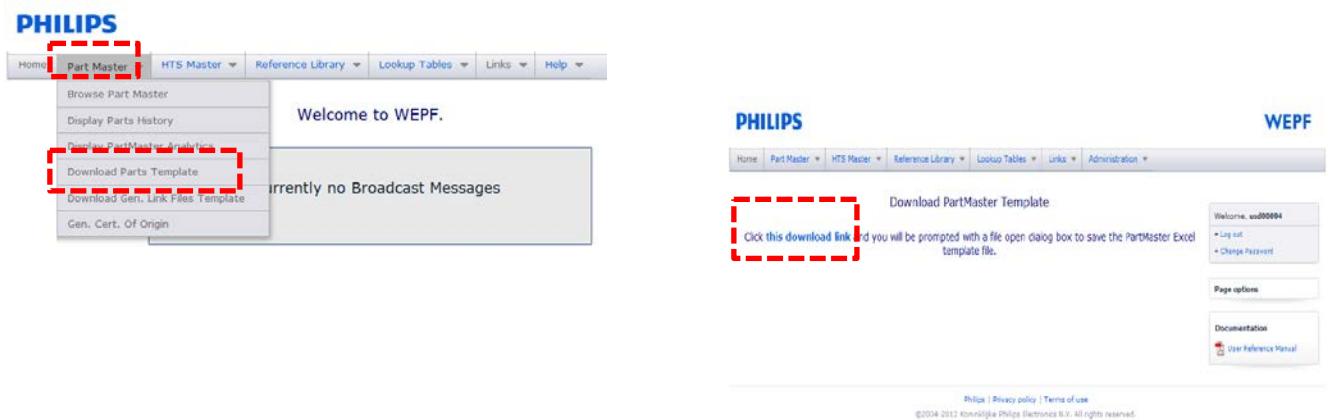

The PENA Customs Analyst is responsible to provide WEPF training to the Customs Control Officer and ensure that timely received input files are uploaded successfully. **The PENA Customs Analyst is responsible to confirm the tariff code, confirm the Export Control information prior the WEPF upload.** The system validation of the data is not active when loading from a batch file. The system validation is active when inputting single records directly into the system. Therefore it is critical that you work closely with your accounts to ensure that they are providing you will complete and accurate ‘Other Gov’ data. **Remember garbage in garbage out.**

## 5.0 Data Input and Format

The Parts Template is available in the WEPF.

### 5.1 Parts Template

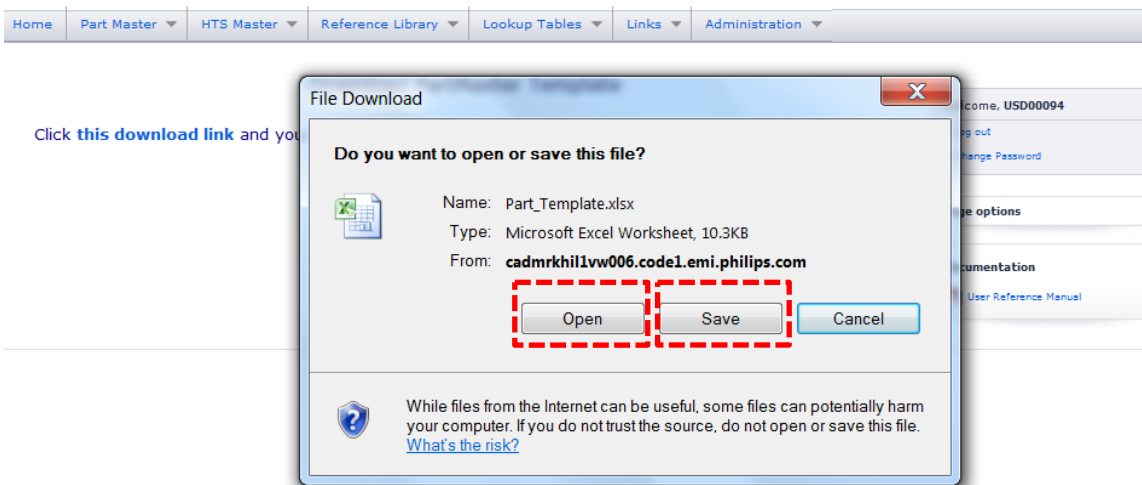

Place cursor over the Part Master Tab select > **Download Parts Template**. A new screen will open. Follow the instructions and click >this download link.

You will be prompted to open or save the blank template. You can open and complete it. Then save it to your drive.

Or

You can save it a blank template to your drive for future use.

It contains **all** data elements required for compliant import and export transactions on an article number level; although some of these data elements are not applicable to a particular Product Division or article number.

**All of the data is to be entered as text and the column titles and column order cannot be changed.**

**The mandatory fields have 'red titles'** and they are indicated as mandatory elements in the record layout definition. If you need assistance to determine how to populate these columns, please contact your PENA Customs Analyst.

[\(Return to fifth drop \)](#)

### Assists

If you wish to supply assist information for articles after you have sent the *PartMExp* template you would resend the original mandatory data and include the assist related fields so that it can be updated into the system.

### Deleting Data from a data segment

If you wish to delete information from a data segment of an existing record, place an asterisk by itself in that field and when that part template is loaded the data in the field will be deleted.

### Deleting an article via data upload

If you wish to delete a part, put an asterisk before the part number and when the part template is loaded, the complete part and all of its' associated data will be deleted.

## On line record deletion

If you have administrative privileges and wish to delete article(s) immediately online browse to access the records by any available data element.

Click the box to the left of records you wish to delete> then select multiple delete.

## 6.0 Alternative Access to WEPF Information

### 6.1 Nationally Approved Customs Broker Responsibility (Still Under Construction)

The Nationally approved Customs Brokers are responsible to access the FTP site and download the WEPF file daily to ensure that they have the information prior to importation. You can also get an output file on an FTP site for use in your internal applications. You will need an FTP program. Native FTP works just as well as any other package.

Users may also download the parts file via FTP using the following information (anonymous login is not allowed):

FTP Site : **ftp-wjq.philips.com**

Default Directory: **/home/customs2/ftp-out**

User Id : **customs1**

Pw : **bluetongue**

6.2 Alternative Netscape access NOT INTERNET EXPLORER

The Customs Parts file is also available for download via Netscape ONLY (not IE) at the following ftp site: <ftp://ftp-wjq.philips.com/customs/out>

- Full parts File is : CustomsPartsFull.txt
- Daily Parts Files : CustomsPartsDaily.txt
- Daily Parts Files are named in the following format : CustomsPartsmmddyyyy.txt (i.e. CustomsParts08032004.txt)

There are two files available:

A daily file entitled [CustomsPartsDaily.txt] contains a text file of daily incremental data

A daily files are entitled [CustomsPartsmmddccyy.txt] and contain a text file of daily incremental data where mm=month, dd=day, cc=century and yy=year.

The full file entitled [CustomsPartsFull.txt] contains a text file of the full database.

6.2.1 FTP File Layout(Still Under Construction!!!!!!)

  
"FTP File Layout  
NU.xls"

Click here for the record layout for this text file →

  
CustomsPartsFull.txt

Here is an example of the FTP File →

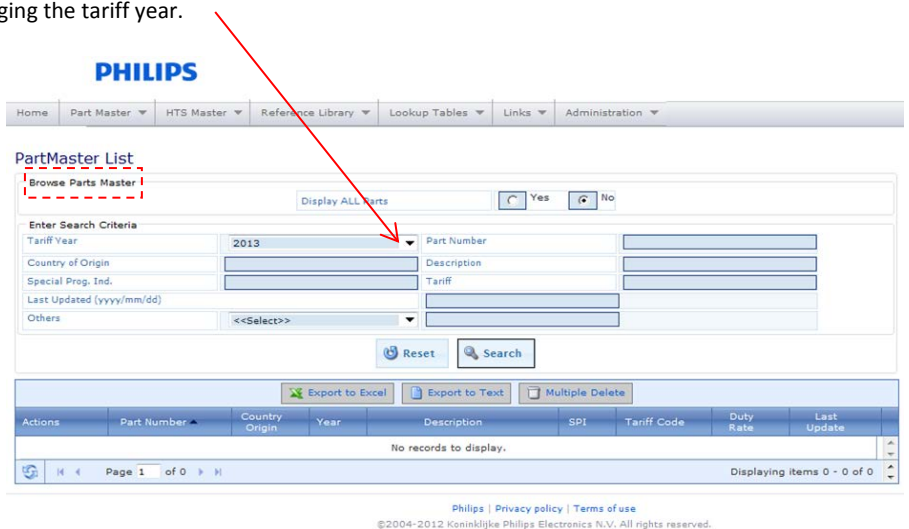

### 6.3 Help for Third Party Service Providers (Still Under construction!!!!!!)

If you are a third party service provider and you have trouble with the FTP site, contact the CIT help Desk at 1 866 552 1292. Identify yourself as a service provider; explain the problem and they will assist you. If you have questions regarding the file format, contact the PENA Customs Analyst handling your primary account and they will assist you.

#### Validity and Archiving

The record key is part number country of origin and tariff year. Therefore each record is actually stored as "partnumbercountryoforigintariffyear." This allows tariff and other government agency information to be influenced by origin for free trade agreement tracking and other government agency reporting. It also enables access to records information for five years by changing the tariff year.

Tip: The multiple variable inputs can be utilized to show parts with certain criteria for any year of choice for the past 5 years.

#### Technical Support

Please read over this manual where you will find answers to most frequently asked questions and other troubleshooting tips.

For additional assistance, contact the WEPF ADMINSTRATOR by clicking on the 'HELP' button found on the far right of the tool bar, visible on each screen. Then click 'Contact Administrators'. Complete the form by providing a brief description and if available, browse to attach a screen print of the problem. Then click send to submit the form.

The Upload Partmaster Data pull down is visible only to administrators.

Only administrators will be able to upload Partmaster Data.

Therefore Customs Control Officers complete database templates and send them to the administrators for loading.

Instructions for database upload.

The efficient method for the Partmaster Data upload is via a completed Partmaster Data template.

Upload Data

Upload Type:  Scheduled (Batch)  Immediate (Now)

- Scheduled (Batch)** - Use this when there are 1000+ records in worksheet
- Immediate (Now)** - Use this when there are up to 1000 records in worksheet

File size cannot be more than 10 MB.

When executing "Immediate (Now)" upload and processing, click the 'View Result' button to view the Process worksheet.

To upload and process another file, click the 'Reset' button and repeat the above steps. Please click the 'Reset' button before exiting the function.

Enter Batch Search Criteria

Messages:

Select the completed Partmaster Template.

FW2	Fish Wildlife Data IS Required
TL1	Tobacco, Alcohol and Firearms Data MAY Be Required

TL2 Tobacco, Alcohol and Firearms Data IS Required

UofQty is the reportable quantity unit of measure for that tariff code. This information must be reported on the customs entry and therefore it is important that the import invoice contain this level of data for an article under that particular tariff number.

### **DRAM Certificates**

Historically the importation of DRAMS or other products under a countervailing duty order may require certification by the importer that the articles in question do not include items under the order. This section of the WEPF provides the template for the completion and distribution of such blanket annual certificates. These documents are maintained in the application for five years. The document is uploaded utilizing the **Upload supportive Files.**

N215995

[N215995](#)  
May 16, 2012  
CLA-2-85:OT:RR:NC:1:110  
CATEGORY: Classification  
TARIFF NO.: 8539.49.0040  
Ms. Laura Lyons EPL, Inc. 303 Velocity Way Foster City, CA 99403  
RE: The tariff classification of an ultra violet bulb from China.

Dear Ms. Lyons:

In your letter dated April 27, 2012, you requested a tariff classification ruling. A representative sample was submitted with your request and will be returned to you.

The item to be imported is referred to as a UV Mercury bulb. This bulb/lamp has a quartz envelope with a ceramic cap and lead wire on each end. Although the submitted sample has a 6" envelope, a wattage of 3000W and a voltage of 300V, you state that this product will also be imported in a variety of sizes. These UV bulbs are used in the lamp boxes of EFI printing systems to "cure" special ultra violet ink.

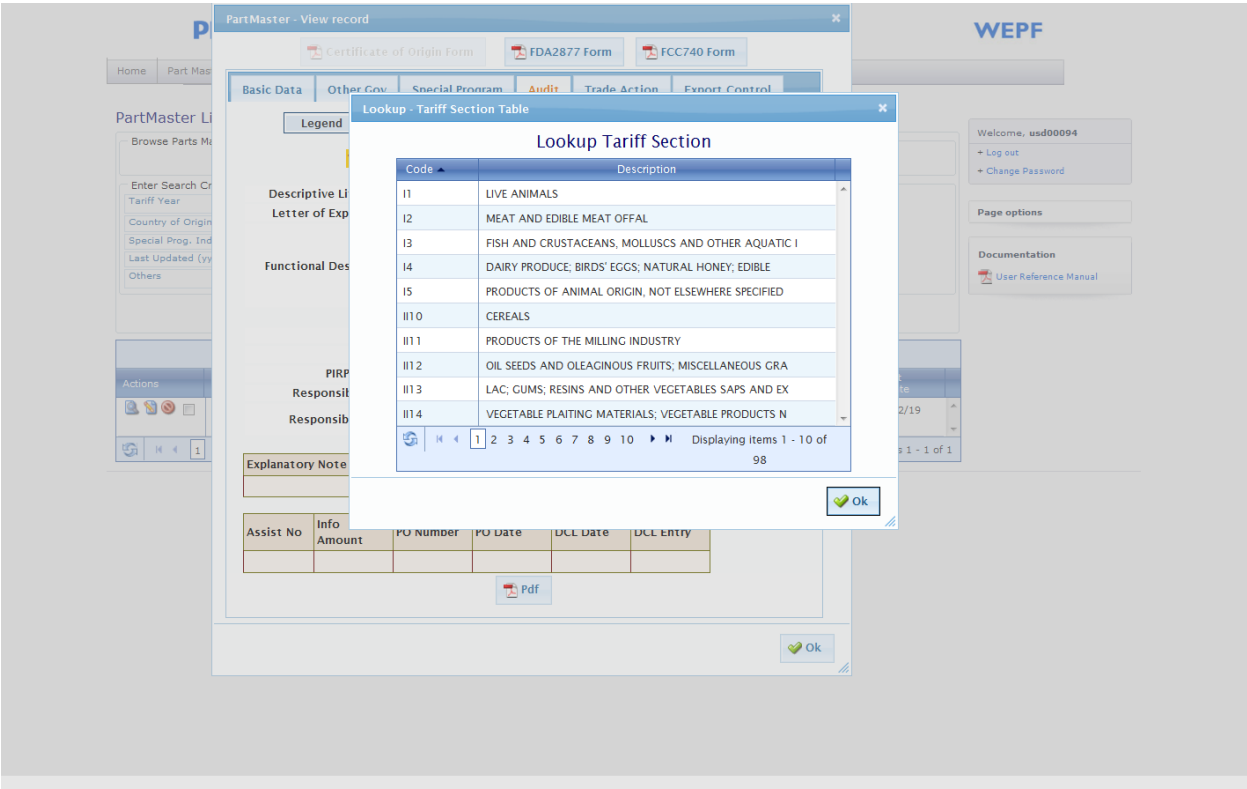

The applicable subheading for the UV Mercury bulb will be 8539.49.0040, Harmonized Tariff Schedule of the United States (HTSUS), which provides for Electric filament or discharge lamps...Ultraviolet or infrared lamps...Other, Ultraviolet lamps. The rate of duty will be 2.4 percent ad valorem.

Duty rates are provided for your convenience and are subject to change. The text of the most recent HTSUS and the accompanying duty rates are provided on World Wide Web at <http://www.usitc.gov/tata/hts/>.

This ruling is being issued under the provisions of Part 177 of the Customs Regulations (19 C.F.R. 177).

A copy of the ruling or the control number indicated above should be provided with the entry documents filed at the time this merchandise is imported. If you have any questions regarding the ruling, contact National Import Specialist Thomas Campanelli at (646) 733-3016.

Sincerely,  
Thomas J. Russo Director National Commodity Specialist Division

The screenshot displays the Philips WEPF system interface. At the top, there are navigation tabs: Home, Part Master, HTS Master, and Reference. The main content area is titled "Browse HTS Master" and includes a search section with "Enter Search Criteria" and "Tariff Year (YYYY)" set to 2012. A modal window titled "HtsMaster - View record" is open, showing details for "Detail: HtsMaster" with a highlighted "Viewing HtsMaster Key - Tariff Code: 8539320090" and "Tariff Year: 2012". The details include:

- Tariff Code: 8539320090
- Tariff Year: 2012
- Tariff Description: METAL HALIDE LAMP, OTHER
- Tariff Duty Rate: 2.4000%

Below the details is a "Lookup - Tariff OGA Table" modal window. It contains a table with the following data:

Code	Description
64	DT2 FC3
7	FD4 FS2 FW2
8	FD4 FS2 FW1
9	FD4 FS2

The table footer indicates "Displaying Items 61 - 64 of 64". To the right of the table, there is a list of related terms including "mercury vapor discharge lamps", "halide discharge lamps", "ultraviolet lamps", "television image tubes", "sound recorders", "parts and accessories", "beam lamp units", "infrared lamps", "arc lamps", "discharge lamps", "Mercury or sodium vapor lamps", and "metal halide lamps; Other".

The background interface also shows a "Welcome, USD00094" message with "Log out" and "Change Password" options, and a "Documentation" section with a "User Reference Manual" link.

	A	The good is "wholly obtained or produced entirely" in the territory of one or more of the NAFTA countries as referenced in Article 415. Note: The purchase of a good in the territory does not necessarily render it "wholly obtained or produced". If the good is an agricultural good, see also criterion F and Annex 703.2. (Reference: Article 401(a) and 415)
	B	The good is produced entirely in the territory of one or more of the NAFTA countries and satisfies the specific rule of origin, set out in Annex 401, that applies to its tariff classification. The rule may include a tariff classification change, regional value-content requirement, or a combination thereof. The good must also satisfy all other applicable requirements of Chapter Four. If the good is an agricultural good, see also criterion F and Annex 703.2. (Reference: Article 401(b))

### Welcome to the Regional Trade Agreements Information System (RTA-IS)

This database contains information on only those agreements that have either been notified, or for which an early announcement has been made, to the WTO. For further information please consult the [user guide](#) and/or [contact RTA section](#).

It allows you to retrieve information on RTAs notified to the GATT/WTO:

- [By country/territory](#)
- [By criteria](#)

You may also consult the:

- [List of all RTAs in force](#)
- [List of early announcements](#)
- [Pre-defined reports and Summary Tables containing WTO Figures on RTAs](#)

Users seeking more detailed information on tariff and trade data relating to RTAs may wish to consult the WTO's Tariff Analysis Online (TAO) at <http://tariffanalysis.wto.org> or the International Trade Centre's Market Access Map database: <http://www.macmap.org>

DISCLAIMER

Note: WTO statistics on RTAs are based on notification requirements rather than on physical numbers of RTAs. Thus, for an RTA that includes both goods and services, we count two notifications (one for goods and the other services), even though it is physically one RTA.

The World Trade Organization (WTO) deals with the global rules of trade between nations. Its main function is to ensure that trade flows as smoothly, predictably and freely as possible.

## 8.0 Administrators

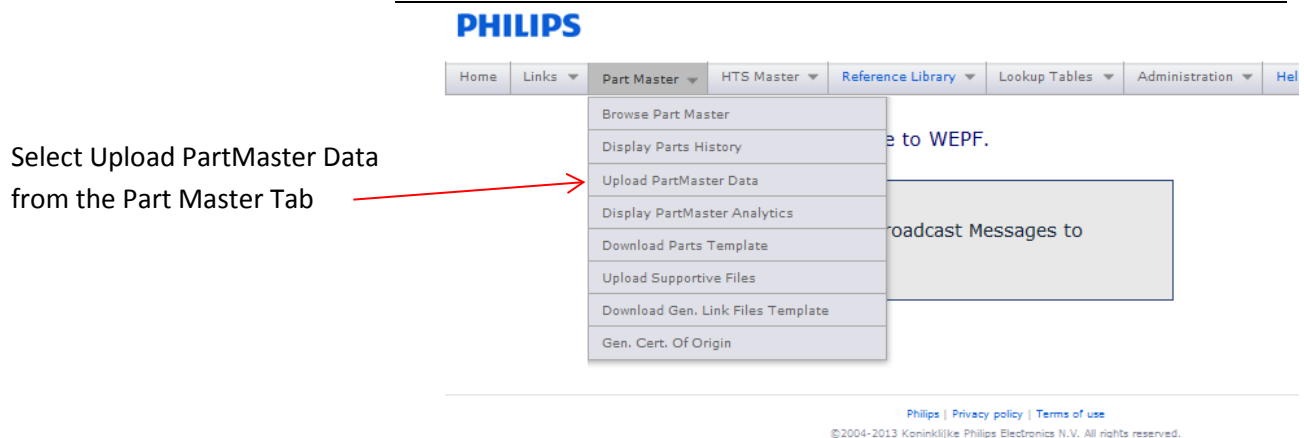

Regular users have read only access to the information in the WEPF. A limited number of users are Administrators, with the ability to upload and delete parts to the WEPF as well as associated linked documents. The two additional items under the Part Master Tab support these functions.

Upload PartMaster Data and Upload Supportive Files

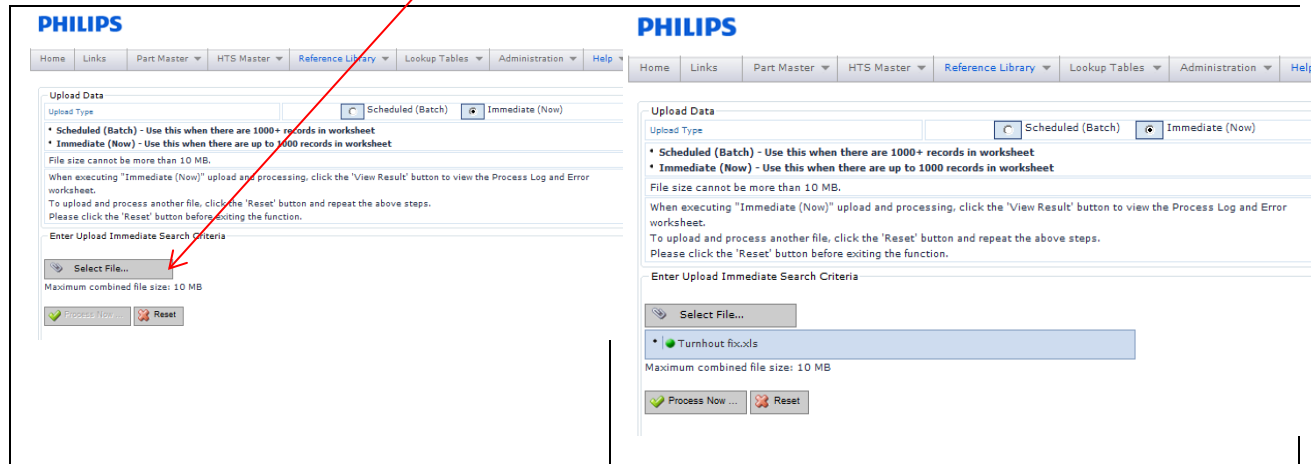

### 8.1 Uploading Parts

Review the completed template to identify missing or bad mandatory data. Review assigned HS Codes and return records for modifications, if necessary. There is an anomaly in \*.xls files that may cause an error in the program code which edits for a valid Tariff number. If this occurs the file should be changed to an \*.xlsx file for loading.

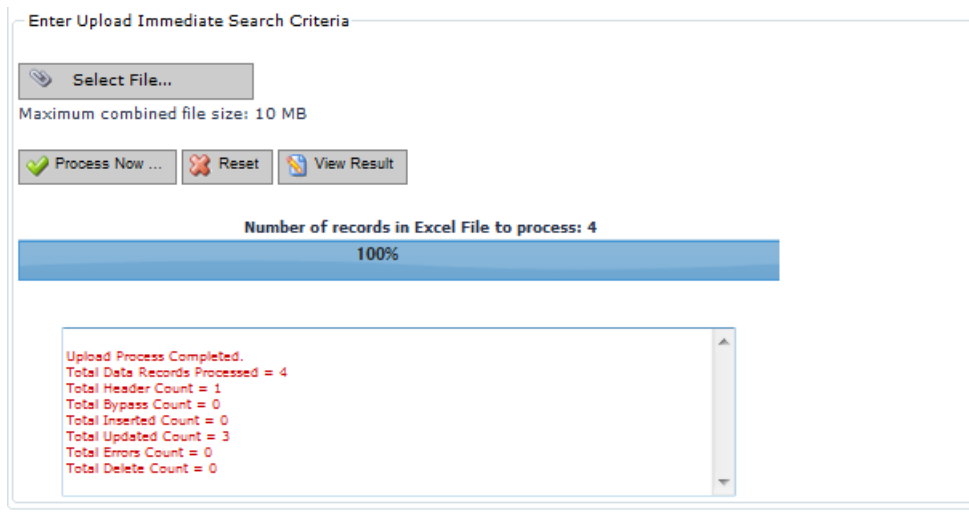

There are two options for uploading a file: Immediate (now) or Scheduled (batch). Files greater than 10MB should be batch loaded. Follow the instructions on the screen. Choose load option. Click Select file and chose your excel file for upload. You file name will appear below "Select File"/

When your selected file is successfully uploaded a green dot appears before the file name. If there is a problem a red dot will appear before the file name.

## Select Process Now

The result of the process will appear in the box. The header row counts as one record. Click View Results to see an output file with the results. Click reset before uploading another file.

## PHILIPS

### Upload Data

Upload Type   Scheduled (Batch)  Immediate (Now)

- **Scheduled (Batch)** - Use this when there are 1000+ records in worksheet
- **Immediate (Now)** - Use this when there are up to 1000 records in worksheet

File size cannot be more than 10 MB.

When executing "Immediate (Now)" upload and processing, click the 'View Result' button to view the Process Log and Error worksheet.

To upload and process another file, click the 'Reset' button and repeat the above steps.

Please click the 'Reset' button before exiting the function.

### Enter Upload Immediate Search Criteria

 **Select File...**

Maximum combined file size: 10 MB

 **Process Now ...**  **Reset**  **View Result**

The Upload Partmaster Data pull down is visible only to administrators.

Only administrators will be able to upload Partmaster Data.

Therefore Customs Control Officers complete database templates and send them to the administrators for loading.

## Instructions for database upload.

The efficient method for the Partmaster Data upload is via a completed Partmaster Data template.

Select the completed Partmaster Template.

The title of the file you have selected will appear below the Select File field.

Upload Data

Upload Type  Scheduled (Batch)  Immediate (Now)

- **Scheduled (Batch)** - Use this when there are 1000+ records in worksheet
- **Immediate (Now)** - Use this when there are up to 1000 records in worksheet

File size cannot be more than 10 MB.

When executing "Immediate (Now)" upload and processing, click the 'View Result' button to view the Process worksheet.

To upload and process another file, click the 'Reset' button and repeat the above steps. Please click the 'Reset' button before exiting the function.
