Wheel and Torque Specifications

Wheel and tire information

Tires

Goodyear Marathon 15" tires ST 225/75R 15 load range D 65 PSI Goodyear Marathon 14" tires ST 215/75R 14 load range C 50 PSI Michelin 16" tires LTX M/S LT 225/75R 16 load range E 80 PSI **Rims** 14" rims 14x5.5, 5 lug bolt pattern 4.5", offset "0" center bore 3.19"

15" rims 15x6, 6 lug bolt pattern 5.5", offset "0" center bore 4.28"

16' rims 16x6, 6 lug bolt pattern 5.5", offset "0" center bore 4.28"

Lug nuts

Lug nuts socket sizes 1990's 13/16" 2000 and up $\frac{3}{4}$ " thread $\frac{1}{2}$ "x 20 pitch

Other Common Information

Hitch ball size -2" up till 1969 2 5/16" from 1970 and newer(several exceptions)

Trailer widths the European trailers 92" 96" in 1994 the trailer was made 5.5" wider on 25" and above to 102" and is called a Wide Body

Trailer shocks Gabriel 9.39 x 14.46 Airstream part number 0220003

Hitch Ball Height

The proper height will very according to the weight you carry and the tires you use. However, checking the height on your trailer is relatively easy:

- 1. With the trailer on fairly level ground measure from the ground to the bottom of the frame, front and rear.
- 2. Adjust front jack until measurements are equal.

3. Now measure from the ground to the inside top of ball coupler. This figure is the hitch height. The hitch ball is then usually set $\frac{1}{2}$ " to 1" higher, according to the spring weight of your tow vehicle, to allow for it to settle when the trailer is hitched up.

How to get the Slope clearance measurement

Measure the ground clearance at the skid plates near the bumper, then measure the distance from the rear axle to the skid plates. Take the ground clearance and then divide the length to get the max slope.

Bambi Safari

410874 (6 Lug)	RIM SPECIFICATIONS	TIRE SPECIFICATIONS (410874-100)
	Size: 15" x 7" Aluminum	
	Bolt Pattern: 6 on 5.50	Load Range: D
