"WILDFIRE PROTECTION EQUIPMENT AND SUPPLIES"

OCTOBER 2015

## **DOD FIRE DEPT PURCHASING PROGRAM**

The items from the "Wildfire Protection Equipment and Supplies" catalog are available for purchase by North Carolina fire departments through the N.C. Forest Service. All items are designed and manufactured according to U.S. Government specifications for use on wildland fires. The NC Forest Service purchases the items for fire departments from Dept. of Defense Email/GSA which negotiates contracts through U.S. Government Purchasing contracts. Most items are stocked items, but are periodically unavailable during periods of extended wildland fire operations in the western states. Under normal circumstances, items in stock are delivered within 30 days of the order date. Items that are not available are shipped at a later date when available. Since these items are on negotiated contracts, prices usually change in October and April but can change at any time. Please check with your local County Forest Ranger for current pricing or log on to our website at [http://ncforestservice.gov/fire\\_control/fc\\_gsa.htm](http://ncforestservice.gov/fire_control/fc_gsa.htm)

## WATER HANDLING ACCESSORIES

### GENERAL INFORMATION

- Unless otherwise noted, the working pressure of all items under this heading is 600 psi.
- All flow rates given are at 100 psi flowing pressure.
- 3/4" connections in this catalog use GHT (Garden Hose Thread) threads and NH threads interchangeably, both designations are the same threads.
- The NFPA (National Fire Protection Association) standard calls for 3/4" connections and larger to be NH (national standard thread). The wildland agencies have adopted this except for the 1" connections which are NPSH (straight pipe thread).
- This catalog includes some threads that do not follow this standard. We have attempted to indicate the threads used on each item.
- All female connections come with gaskets in place.
- All aluminum items are hardcoated for durability.

## CLASS A FOAM

The N.C. Forest Service has Class A Foam available for purchase by fire departments. The foam can be used on all Class A fires and can greatly increase wetting capability of water. Astaris Phos Chek is currently the available brand for purchase. The N.C. Forest Service obtains the foam through a negotiated blanket purchase order which results in substantial savings. In turn, the foam is sold to fire departments at the same price as purchased by the N.C. Forest Service. The current price is \$15.65 per gallon and is sold in 5 gallon pails. If interested in purchasing Class A Foam contact your local County Forest Ranger or submit your request on a Order Form.
