

Wireless Java Programming for Enterprise Applications

Mobile Devices Go Corporate

Dan Harkey • Shan Appajodu • Mike Larkin

WILEY PUBLISHING, Inc.

Contents

Foreword	v
Preface	vii

Part 1. Technologies for Wireless Device Computing 1

Chapter 1. Introduction to Wireless Enterprise Applications. 5

Applications on Wireless Devices	6
Enterprise Applications	6
Enterprise Applications and Wireless Devices Combined	7
An Enterprise Computing Architecture for Wireless Devices	9
Wireless Connectivity from Personal to Regional	11
Summary	13

Chapter 2. Wireless Devices: The Hardware Platforms. 15

Simple Cell Phones	17
Internet-Ready Cell Phones	17
Mobile Information Devices	19
Java-enabled, Two-Way Pagers	19
Java-enabled Cell Phones	20
Hardware Feature	21
Java-enabled Connected PDAs	21
Palm Vx Plus Novatel Modem	21
Compaq iPAQ plus Ricohet AirCard 300 Modem	23
Communicators	24
Nokia 9290 Communicator	24
Summary	25

Chapter 3. Wireless Devices: Networking Technologies 29

Mobile and Wireless Network Protocols	30
Basic Terminology	30
A Cell Phone Operational Scenario	31
Wireless Network Technologies	33

Wireless Network Technologies 37

- Advanced Mobile Phone Service (AMPS) 38
- Global System for Mobile Communication (GSM). 39
- High Speed Circuit-Switched Data (HSCSD). 39
- General Packet Radio Service (GPRS). 40
- Enhanced Data Rates for Global Evolution (EDGE). 41
- Bird's Eye View of GPRS 42
- Time Division Multiple Access (TDMA) 44
- Code Division Multiple Access (CDMA) 44
- Integrated Digital Enhanced Network (iDEN) 46
- I-mode 46
- 3G 47
- Data Rates. 49
- Mobile Position Location Technologies. 51

Wireless LANs and Personal Area Networks (PANs) 55

- IEEE 802.11 Wireless LAN 56
- Bluetooth—A Revolutionary Basis for Developing Wireless Applications 56
- Bluetooth System Architecture. 58
- Bluetooth and Hardware Requirements. 61
- Bluetooth: Hardware Implementations 63

Summary. 64

Chapter 4. Wireless Devices: Service Technologies 65

Short Messaging Service (SMS) 66

- SMS Under the Covers 67
- Advantages of SMS 71
- Disadvantages of SMS 71
- The Future of SMS 71

Unstructured Supplementary Services Data (USSD) 72

- Advantages of USSD 72

i-Mode 73

- I-mode Technology 73
- Mode of Transmission 73
- The Markup Language 74
- The Future of I-Mode 75
- Java on I-Mode. 75

Wireless Application Protocol (WAP) 75

- WAP Architecture 75
- A WAP Scenario 76
- WAP Protocol Stack 77

Contents

The Web and WAP Content Presentation Models	81
WAP Security and WTLS	83
The Future of WAP	86
Enhancements to the Wireless Application Environment (WAE)	88
Comparison of WAP vs. I-Mode	95
VoiceXML	96
An Architecture for Voice-Driven Applications	98
The VoiceXML Server	100
VoiceXML and Voice-over-IP (VoIP)	104
Summary	106
Chapter 5. Wireless Devices: Middleware	107
Operating Systems for Handheld Devices	108
Blackberry OS	108
Cell Phone OSs	110
Palm OS	110
Windows CE	113
Symbian OS	114
The Linux Variants	116
Handheld Device Middleware Challenges	117
Communication Protocols	117
Security	119
Micro Databases	121
Summary	123
Chapter 6. Wireless Devices: Content Delivery	125
Content Formats for Display—Markup Languages	125
The Role of XML	126
Handheld Device Markup Language (HDML)	130
Compact HTML (cHTML)	130
Wireless Markup Language (WML)	131
Extensible HyperText Markup Language (XHTML)	133
XHTML 1.0	134
XHTML Basic	135
What Is XHTML Modularization?	136
VoiceXML	137
Content Synchronization Techniques	140
Web Clipping	140
SyncML	146

Summary	149
Chapter 7. Wireless Devices and Java	151
Evolution of J2ME	151
What Does Java Bring to Consumer Devices?	152
J2ME: The Early Years	154
Introducing the J2ME Platform	158
Configurations and Profiles	158
Configurations	159
CLDC in Detail	163
Profiles	169
Java Card	180
Smart Card	180
Summary	190

Part 2. Core Wireless Device Computing Programming . . . 191

Chapter 8. Developing WML Applications	193
The WML User Interface	193
WML Documents	194
Developing a WML Application	196
WML Development Emulators	199
The University Registration Example	200
WML Tags	202
Cards and Decks: The Details	202
WML Display Elements	203
WML Variables	211
WML Events	212
WML Tasks	214
The Registration WML Listing	215
Introduction to WMLScript	219
Variables and Data Types	222
Pragmas	222
Operators	223
Functions	224
Statements	225
Libraries	226

Programming Tips	227
Summary	228
Chapter 9. Introduction to MIDP Programming	229
The J2ME MIDP User Interface	229
MIDP Applications	231
Developing a MIDP Application	232
MIDP Development and Deployment: The Details	233
The University Registration Example	242
The MIDP Classes	243
The MIDlet Class	243
MIDP GUI Classes	247
The MIDlet High-Level Events	258
The Registration Example Listing	262
Low-Level APIs and Event Handling	268
The LowLevelMIDlet Listings	276
Summary	284
Chapter 10. Advanced MIDP Programming	285
Network Programming	285
Generic Connection Framework	287
MIDP DATABASE PProgramming	306
Record Management System (RMS)	307
AddressMIDlet Using RMS	308
MIDlet Provisioning	325
Technology Overview	327
Java API for Bluetooth (JSR-82)	331
A Simple Bluetooth Application	338
Bluetooth Simulators	343
Summary	345
Chapter 11. Developing VoiceXML Applications	347
VoiceXML Applications	347
Developing a VoiceXML Application	348
VoiceXML Tools	352
The University Registration Example	354
VoiceXML TAGS	355
Root	355

Dialogs	357
Prompts	362
Fields	364
Audio Output	370
Audio Input	373
Events	379
Call Control	388
Miscellaneous	390
Introduction to ECMAScript	397
Variables and Data Types	399
Built-in Objects	399
Operators and Expressions	400
Functions	401
Statements	402
VoiceXML Programming Tips	403
General Programming Tips	403
Grouping Dialogs	404
Where to Define Grammar	404
Fetching and Caching Resources to Improve Performance	404
Summary	405

Chapter 12. Your First Java Card Application **407**

Applications Suited For Java Cards	408
The Java Card VM	409
APDUs	413
The Java Card API	416
Preparing Your Cards and Activating Cardlets	425
The Host Application	429
Summary	434

Part 3. Wireless Device Programming Meets the Enterprise 435

Chapter 13. J2EE and Wireless Applications **437**

J2EE Architecture: An Overview	438
Containers	439
Web Components	443
Enterprise JavaBeans	443

Component Development, Packaging, and Deployment	444
Programming Servlets	445
Servlet Initialization and Life Cycle	446
Writing Servlet Application Functions	447
Writing JavaServer Pages	449
JSP Objects	450
JSP Elements	450
Developing J2EE Applications	453
The RoomFinder EJBs	455
Developing the RoomFinder Application with JBuilder	456
Summary	484

Chapter 14. Web Services for Wireless Devices 485

Web Services—Everyone’s Favorite Buzzword	485
What Web Services Are...and Aren’t	486
Web Services—a Bird’s Eye View	488
Technology Building Blocks for Web Services	490
Web Services Architecture	492
Web Services Operations	493
Web Services Standards—The Devil Is in the Details	497
Simple Object Access Protocol (SOAP)	497
Web Services Description Language (WSDL)	502
Universal Description, Discovery, and Integration (UDDI)	504
Putting It All Together—Web Services Examples	512
EJBs as Web Services	512
Create the Web Service EJBs	514
Deploy the RoomFinder EJB JAR File	514
Create the EJB Client Stub Classes	514
Create the Service Deployment Descriptor	515
Use the WDSL File to Generate Client Stub Classes	517
Design and Test the Web Service Client	521
Invoking Web Services from Your MIDlets	523
Web Services Tools and Platforms	525
Apache Axis/Apache SOAP	526
IBM’s Web Services Tool Kit (WSTK)	526
HP’s e-Speak	527
Java Technology Web Services Architecture	527
The Future Direction of Web Services	529
Summary	530

Chapter 15. Transcoding and Personalization 531

Transcoding: Realtime Content Transformation 532

- Generating Content for Specific Devices 532
- What Is Transcoding? 533

Transcoding Implementations. 535

- Describing, Exchanging, and Discovering Mobile Device Capabilities. 535
- An Overview of the Resource Description Framework 536
- Transcoding Basics 541

Introduction to XSL. 541

- What Is XSL? 541
- What Types of Translations Is XSL Capable of Performing? 541
- How Are XSL Stylesheets Processed? 542
- XPath—Element Matching and Location 544
- XSL Stylesheet Element Selection 546
- Transcoding Engines—an End-to-End example 556

Using Cocoon to Transcode for Various Client Devices 559

Personalization. 564

- Personalization—How to Personalize? 566

Summary. 569

Chapter 16. XML Processing Using MIDP 571

Why XML in MIDP? 572

How to Parse XML in MIDP? 573

Parser Types And Features 573

- Tree-Based vs. Event-Based 573
- Validating vs. Non-Validating 574
- Support for Mixed Content 574
- Internal vs. External Entities. 575
- Namespace Support 576

Choosing The Right Parser 576

- NanoXML. 576
- TinyXML. 577
- KXML. 577
- UXML. 578
- Which Parser to Choose? 579
- XML Parsing Using MIDP—An Example 580

Other Applications of MIDP XML Parsing 586

- MIDP 2.0 586
- SOAP. 586

Summary	586
Chapter 17. Programming Strategies for MIDP	587
Graphics and User Interface Recommendations	588
MID Hardware Considerations	589
Reducing MIDlet Size	590
Code Obfuscation	591
Network Programming	593
Efficient Image (PNG) Manipulation.	593
Using Vendor-supplied or Third-Party MIDP Libraries	594
Efficient XML Parsing	596
Miscellaneous Recommendations	597
Summary.	598
<hr/>	
Part 4 Grand Finale: Campus Portal for Wireless Devices . .	599
Chapter 18. Campus Portal for Wireless Devices	601
Campus Portal for Wireless Devices	602
Campus Portal: Features, Functions, Benefits	603
The Campus Portal Applications.	603
Administration Service	604
System Services	606
Information Services	610
Messaging Services	614
Calendaring and Scheduling Services	616
Entertainment Services.	616
Summary.	618
Chapter 19. Campus Portal: A Look Under the Covers.	619
Campus Portal Client Technologies	620
Campus Portal Server Technologies	622
PortalXML	625
Transcoding Engine	626
Transcoder.	642
Personalization Engine	644
Services Framework	645

Services Implementation	649
Summary	653
Chapter 20. The Enterprise Goes Wireless.	655
The Handheld Device of the Future	656
3G...4G... And Subsequent Networks	658
Tomorrow's Enterprise Wireless Application	660
The Future of Web Services	665
Campus Portals for Everyone?	666
Conclusion	671
Where to Go for More Information	673
Index	677
