to Congress Jonah Kuhio Kalanianaole: San Francisco, July 1, 1910,

My dear Mr. Lane:-I have been invited to go home on the yacht Hawaii by Captain Wilder, and have concluded to accept. I shall enjoy the trip, and believe that it will benefit my health, which you know is by no means what it ought to be, and if I can help a little to get the boat in first, so much the better.

The only point against it is the vote on the liquor question to be taken on the 26th, but I have come to the conclusion that my being there is going to drive the election right into politics, and it will be used and handled only to get some advantage, one way or the other, for the regular elections in November.

I allowed my name to go on the committee handling the temperance side of the fight, because on the igniperance question I want to be with temperance, not against it. I also believe that many of the saloon men have forfeited all right to consideration by the way they have been handling their business, particularly among Hawaiians, and I felt a vigorous protest of some kind was necessary. Personally I would be pleased to see every Hawaiian cut liquor out altogether. They would be better off without it, but this is as far as my mind has

You know I am not a tectotaler and not a prohibitionist, and I certainly want no laws which we stalong race lines. The day for that in Hawaii is pau. What the Hawaiians as Hawaiians do must be a matter of free will and personal choice, but general laws reaching all races that curb the evils of liquor I will always help, and I am glad to hear that the liquor agitation has already cut out many saloons and shut off the sale of the worst kind of liquors. The present law is showing up well in these respects.

However, as I have already said, I don't propose so far as I am concerned, that the special election shall be used to do politics. Proper consideration of the rights of the Republican party alone which has made no party declaration on the ssubject, would require this from me. The cause of temperance itself will be injured by allowing the special election to take any such turn, but I have felt at liberty to express my personal sympathy and good will for the cause of temperance and to aid in the enforcement of the laws from that standpoint and this I have already fully done.

So I am making my plans to go on the Hawaii, and let us hope for once that a Jonah on board will bring goodluck.

It is now proposed according to the story told by people close to the Spreckels interests, to rebuild the Sonoma and Ventura and place them on he Sydney, Auckland and San Franisco route, with a third steamer to islands. THE JOYS OF CAMPING.

When your vacation comes go camping. Go if you have never tried it before, go if you have tried it a doze

Camp in the woods. Any dead limbs falling won't hit you. Any trees blow ing down will blow the other way, Mosquitoes don't really bite. It's all imagination.

Camp on the shores of a lake. Handy for fishing. No fish there, but handy 'f some should come along. You also want to see the shimmer of the moonlight on the water. Won't be any shimmers or moon, but that won't be your fault.

Lake handy to bathe in. Don't mind a few blood-suckers. They can be pulled off with a pair of pincers.

Seek the solitudes. The farther you are from a postoffice the longer the interval between your wife's letters or dering you to come home at once.

Have the roof of your shanty made of waterproof canvas. Then all the rain that comes down to earth for two weeks will be sure to come in.

Pine or spruce boughs for beds. Aromatic, you know, and they contain bugs. Don't miss anything, even the aromatic bugs.

The sugar, coffee and flour should be kept where they will mix in case of rain. You can thus have your cof fee cake without further preparation.

If you wake up at midnight and see a frisky little animal in the door o the shanty, try and hit him with a club. If you succeed there will be nore aroma around-all you want. Cold in the head? Of course, but

you never did have the swell-head half enough. Rheumatics? They don't amount to

MILITARY ROADS.

A San Francisco paper gives the news that the War Department has made an appropriation of \$10,000 for improving a public road connecting with the Presidio. Hopes that the planting of large garri sons on this island would be accompanied by some military road building, which were publicly expressed here, have been disappointed. Instead of doing road building for themselves, the military authorities have called on the municipality for a considerable amount of road building for their benefit. While the work would in time have been done anyway, the roads being public ones, precedence was given to it overwork that would have benefited a larger proportion of taxpayers. The request to have it done was almost dictatorial in tone, so that de lay of compliance would not have been without provocation.

According to the San Francisco example it would appear that the War Department has funds for road building in places where it will benefit the military posts. Congressman Kahn, before leaving Washington for his home, urged upon the quartermaster-general the neces sity of improving the Presidio road, and had been home only a few days when he received a favorable answer. This is a subject that the Governor of Hawaii, as well as the Delegate, might take up with the Government in Washington. There are roads already to most of the military and naval positions in and about Honolulu, but some of them would stand improvement, and for national dignity, they ought to be model thoroughfares. In addition to these already existing roads benefiting the national defensive services, there is a demand for a road to Watertown, the site of the naval dockyard, in the vicinity of the Pearl Harbor fortifications. To construct this road properly will require a large sum of money—a great deal more than the municipality can afford this year after its large outlay upon the island belt road. With some assistance from the War Department's fund, out of which San Francisco is receiving aid for the Presidio road, the building of the Watertown road might be promptly undertaken.

Mayor Gaynor of New York has condemned tag days. Lately, in vetoing a resolution of the Board of Aldermen giving permission for a tag day in the Borough of Richmond, the mayor said: "This resolution would authorize the women of the Day Nursery in Richmond to accost people in that borough for the purpose of extracting coin and other moneys from every possible citizen on the occasion of the tag day. Such an authorization is of doubtful legality, and more than doubtful propriety. The collection of money on tag days is made a success usually by the aid of small children—a practice which should not be permitted." While there is a good deal of sport in the tagging business, it will be generally admitted it is an infraction of private rights, as well as a breach of public decorum. Every man has a right to choose his objects of charity or benevolence and to do so in private.

PROGRESS OF PROHIBITION.

In view of the plebiscite on prohibition to be held in this Territory on the 26th inst., less than two weeks hence, it is important that the voters should be shown how the question and the experience of prohibition are faring in the world outside. The following extracts from a report of the recent world's convention of the W. C. T. U., held in Glasgow, will be found interesting and instructive:

Sir Alexander Simpson brought the greetings of the British Medical Temperance Association, Doctors, he said, know better than any the evils of even the moderate use of alcohol on character, health, reason, and life. The profession had often been charged with introducing one individual and another to the use of alcohol, but far oftener the evil thing was prescribed, not by the doctor, but by some friend of the patient. In the last two quarters in the wards of the Edinburgh Royal Infirmary, under the superintendence of Sir Thomas Fraser, perhaps the highest authority on therapeutics in Great Britain, all the patients had passed through without using one drop of alcohol as comfortably as in any of the other wards where it was in

"In the evening three thousand people gathered in St. Andrew's Hall. The galleries were gay with the banners of the different societies represented. Mrs. Stevens, who presided, said well informed people were agreed that there was today more total abstinence in the world than ever before, and the only logical outcome of this was prohibition. The wonder remained that at this stage of Christian civilization any locality or any country would, for a money consideration, permit the sale of that which caused 35 per cent of the insanity, 45 per cent of the idiocy, 80 per cent of the poverty and 90 per cent of the crime. When they heard that prohibition in Maine was a failure, she bade them ask who said so. They would find that it was the brewers, the distillers, the liquor-sellers and their emissaries. After 30 years' trial of it the people of Maine had, by a majority vote of three to one, embodied the law in the constitution of the state.

"Mrs. Armor, of Georgia, asked who said prohibition did absolutely prohibit. It was, however, the only thing in the world that had made the liquor traffic sit up and take notice. The disgrace of a nation was not in a few men breaking the law, but that a so-called Christian government should throw the purple and ermine of the law over a business which degraded manhood, dishonored womanhood, and beggared

childhood. "The main feature of Wednesday was the report of the secretaries This announced that since the last convention three and a half years ago, 47 cities of over 20,000 had abolished saloons, six of the United States had passed a prohibitory law and the membership of the Union in the States had increased by 62,000.

"Canada, they reported, drinks less per head than any country on the globe. The chief work of the Unions in Australia had been for 'no license.' In New Zealand the Unions had increased since 1886 from 15 to 78. These included 15 Unions of natve Maoris, who showed unprecedented enthusiasm against the traffic. In Sweden the government gave a grant to temperance educational work. Iceland had passed a prohibition law which is to come into force in 1912. Japan Kim, Miss J. K. Angus, Miss Mille reported seven new Unions formed last year, with 2,600 members.

"For New Zealand Miss Roberts said they had been successful in securing the prohibition of liquor in the training camps, and were hunting fermented wine from every communion table.

"Miss Anderson Hughes reported that New Zealand had already given a majority of 33,000 against the liquor traffic, and were it not for the two-thirds majority required, would have had prohibition long

China must wait for a national parliament for nine years, unless indeed a revolution should sooner bring one into existence. Already the empire has provincial assemblies, which were constituted by an imperial decree made on May 9 last. Delegates to these assemblies Mabel Armstrong, Miss Twalani Day-

I like to read the daily paper, so many stories in it are: "James Jinks, the well known linen draper, was run down by an auto car. His head was split, his neck was broken, he had no chance of being cured; the doctor heard his last SPEED MANIACS words spoken-'I should have had my life insured!" "Today, while Rufus Jones was speeding,

in his new white and gold machine, he left a swath of dead and bleeding pedestrians where he had been." "We're not surprised that Jimmie Teeple is feeling proud and blithe and gay; he only maimed Hernice Hundley, Miss Alice Harper, a dozen people while riding in his car today." "Hank Simpson's car, Miss Amy M. Wong, Miss Annie C. the owner in it, was out to make some record whirls; while traveling a mile a minute, it killed three boys and seven girls. There ought to be a law forbidding the kids from going on the street; at any hour an auto, skidding, may wound or kill them, and repeat." "The motorists are holding rallies, demanding laws to guard their rights; let folks on foot go through the alleys and leave the streets for honking wights."

joined in an earnest petition for the immediate convocation of a national parliament, which was considered at the first meeting of the Council of the Empire held during the regency of Prince Chung. An Imperial decree issued on June 28 conveyed a refusal of the popular demand. It appears that the Regent purposes to adhere to his original program, which provides for a general legislative body to be summoned nine years after the first meeting of the provincial assemblies. Having waited a few thousand years for representative government, China should hardly count nine years more as worth making

We have just passed through anoth er period of drastic Hquidation, Many stocks have touched their lowest point since the recession first commenced. and are now 16 to 40 points below the high level of the year. The latest cause for renewed weakness was the decision of the Interstate Commerce Commission that some of the Pacific roads had been charging exorbitant rates on portions of traffic near the Pacific coast. This action was at once interpreted as an evidence of continued hostility on the part of the government towards the railroads, Perhaps such interpretation was not entirely warranted, but its effect upon the stock market was distinctly injurious. There is no disguising the fact that our financial leaders are more or less agitated over the continued attacks upon corporations in

which required reform is generally conceded bit the repetition of blows received from the Legislature and the government during the last 6 months is proving decidedly detrimental to the interests of investors. It may be good politics to strike the rattroads and big corporations at every opportunity, particularly as some of the reforms insisted upon are necessary; nevertheless the repeated shocks to confidence which these developments provoke ought, if possible, to be avoided. Foreign investors are already becoming particularly sensitive to the attacks upon corporations which, if continued, will not only seriously injure our market abroad, but force an unwelcome return of our securities.

Unfortunately these shocks have come at a time when confidence has been undermined by other considerations. Liquidation has not been confined to stocks. It has extended to many of the commodity markets, and is finally being felt in land speculation, which in some parts of the country has been vastly overdone. It is now generally recognized that a business reaction is fairly under way. Economy and retrenchment is the order of the day, and the spirit of pessimism which prevails everywhere Is in striking contrast with the feeling of optimism which marked the opening of the current year. Our bankers have been more or less apprehenvagance and reckless speculation. It

sive regarding the Western situation, where a spell of unusual prosperity had removed all checks upon extrafinancial institutions, national banks excluded, were committed to extensive land operations, and that the over-extension of credit thus produced will oblige the interior banks to depend much more heavily than usual upon New York to finance the coming crops. In all probability this danger has been so fully realized that when the time of anticipated stringency ar rives it will be found to have been largly recounted. Nevertheless, there still remains some uneasiness regarding the Western, banking situation, which has been further complicated by unfavorable news regarding the THERE WILL BE A SPECIAL crop of spring wheat. These latter meeting of Hawaiian Lodge No. 21, F. reports have undoubtedly been utilized only a local affair, since the promise is for a large yield of winter wheat, and the total wheat crop promises to be about an average one. There is still time for improvement for the remainder of the spring wheat crop, According to the most reliable reports

the outlook is for a big crop which

LIABILITIES.

the Logislature and by the govern will more than compensate for any That there have been abuses possible loss in wheat. Corn is of roads, lnasmuch as it not only provides much freight, but is the most important element in the preparation of cattle and hogs for market. The cotton crop is in fair condition, and according to the government report there is good chance for a full yield. The hay crop also promises to be large. As a whole the crop situation is fairly satisfactory. The big yields which were much to be desired are not forthcoming, but on the other hand, there are as yet no indications of serious or damaging deficiency.

> As to the money situation that promises to largely correct itself. Funds are already accumulating, call money being especially abundant because banks are keeping their funds where they will be most readily available. The possibilities of stringency in the crop season have been materially less. count are correspondingly reduced. There is little speculation now in progress, and the fact that values of both stocks and commodtles are on a considerably lower plane increases the working capacity of the money supply, and also tends to lessen the probabilities of stringency.

Whether the present decline will make any further progress or not is difficult to forecast. In any event some sharp recoveries are about due. There has been a decided increase in the strength of the bear party, and a short interest of considerable importance still exists, and would prove an element of strength in event of further recessions. Whatever unfavorable news may come to the surface during the next few weeks must have been largely discounted. Political disquiet; attacks on corporations: trade reaction; speculative liquidation; crop disasters, and threatened stringency in money would all seem to have been fully anticipated by the decline of 15 to 40 points, which, as sald above, has taken place during the past six months. Many stocks are now selling upon a very attractive investment basis, especially in view of the low rates for money, From now on stocks are likely to pass from weak into Childs, who will close it at the end strong hands, and investment purchases of high grade securities made at the current level, will later on unquestionably yield handsome returns. See culative operations, however, will have to be conducted with extreme caution. Prices may undergo sharp rallies, but the powers in control of the market do not yet appear to be working in corcert for a higher level, and until bul leadership becomes more pronounced we can hardly look for a positive re-

Official information has come from McBryde plantation that the new water development has proceeded to within 3,000,000 gallons of the amount. originally figured upon and aimed at by the engineers. It is stated that this small amount can be added to the supply within another week, making he water resources complete and adequate for all purpose.

This is very cheering news, indeed, to the stockholders of McBryde.

Will be ready for delivery within a few weeks.

Colonel Roosevelt in writing his publishers, Charles Scribner's Sons, says: "I regard this book as a serious thing. I have put my very best into it and I cannot consent to have it appear in any but FIRST CLASS FORM."

In the foreword he writes: "I speak of Africa and golden joys; the joy of wandering through lonely lands; the joy of hunting the mighty and terrible lords of the wilderness, the cunning, the wary, the grim.

"Apart from this, yet mingled with it, is the strong attraction of the silent places, where the wanderer sees the awful glory of sunrise and sunset in the wide waste spaces of the

DES MOINES, July 2 .- Pleading for a united party and urging the elimination of rancor and strife, many county conventions in lowa today adopted resolutions calling upon President Taft to remove from his Cabluet those who have attempted to read out of the party the insurgents. These resolutions, which were adopted by a large number of the progressive counties, rang with a hearty indorsement of Senators Dolliver and who fought the tariff bill, and who had fought in the "cause of political righteougness.

In the same resolutions President he has made effort to carry out the progressive principles.

The principles of conservation, as laid down by Theodore Roosevelt and as at present expressed by Gifford Pinchot, were indorsed. According to returns received in Des Moines tonight from the ninety-nine counties in lowa that held conventions today to select delegates to the State convention, the progressives will control that gathering by a majority of 155. The progressives returned solid delega tions from fifty-eight counties, the standpatters from thirty-six, while five divided their delegations.

Senator Dolliver addressed the convention in Webster county, his home. He declared that he had nothing personal against President Taft. He referred to the rubber trust, and declared that Senator Aldrich, the Guggenheims and Senator Penrose were interested in it, and, therefore, in the tariff bio. Senator A. B. Cummins was permit

ted to name Polk county's delegater to the Republican State Convention at the county convention here. Resolutions indorsing the administrations of President Taft and Governor B. F. Carroll in emphatic terms and commending in enthusiastic language the work of Senators Cummins and Dolliver at the recent session were adopt-Both factions are claiming control of the State convention, the stalwarts by 99 majority and the insurgents by a majority not as yet estimated in figures.

Half the families of the country live n their own home. No great European nation approaches this proporion, except France. A small part of northern Italy has peasant proprietors; Ireland may have them under the land act. The tenyments of New York, says the World, compare favorably with Liverpool's and Berlin's. with their large percentage of one and wo room homes.

Our savings bank deposits per innabitant are surpassed by those of Norway, Denmark, and Switzerland, but this test is almost valueless. We have perhaps one-tenth as many tain. In New York public charity is a small item. In the budget of Berlin it is a big one. Where paupers are plenty living standards are low.

Robert Blair, education officer for London says: "Of the 700,000 children in London schools, approximately 60,000 appear to be necessitous in the winter season." There is no such proportion here. For education we spend much more than other nations -whether with better results than

Germany or Switzerland is disputed. There remains the most vital consideration-diet. A race insufficient ly fed declines in size and vigor, Mulhall gives these estimates of annual meat consumption in pounds per individual: United States 129, England 105, France 74, Germany 69, Belgium 69, Holland 69, Norway, etc., 67, Austria 64, Spain 49, Russia 48, Italy 23.

The diet of Massachusetts operatives familes is here compared with velty had a fairly good house. the Volt minimum standard, and with Cummins and the Iswa Congressmen the diet of Neapolitan factory hands as given by Manfred:

Volt Min. Naples, Mass. Albumen (grams)...118 70 100-202 Taft was indersed only in so far as Carbohydrates ... 500 368 400-700 But the Massachusetts and Naples takes no account of climate or of the size of individuals, and Mulhall's estimates are only approximate. The diet of the people has undoubtedly been lowered of late in disease-resisting and energy producing value by songs. George Gardner and the othhigh prices of food, especially meat,

We are better fed still than Euro- tures, and the picture program will rean reople. Anything like parmanent decline in the nation's diet would mean decreased efficiency-a calamity so appalling that statesmanship has no duty comparable with that of averating it by reform in methods of distribution, and by relieving poverty, at the cost of wealth, of the heavy taxation it bears.

PARIS, July 4 .- To crink beer and spirits is to encourage the development of tuberculosis says Dr. Jacques Bertillon, the well known physician who originated the finger print system of police records. But he declares wine is the arch enemy of the white

He bases his arguments on the French departmental statistics, In the northern eight departments where beer, cider and brandy are the chief drinks, there were 230 consumption deaths per 100,000 inhabitants in one year. In Southern France, where wine is in general use, only 140 per 100,000 die of the scourge

He finds further support for his theories in the prevalence of consumption in England, where little wine is used, but immense quantities of beer and spirits. It is alcoholism of this kind that must be fought if tuberculosis is to be stamped out, says the French expert.

The Spreckels company has always looked forward to pracing the liners back on the Sydney route, depending upon congress to grant a subsidy that would enable the company to resume business with the colonies. The failure of congress to come to the aid of the company has thus far prevented a reestablishment of the line, and the reported proposition of Sir James Mills may result in going ahead with the undertaking

When the Spreckels liners were taken from the Australsia route three years ago it resulted in the company making an end of its expenditure of at least \$1,000,000 a year in this port San Francisco merchants and the business community generally felt the failure of the line, but not so keenly as did the people of New Zealand and Australia. They have ever since been clamoring for a direct line to San between the colonies and Great Briwith the British government in the transmission of mails to and from London and the colonies.

At one thirty this afternoon the Montcalm was off Barber's point and will probably be alongsigle of the naval wharf by three o'clock.

An officer representing Admiral Rees will call on board the cruiser as soon as she is moored; Admiral Rees will return the call as soon as the French Admiral has made his official call on the senior American officer.

As the big cruiser enters the harbor she will fire as international salute consisting of twenty-one guns, followed by a salute in honor of Admiral Both salutes will be returned from the saluting battery at the naval station.

The Montcalm will be docked at the naval wharf, Walkiki of the cruiser Chattanooga. Nothing official has been learned about her stay, but it is very likely that she will remain for at least ten days before resuming her voyage to San Francisco.

The Montcalm is a sister ship of the Guaydon and Dupetit, being a vessel of 9517 tons displacement. Her length is 460 feet, beam 63 feet and she has mean draft of 24 feet when fully loaded. She carries a crew numbering nearly seven hundred officers and men. Her rig is one of the old style rigs of the French navy, having two funnels forward and two aft, with a great deal of dseless space amidships. Her bow is of the usual ram type so much used by the vessels of the French Navy.
