Introducing VDO REDI-Sensor™

Multi-Application TPMS Sensors

The seamless, multi-application service solution for TPMS.

- Ready out of the box!
- Pre-programmed and designed to follow OE vehicle relearn procedures
- Works with all major TPMS scan tools
- Now covers over 80% of all vehicles in North America
- Reduces inventory and eliminates service delays
- OE designed and validated

REDI-Sensor™

VDO

Save time and money with VDO REDI-Sensor, the most versatile TPMS sensor on the market.

Works with all major TPMS scan tools.

If a shop has the TPMS scan tools to handle OE sensors, it's ready for REDI-Sensor. Unlike other sensors that require the purchase of specialized programming tools and software upgrades, no additional purchases, training or investments are needed to get started with REDI-Sensor because it is designed to follow OE vehicle relearn procedures. If you have the tools and equipment to service OE sensors, you're ready for REDI-Sensor!

Parts stores can also deliver REDI-Sensor without worrying whether their customers have the TPMS scan tools necessary to work with it, because all major TPMS scan tools are compatible!

REDI-Sensor works with all major TPMS scan tools, including: ATEQ, Bartec, OTC/SPX, K-Tool (T.I.P.S.) and Snap-on.

REDI-Sensor™

NEW!
Expanded Asian Coverage
 Part No. SE10002
 VDO REDI-Sensor
 315 MHz

Part No. SE10001
 VDO REDI-Sensor
 314.9 / 315 MHz

Part No. SE10004
 VDO REDI-Sensor
 433.92 MHz

REDI-Sensor makes tire service quicker and easier.

Ready to install right out of the box.

REDI-Sensor is the TPMS service solution that the aftermarket has been waiting for! It is pre-programmed and designed to follow OE vehicle relearn procedures.

While some other multi-application sensors require added cost and labor to load vehicle software/protocols to a blank sensor with specialized programming tools, REDI-Sensor comes ready to go, right out of the box.

Faster hunt mode.

REDI-Sensor saves valuable time during the vehicle relearn process, when using TPMS scan tools that incorporate a hunt mode. REDI-Sensor uses an "intelligent design" to wake faster and deliver positive results sooner. This helps prevent the vehicle relearn process from timing out, which eliminates the need to redo the procedure.

Enhanced tire/wheel components.

REDI-Sensor pivoting valve stem combined with technically superior valve stem hardware/sealing components now increases wheel compatibility.

Less inventory for parts providers.

VDO REDI-Sensor replaces a host of OE sensors, including banded, snap-in and clamp-in types from Beru, Continental, Lear, Pacific, Schrader, Siemens VDO and TRW. With REDI-Sensor, parts stores can substantially reduce the number of SKUs required to provide full TPMS coverage.

Eliminates lost service opportunities.

Service shops only need to keep a small supply of REDI-Sensors on hand to be ready to service practically any vehicle that comes in. No waiting for a part delivery and no lost sales to drivers that can't leave their vehicle.

REDI-Sensor now covers over 80% of all vehicles in North America.

VDO REDI-Sensor provides multi-application coverage for a broad range of cars, vans, SUVs, crossovers and light trucks from 2002 – 2013.

Asian releasing now! European in process!

The VDO REDI-Sensor program covers over 80% of all vehicles in North America with only 3 SKUs and replaces over 130 OE sensors... and counting.

The hundreds of new applications covered by REDI-Sensor have been added to the

already broad and deep coverage of the VDO OE TPMS replacement sensor program.

Continually expanding coverage.

With VDO REDI-Sensor, we are researching and validating new vehicle applications daily – ensuring that our REDI-Sensor coverage continues to grow and our customers are ready for whatever vehicle enters the bay!

OE engineering for the aftermarket:

- 1 VDO multi-application sensor technology easily syncs with a variety of vehicles
- 2 Ready out of the box! Pre-programmed and designed to follow OE vehicle relearn procedures
- 3 Valve core, stem and hex nut treated against corrosion
- 4 Valve cap seal minimizes air loss
- 5 Pivoting valve stem makes installation easier and accommodates a wide range of wheel rim profiles
- 6 Robust waterproof design resists tire air moisture
- 7 Technically superior valve sealing design

A complete TPMS service program.

REDI-Sensor service parts:

VDO REDI-Sensor replacement parts and service kits are available and include seal, washer, valve core, hex nut and cap. Replacements are also available for the sensor's durable metal valve stem, which is reusable.

TPMS OE replacement parts:

In addition to our VDO REDI-Sensor replacement parts, we also offer OE replacement parts and

service kits needed for proper TPMS service including OE application specific replacement sensor assemblies, service kits and stainless steel wheel bands for valveless sensors.

Make the VDO TPMS Replacement Parts Program your one-stop source for TPMS service parts.

The VDO Advantage

As one of the world's leading OE suppliers of TPMS, we are on the cutting edge of product engineering and development. This means we not only deliver the best technology needed to service today's tire pressure monitoring systems, but also help meet the challenges of tomorrow's TPMS.

Our worldwide reputation for quality and innovation is built on our ability to continually deliver revolutionary solutions for both OEMs and the aftermarket. That's why we are best known for our engineering and technological capabilities and ranked among the industry's top five original equipment manufacturers.

Continental has a strong heritage as one of the industry's leading manufacturers of complete OE Tire Pressure Monitoring Systems, including sensors, related sensor service parts, as well as passenger and commercial vehicle tires. All VDO TPMS replacement parts are made in ISO-certified facilities to the same quality standards as the OE parts supplied to automakers worldwide.
