

## Welcome to the SNG Barratt Jaguar XJ40/X300 Parts Catalogue

Following the Worldwide success of our Definitive Jaguar Owners Catalogue which covers over 20 classic models in one 300 page publication, we have taken the decision to release a range of more detailed catalogues for each of the more popular models that we cover. This will allow us to better illustrate the parts we have available and to make identification of the item required a little easier.

### How to use this catalogue...

Use the illustration in each section to identify the component that you require. Note the indicated item number and find the corresponding number in the section listing. There you will see our part number for that item and to its right the quantity required per car. Very often this will be the original Jaguar part number, thus allowing you to refer to an original factory parts catalogue if more detail is required.

Each part number is listed in our price list. This listed price is per item and is plus VAT except in the case of books and other VAT exempt items.

If you then quote this part number when contacting our sales department, we will be able to confirm the cost and whether we have the part in stock.

If you cannot conclusively identify the item that you require then please call and we will try to assist you. Our staff have many years of experience with all aspects of the Jaguar marque and may have the just the answer...

### Your customer number

Upon dealing with SNG Barratt for the first time you will be allocated a customer number. In many cases this will be your UK postcode. If you are overseas your sales advisor will use either your zip code or a number made using your surname. This customer number can either be found on your invoice or simply by asking the person serving you. The ability to provide your customer number when contacting our sales department will allow us to access your information far faster and serve you even more efficiently.

Customer number.....

### Your vehicle details

Please complete this section as accurate vehicle information at your finger tips will prove to be invaluable. Very often identifying the correct part for your car can be all down to chassis or engine number. These details can best be found on the car itself, as registration documents can often prove to be incorrect due to engine swaps and vehicle upgrades that the DVLA have not been advised of.

Year of manufacture.....

Chassis/VIN number.....

Engine 2.9 / 3.2 / 3.6 / 4.0 / 6.0

Engine number.....

Gearbox Automatic / Manual
