INFINITI

Inspired Performance

IN OBSESSION

Be driven by desire. Revel in it, and reveal the sensory delights of luxury focused on feel. The all-new Infiniti Q50 is designed for these delights. It delivers them with high-performance intensity and state-of-the-art technology. Luxury has found its future. Time to indulge.

IN SECONDS

Velocity has a special kind of magic. The moment you're launched forward, you can feel from the inside out engineering that accelerates emotion, with power and efficiency. It's so much more than movement.

INFINITI DIRECT RESPONSE HYBRID doesn't ask you to choose between efficiency and exhilaration. Capable of achieving 6.8 l/100 km, it also delivers 261 kW with heart-pounding immediacy and only 159 g/km of CO₂ emissions.

ACCELERATION SWELL transforms mechanical power into emotional excitement. Precise engine tuning unleashes torque over a broader rev range, and sustains g-forces over a longer period. The feeling of acceleration is shaped to increase the faster you go.

What are you seeking? What feeling are you waiting for? As you take hold of the steering wheel, no matter what experience you anticipate, the Q50 amplifies it. It's designed to become what you desire.

DIRECT ADAPTIVE STEERING expands your sense of total control behind the wheel, and your concentration on the road with a digitally enhanced steering connection – allowing for an unprecedented level of handling personalisation and filtering out unwanted vibration.

INFINITI DRIVE MODE SELECTOR matches the way your vehicle performs to your conditions, your needs and even your mood with the simple flip of a switch.

IN MOMENTS

There are hidden levels of driving enjoyment that are unlocked when technology and design converge to purify your connection with the road. It takes only an instant to discover what's beneath the surface.

ZERO-LIFT AERODYNAMICS manage airflow to ensure your Q50 is balanced while you're in motion, helping maintain exceptional stability at speed and its intimate connection to the road.

DOUBLE-PISTON SHOCK ABSORBERS adjust damping forces based on road conditions to maintain the perfect ride and precise response that suits all your moments behind the wheel.

IN ANTICIPATION

Your every touch has power. The greatest response and the tightest connection can come from a momentary contact, the lightest touch of a fingertip. Discover how technology designed in the right way can transform your gestures into influence.

INFINITI INTOUCH™ integrates your digital life, including apps, in a system that responds naturally to your touch. Touch, tap, swipe to navigate email, stream music, catch up on social media and more.

INFINITI INTOUCH™ NAVIGATION offers a more intuitive 3-dimensional view and simple interface for increased ease and confidence, helping you expertly find your location and your destination, even in crowded city environs.

INTELLIGENT CRUISE CONTROL (ICC) automatically slows you down when traffic in front of you slows down. When the way is clear, it accelerates back to your desired speed. Less effort, more ease.

IN AWAKENING

Visionaries don't just see the world with greater accuracy, they dream of new experiences that never were before. Take hold of a singular vision of luxury that owes nothing to conventions that have preceded it, and everything to your total sensory delight.

LED HEADLIGHTS are designed to complement the sculpted design of the Infiniti Q50 and create a dramatic flair that will turn heads. They also turn to shed light on where you're steering, helping heighten visibility as you manoeuvre.

SMART BEAM ASSIST automatically dims your high beams as oncoming vehicles approach. Extend courtesy, increase safety, savour convenience catered for you.

OBJECT OF ATTRACTION

THE INFINITI Q50

AMBIANCE

A welcoming and evocative space is measured by its ability to stir your emotions.

360
PEOPLE

6
COUNTRIES

.48
MILLIMETRES

MATCHLESS MATERIALS Glide your hand across the armrest, and your fingertips seem to recognise the instinctively rewarding feel. This is purely intentional. We took one-and-a-half years, surveying 360 people all over the world to quantify the most pleasing tactile feel, then created the perfect materials to match it. With tension and texture that match the depth and spacing of the ridges in your fingerprint it imbues the surfaces you'll engage most with the perfect touch.

INVITING YOU IN We use light not only to make you feel more secure, but to make you feel like an honoured guest. Welcome Lighting responds to your presence automatically by gently illuminating lamps in the front door handles as you approach. Then, as you get closer, the interior lights are illuminated. This choreographed sequence ends with the Start/Stop Button, pulsing as though with a heartbeat – inviting you to bring your Q50 to life and building anticipation for the road ahead.

EVERY BREATH FRESHER AND CLEANER Even the invisible is never overlooked. The Advanced Climate Control System features the dual zone adaptive climate control with auto-recirculation. It works in concert with the Grape Polyphenol Filter, which removes up to 99.5% of allergens from the air coming in from the outside.

ABUNDANT SPACE The interior of the Q50 was designed to emphasise both the rewards of spaciousness and the feeling of space. Interior elements like the roof and windshield pillars were shaped to give a more open feeling. The backs of the supportive front seats give rear passengers more legroom. What's more, a wide trunk opening gives you easy access to one of the largest luggage compartments in its class.

POWER

Award-winning build quality, fuel efficiency and output can be measured with instruments or graphs, but the true excellence of Infiniti engines is in the feeling unleashed as you drive.

261
kW

6,8*
l/100 km

3.5-LITRE V6 ENGINE WITH INFINITI DIRECT RESPONSE HYBRID
A combined system power of 261 kW responds to your call with thrilling immediacy, while it achieves a surprising 159 g/km of CO₂. It transitions from all-electric mode to full-power hybrid mode, with an intensity and organic response that defies everything you think about hybrids.

125
kW

4,8*
l/100 km

2.2-LITRE DIRECT INJECTION TURBO DIESEL ENGINE
As clean burning and fuel efficient as it is emotionally invigorating. This engine uses the latest Diesel technology to achieve 4.8* l/100 km, while putting 125 kW and 400 Nm of torque at your command. And it delivers that power while producing less than 126 g/km of CO₂ emissions.

155
kW

7,0*
l/100 km

2.0-LITRE DOHC 4 CYLINDER TURBO PETROL ENGINE
The 16-valve Dual Over Head Camshaft (DOHC) engine uses Direct Injection Gasoline (DIG) and turbo charging to help deliver 155 kW of power and 350 Nm of torque, while still being easy on the environment producing only 162 g/km of CO₂ emissions.

MAGNESIUM PADDLE SHIFTERS, located behind the steering wheel, allow quick gear change for enhanced sporty driving sensation.

* This figure refers to the combined fuel consumption

261 536 159
kW Nm g/km CO₂

PERFORM

Unleashing the intelligence and intensity of Infiniti Direct Response engineering, the Q50 frees you to drive precisely the way you desire.

96

PERSONALISED
SETTINGS

AN ELECTRIFYING CONNECTION There are nearly 100 ways to dial-in the driving dynamics of your Q50. Direct Adaptive Steering – a world-first technology – gives you an unprecedented level of customisation by next-generation digital systems to streamline the steering mechanism. Not only can it make driving more relaxing by filtering out any unwanted vibration you feel in the steering wheel, it allows you to tailor the steering sharpness to get precisely the response you desire.

EFFICIENT INVIGORATION No hybrid design is quite like it, and none has this acceleration speed. The powerful 50kW electric motor and cutting-edge lithium ion batteries of the Infiniti Direct Response Hybrid are capable of maintaining speeds of up to 80 km/h in all-electric mode. When not needed, the 3.5-litre V6 petrol engine is turned off and completely disconnected, maximising mechanical efficiency. And yet, it responds to your call for power with a stirring intensity.

MORE RESPONSIVE BRAKING The agile performance of the Q50 is made all the more predictable with sports brakes, featuring opposed-piston calipers (only on Q50S Hybrid). The extra bite they take, shaves speed quicker and with greater confidence.

LIGHT ON ITS FEET These stunning 19-inch alloy wheels heighten both the looks and performance of the Q50. Lightweight, thanks to both material and design, they reduce unsprung weight. That reduction of mass makes driving more exciting by allowing the suspension to be more finely tuned and by making the handling of the Q50 more responsive and more nimble.

AERODYNAMIC ADVANTAGE The upper and lower body of the Q50 direct the flow of air over, around and under the vehicle, turning it into an incredibly effective downforce generator. By minimising the pressure under the car and the “suction” effect over it, the design achieves zero-lift at the front and rear. This reduces the effects of wind turbulence at higher speeds, and leaves you feeling more tightly in control and in touch with the road surface.

SHARPER SHIFTS When you flick the magnesium paddle shifter (only with 7AT* sport versions) for a lower gear, Downshift Rev Matching blips the throttle to ready the engine for the new gear. It gives you the power of expert performance driving by delivering smoother downshifts for increased stability and more consistent engine power.

CONTROL WITHOUT COMPROMISE When conditions are ideal, Intelligent All-Wheel Drive (AWD) sends 100% of the power to the rear wheels for more sporty response and performance. But it also constantly monitors wheelspin, throttle position and vehicle speed, and can divert up to 50% of the available power to the front wheels to enhance traction and control when conditions are less than optimal. Your need for control, and your desire for excitement are both satisfied.

* 7-speed automatic transmission.

ASSIST/ENTERTAIN

The advanced technologies of Infiniti InSuite™ simplify tasks and anticipate your needs as they keep you in touch with and in control of your world.

8"

TOP

7"

BOTTOM

CUSTOMISABLE DUAL TOUCHSCREENS

INTUITIVE TECHNOLOGY Infiniti InTouch™ puts intuitive control of your vehicle's systems, and access to your favourite apps right at your fingertips. The dual touchscreen interface allows you to set the climate control, do a Google® search, check your social media, or access a wide variety of comfort and convenience settings all from the same elegant interface. And if you customise Infiniti InTuition™, it remembers your personal choice of apps, so you'll always see the apps you've selected.

A SMARTER WAY TO SEE The Adaptive Front-lighting System (AFS) illuminates not just the way ahead, but around as well. It directs light towards corners by turning the headlights in coordination with input from the steering. What's more, the Q50 introduces innovative High Beam Assist technology, which automatically dims your high beams when oncoming traffic approaches at night (optionally available).

MAKING YOUR SPACE SAFE Distance Control Assist (DCA) employs radar to monitor the vehicle in front of you and helps you maintain a safe following distance. If your following distance becomes too short, the system can automatically apply the brakes as you release the accelerator, and it can warn you if you need to brake. If you keep your foot on the accelerator while closing in on the other vehicle, the system can push the pedal upwards to assist you in releasing it.

CONVENIENCE IN TRAFFIC Intelligent Cruise Control (ICC) (Full-Speed Range) allows you to choose your desired speed, and automatically slows your vehicle in slowing traffic, bringing it all the way to a complete stop. Then, as the traffic flow picks up again, it re-accelerates your vehicle to your preset speed. This visionary innovation, and the personalised convenience it offers, is available with a simple touch of a button.

ALL-AROUND AWARENESS The Around View Monitor (AVM) with Front and Rear Sonar System and Moving Object Detection gives you exceptional awareness of your environment as you park. You'll see a simulated 360° view from above, clearly showing you the objects detected around your car. And the system will even alert you to any moving objects detected in your vicinity. It helps put you intuitively in control of your surroundings, while simultaneously putting you at ease.

AUDITORY INDULGENCE The next-generation BOSE® Premium audio system brings 14 individual speakers to bear in its powerful array – three of which are 10-inch subwoofers, which add audible depth to every form of music. Their positioning and sound delivery is precision-engineered specifically for the interior of the Q50 to filter out noise and distortion, and to surround you with a compellingly rich and realistic sound.

INFINITI INTELLIGENT KEY automatically custom-tailors your car for you. Everything from the driver's seat to your navigation preferences, climate control, audio and performance settings, will be set precisely the way you like it.

PROTECTION

The Infiniti Dynamic Safety Shield (DSS) concept – our comprehensive approach to safety – layers technologies to monitor conditions, help you avoid a collision, and help protect you and your passengers if one occurs.

ALWAYS LOOKING FOR DANGER Predictive Forward Collision Warning (FCW) can warn you of a possible collision, even when the cause is outside your field of vision. It uses radar to continuously monitor and analyse the relative speed of not only the vehicle directly ahead of you, but of the vehicle in front of that one as well. If your closing speed on either exceeds safe limits, it provides an alert and tightens the seat belt to help restrain you.

SENSES WHERE YOU CAN'T SEE The Blind Spot Intervention™ System uses sensors to help alert you to a vehicle detected entering the blind spot area in an adjacent lane and helps you avoid it. First, the warning light illuminates. Then, if you begin moving toward the occupied lane, a warning sounds. The system will even apply opposite side brakes to help you guide your vehicle back to the centre of your current driving lane.

MAINTAINING YOUR LANE The Lane Departure Warning (LDW) and Prevention (LDP) System uses a camera to watch for departure from the travelling lane when you haven't signalled, and audibly warns you if it's detected. Then, if the drift continues, the Lane Departure Prevention System gently helps ease your vehicle back into the proper lane. What's more, Active Lane Control (only available with Direct Adaptive Steering) can help you maintain position when driving in a crosswind or on a slanted road.

REVERSE WITH GREATER CONFIDENCE A world first from Infiniti, Back-Up Collision Intervention (BCI) employs an advanced set of sensors to help detect vehicles approaching from either side as you back up. If a vehicle is detected, the system alerts you – first, a warning light appears, then an audible alarm sounds, followed by accelerator force feedback. The system can even (only with the automatic gearbox) intervene by automatically engaging the brakes to help avoid a collision.

PREPARED TO PROTECT Under certain braking conditions, the front-seat Pre-Crash Seat Belts automatically tighten the front seat belts – helping restrain you and helping to maximise the effectiveness of the other occupant protection devices, such as air bags.

HARM MITIGATED Forward Emergency Braking scans the area ahead of you looking for signs that an unavoidable collision might be imminent. If it detects a probable accident, the system warns the driver, and automatically engages the brakes and tightens the driver's seat belt to reduce speed and mitigate damage.

SELECTION

Hues that change in response to light and angle. Matching exterior and interior colours to reflect the distinctive energy and mood of the seasons. The reassuring resilience of Scratch Shield Paint that stays brilliant longer. These are just a few ways Infiniti uses paint to express feeling, evoke confidence, and shape the emotional essence of a vehicle.

GENUINE INFINITI ACCESSORIES

The same exacting standards applied to creating an Infiniti vehicle go into designing and manufacturing Genuine Infiniti Accessories. With a wide array of quality products designed to integrate seamlessly, you can be assured of a custom fit and finish.

ACCESSORIES SHOWN, midnight black grille, load carrier, roof box, welcome lighting.

The vehicle shown is fitted with accessories that might differ or not be available for South Africa.

ENTRY GUARDS Set in a stainless steel panel, these soft “Infiniti” illuminated entry guards give the sill area a sporty and sophisticated look. The kit, supplied in pairs, lights up your entrance and protects the paintwork.

TRUNK NET Durable and unobtrusive, it conveniently helps you organize your possessions in the trunk, and helps keep them safely in place

REAR SPOILER* Custom-designed for perfect fit and factory-matched colour, it enhances your vehicle’s sporty, aerodynamic appearance.

TOW BAR Tested to meet the highest demands of safety and functionality, the tow bar allows you to bring your needs wherever you want. It is integrated into the car’s bodywork.

*Please check applicability with your local Infiniti Centre.

¹Quoted fuel consumption and emission values have been established using the prescribed method of measurement (United Nations Economic Commission for Europe “ECE” Regulation R101 in the current version) as required under current legislation. This data does not pertain to the specific vehicle and does not comprise part of the offer, but is supplied for the purpose of comparison between the various types of vehicles, in accordance with 1999/94/EC. Driving behaviour / conditions and other non-technical factors contribute towards a vehicle’s fuel consumption and CO2 emissions over and above the determined fuel efficiency of a vehicle.
