YOUR PULSE WILL BE RACING
BEFORE YOU EVEN TURN THEM ON.

HRS[™]

HIGH RESOLUTION SERIES

Power and Performance

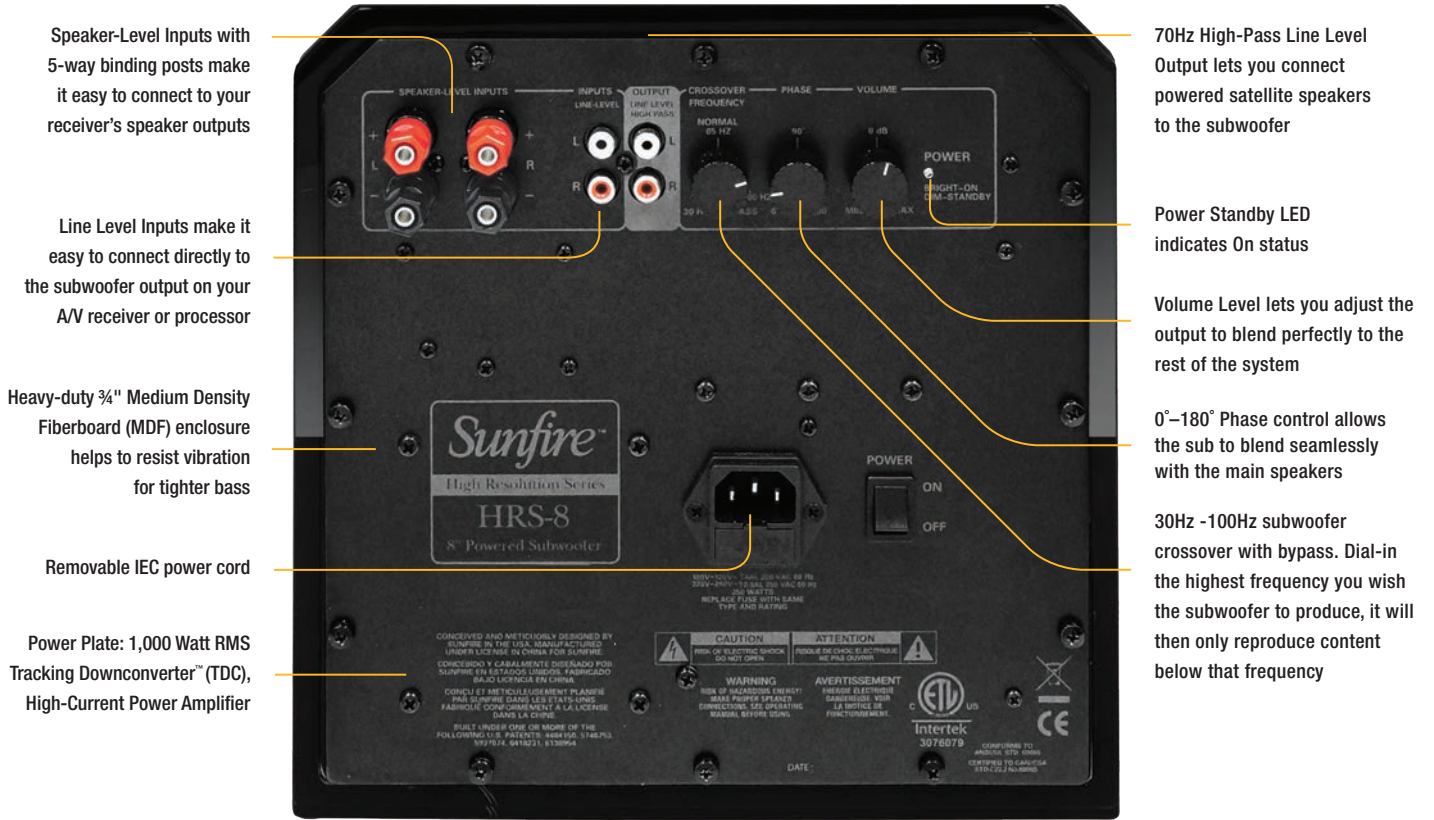

The HRS series is a Home Theater lover's reason to celebrate, each subwoofer featuring a long-excursion woofer and massive magnet structure to give you incredible deep bass. In addition, our three Sunfire HRS subs take many of their cues directly from our most legendary accomplishments, like the super-efficient Tracking Downconverter™ (TDC) power supply and the ultra-low distortion, High Back-emf woofer design. The overall result is tighter, punchier and more musical bass that listeners appreciate every time the HRS gets powered up.

For unprecedented sonic accuracy, each model features Sunfire's Frequency Filtration Design™ (or FFD) which gives HRS subs a 'sonic intelligence' you'll both hear — and feel — every time you play your favorite music or movies. And because a great subwoofer is about more than premium technology alone, we gave HRS subwoofer cabinets a beautiful, high-gloss black piano-like lacquer finish that will look great wherever you decide to place yours.

From large rooms to small, from movies to music, the Sunfire HRS series will remind you once again of what it feels like to get a whole lot for so little.

Maximum Control

Back panel of HRS-8, HRS-10 and HRS-12

HRS | 12

The Most Performance You Can Buy For Less Than a Buck A Watt.

You could certainly be forgiven for wanting our flagship HRS-12 subwoofer on its looks alone. With its gorgeous high-gloss, black piano-like finish compact cabinet, the HRS sub makes quite the design statement. What's more, beneath this beautiful exterior lies a bit of our most advanced Sunfire subwoofer science: like a High Back-emf woofer with massive magnet structure and a 1,000 Watt Tracking Downconverter™ high-current amplifier with our Frequency Filtration Design that produces ultra-high output and super-low distortion. With this array of stunning firepower, the HRS-12 is ideal for larger rooms and dedicated home theaters for the most superb movie and music playback.

HRS-12 12" Powered Subwoofer

Design Features

- 12" long-excursion woofer with High Back-emf design
- Massive magnet structure
- 1,000 Watt RMS Tracking Downconverter™ amplifier
- Frequency Filtration Design (FFD): An audio filter that tailors the subs sonic signature to provide improved accuracy and depth
- Soft clipping circuit: Allows graceful overload and prevents speaker damage due to amplifier clipping
- Sensitivity: 108 dB SPL @ 1W/1m
- Frequency response: 18Hz - 100Hz
- Automatic signal-sensing turn-on and standby mode
- High-gloss black piano-like finish

Rear Panel Features

- Speaker & line level inputs
- High-pass line level output
- Infinitely variable crossover, phase & level controls
- Removable IEC power cord

HRS | 10

10 Inches. 1,000 Watts. Countless Hours of Enjoyment.

The Sunfire HRS-10 subwoofer produces really prodigious bass out of a super-small cabinet. If that's still not enough, the 1,000 watt high-current amp incorporates Sunfire's Tracking Downconverter™ technology, and remains incredibly cool while delivering more control over the subwoofer. And more control means deeper, more accurate bass — something you'll truly appreciate every time you listen to your favorite music and movies. For medium-sized and multi-purpose rooms used for both music and movies, there's no better choice than the HRS-10.

HRS-10 10" Powered Subwoofer

Design Features

- 10" long-excursion woofer with High Back-emf design
- Massive magnet structure
- 1,000 Watt RMS Tracking Downconverter™ amplifier
- Frequency Filtration Design (FFD): An audio filter that tailors the subs sonic signature to provide improved accuracy and depth
- Soft clipping circuit: Allows graceful overload and prevents speaker damage due to amplifier clipping
- Sensitivity: 105 dB SPL @ 1W/1m
- Frequency response: 20Hz - 100Hz
- Automatic signal-sensing turn-on and standby mode
- High-gloss black piano-like finish

HRS 8

Owning the Best is Never an Extravagance.

High performance from our smallest footprint yet — a 10" cube cabinet. That's not merely a product definition, it's the overarching design criteria behind all HRS subwoofers. Sunfire takes the HRS-8 to a new dimension of performance and value. With its high-output, this sub is a perfect fit for small to medium sized rooms. But don't let its diminutive profile fool you — the HRS-8 is a bundle of dynamite that's capable of filling your room with more deep, punchy bass than you ever thought possible. The HRS-8 sets an entirely new set of rules for how subwoofers in this price segment should perform.

HRS-8 8" Powered Subwoofer

Design Features

- 8" long-excursion woofer with High Back-emf design
- Massive magnet structure
- 1,000 Watt RMS Tracking Downconverter™ amplifier
- Frequency Filtration Design (FFD): An audio filter that tailors the subs sonic signature to provide improved accuracy and depth
- Soft clipping circuit: Allows graceful overload and prevents speaker damage due to amplifier clipping
- Sensitivity: 102 dB SPL @ 1W/1m
- Frequency response: 22Hz - 100Hz
- Automatic signal-sensing turn-on and standby mode
- High-gloss black piano-like finish

WIRELESS

No New Wires with Our Subwoofer Wireless Kit.

Meet Sunfire's purpose-built, 2.4GHz wireless kit designed for subwoofers. Simply connect the wireless transmitter module to your A/V processor or receiver and then the wireless receiver to your subwoofer. All you need is a power outlet near the sub and you're ready for plug-and-play bass with the freedom to move the subwoofer to just about any location in the room. If you want to run two subwoofers, just add a second wireless Sunfire receiver.

SDSWITX / SDSWIRX Wireless Transmitter / Receiver

Design Features

- Purpose-built for subwoofer applications
- Digital transmission
- Maximum of two subs per transmitter
- Wireless range 8.7m (29 feet) max (one transmitter/one receiver)
5.1m (17 feet) max (one transmitter/two receivers)

Sunfire: the foremost name in small, incredibly powerful subwoofers and home theater audio. Sunfire combines unconventional thinking with precision engineering to create innovative subwoofers that deliver exceptional performance.
